PRODUCTION PREVIEW

Q1 2019 - 2022

(OTCQX:LLEIF · EPA:ALLN · BME:LLN)

# LLEIDA.NET REGISTERED SERVICES PRODUCTION FOR 1Q 2019-2022

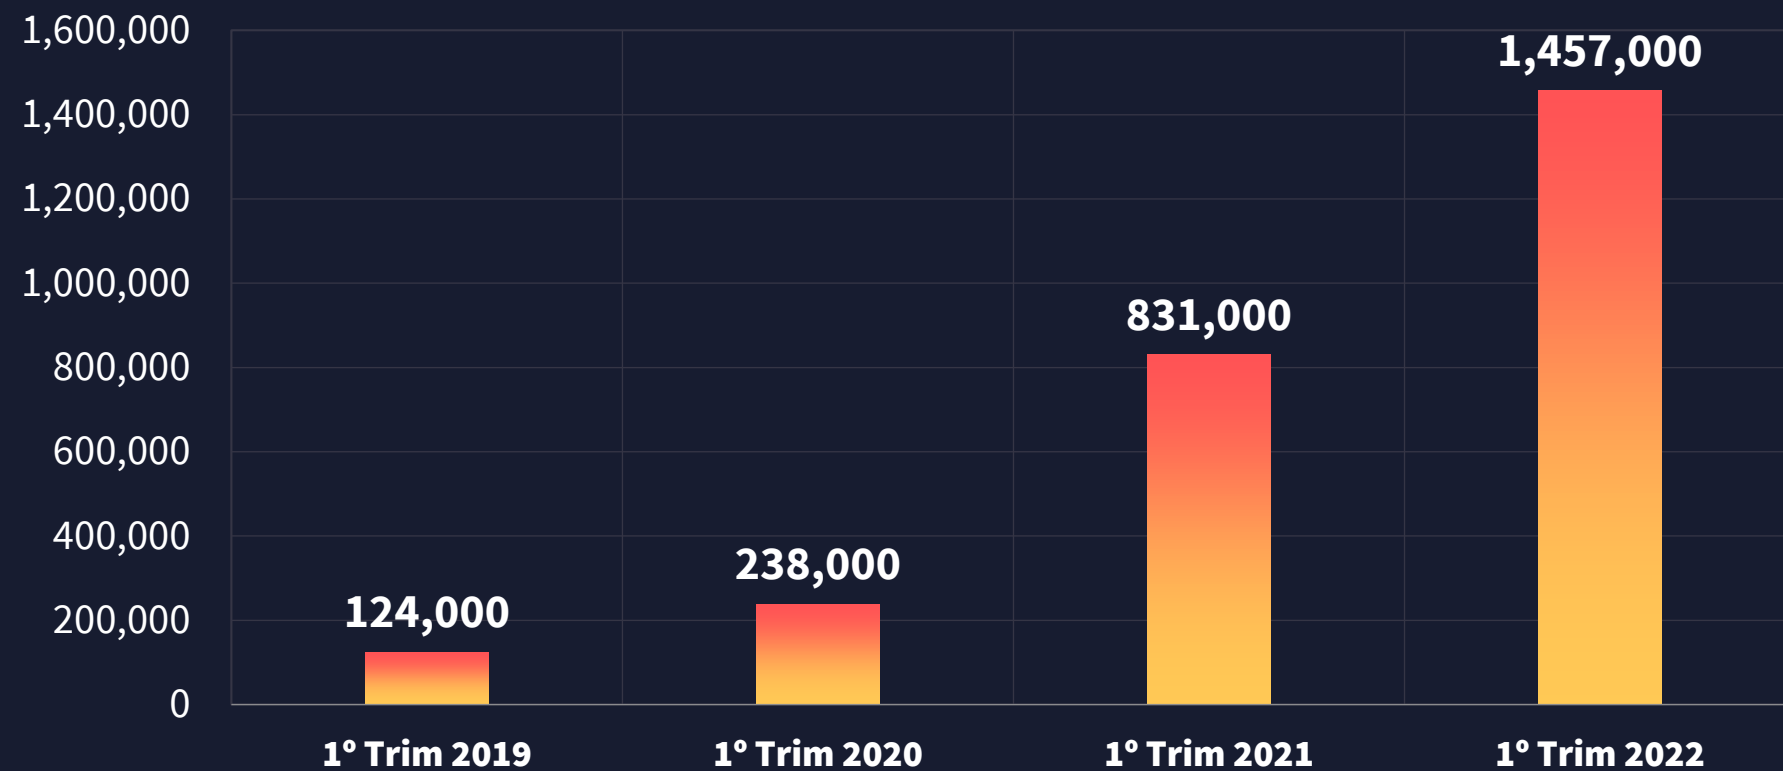

We analyse:

- Production of transactions of **Click & Sign** Standard
- Production of transactions of **Click & Sign** Pro
- Production of **Registered Email**
- Production of **Registered SMS contract**
- Production of Registered SMS

(\*) **Data exclusively from Lleida.net without Indenova**

# CLICK & SIGN STANDARD EVOLUTION

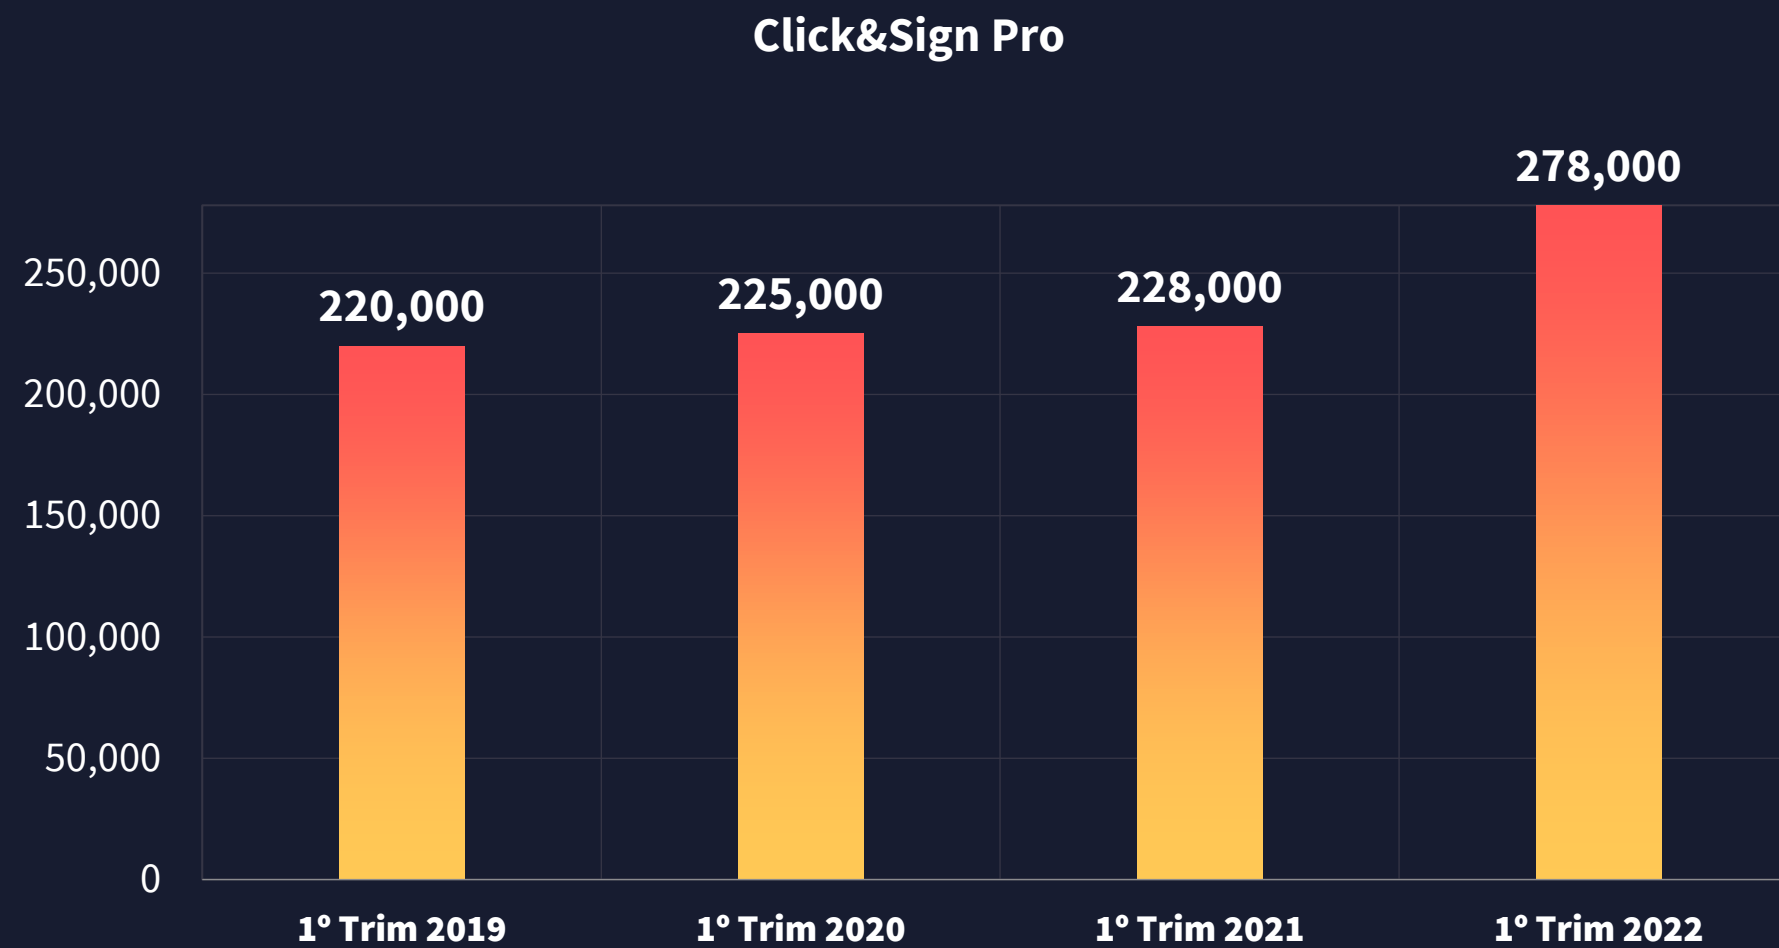

Click&Sign Standard

## Production of workflows Click & Sign Standard

API contract signature production generated by customers has continued its upward progression over the last 4 years, with a 75.33% increase compared to the same quarter last year. Most traffic comes from telecoms and insurance contracts in Europe, consumer finance in Latin America, Spain and Eastern Europe, loan services by fintech in Latin America and healthcare services in Latin America.

# CLICK & SIGN PRO EVOLUTION

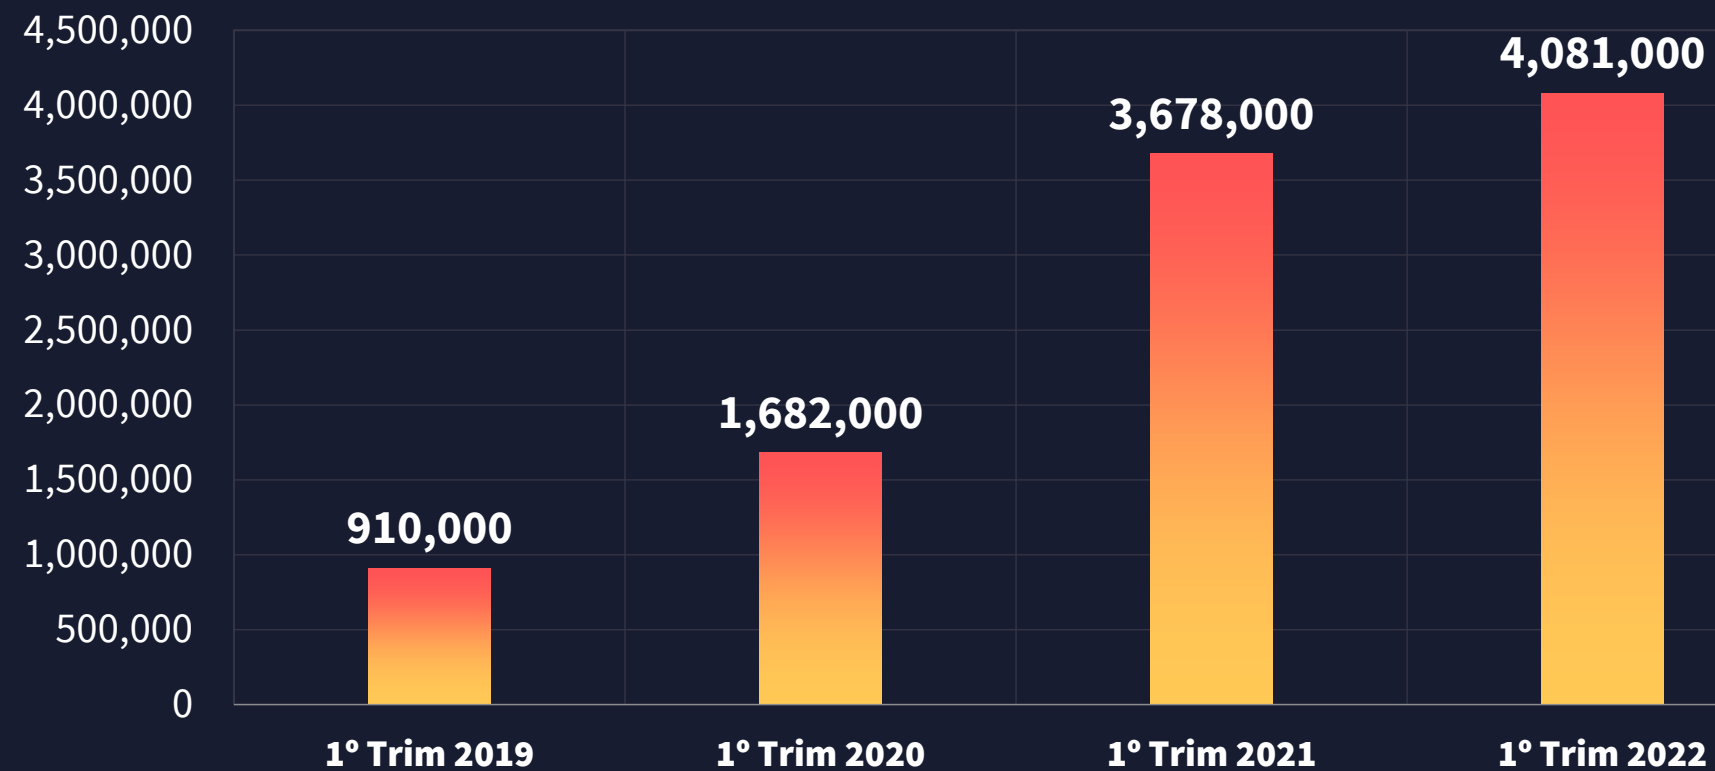

## Production of workflows Click & Sign PRO

So-called PRO workflows are highly complex contracting workflows that require several factors to be analysed before the actual contracting is carried out. The increase in PRO workflows over 1Q2021 was 21.93%, led by the contracting of insurance in Europe and the issuance of credit cards by Spanish financial institutions, along with car rentals.

# REGISTERED EMAIL EVOLUTION

Registered Email

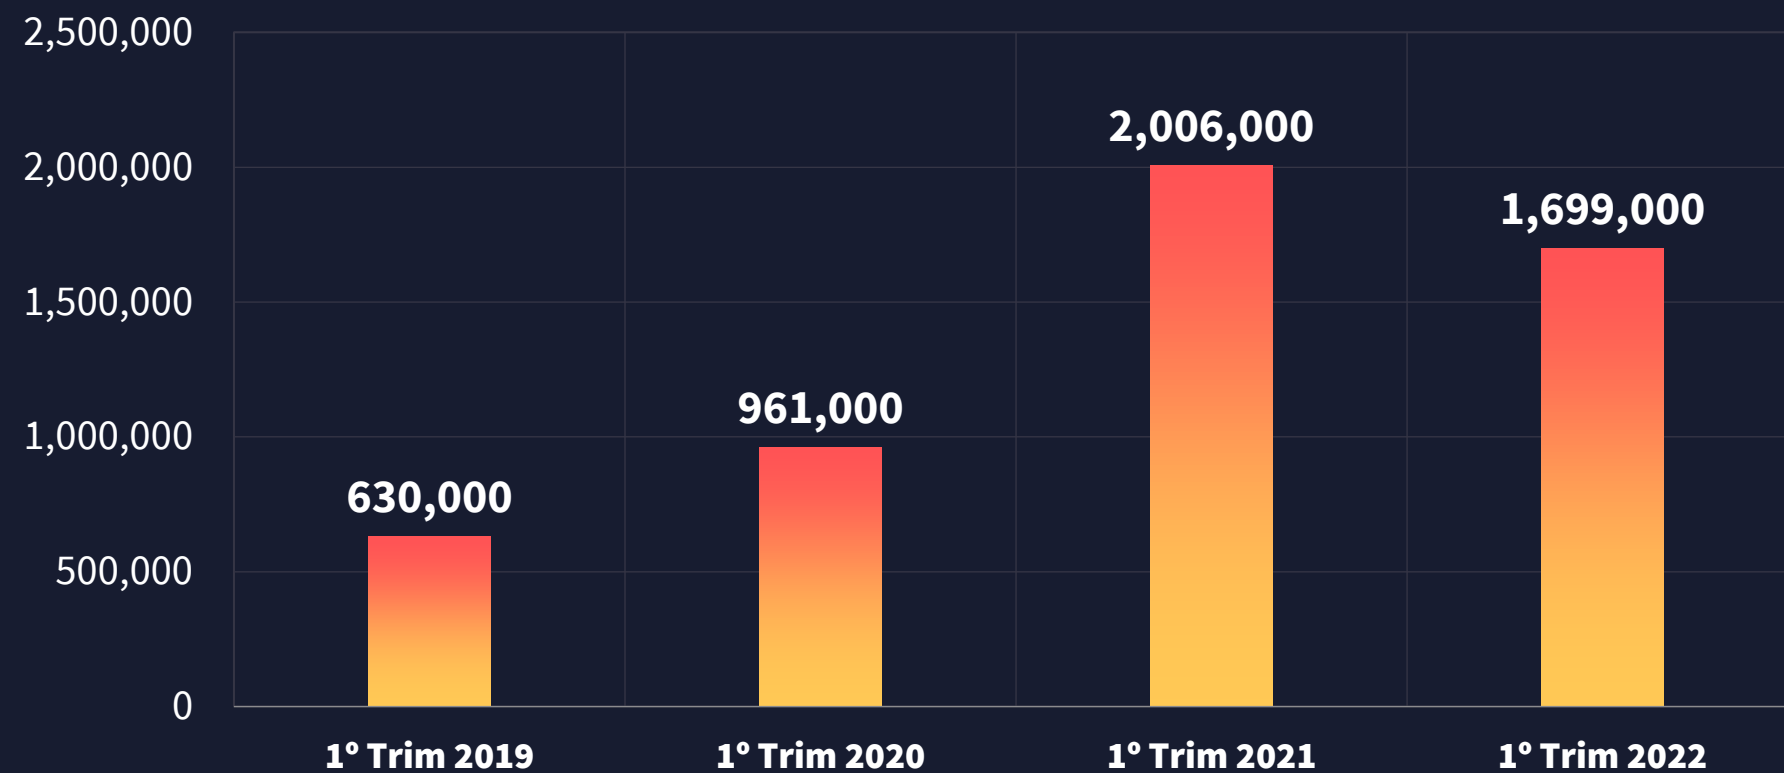

## Production of Registered Email

Email has experienced over a 10.96% increase compared to the traffic generated during 1Q2021. Traffic comes mainly from insurance companies in Latin America, utilities in Europe and Latin America, and notification from government services where Lleida.net provides services.

# REGISTERED SMS EVOLUTION

Registered SMS

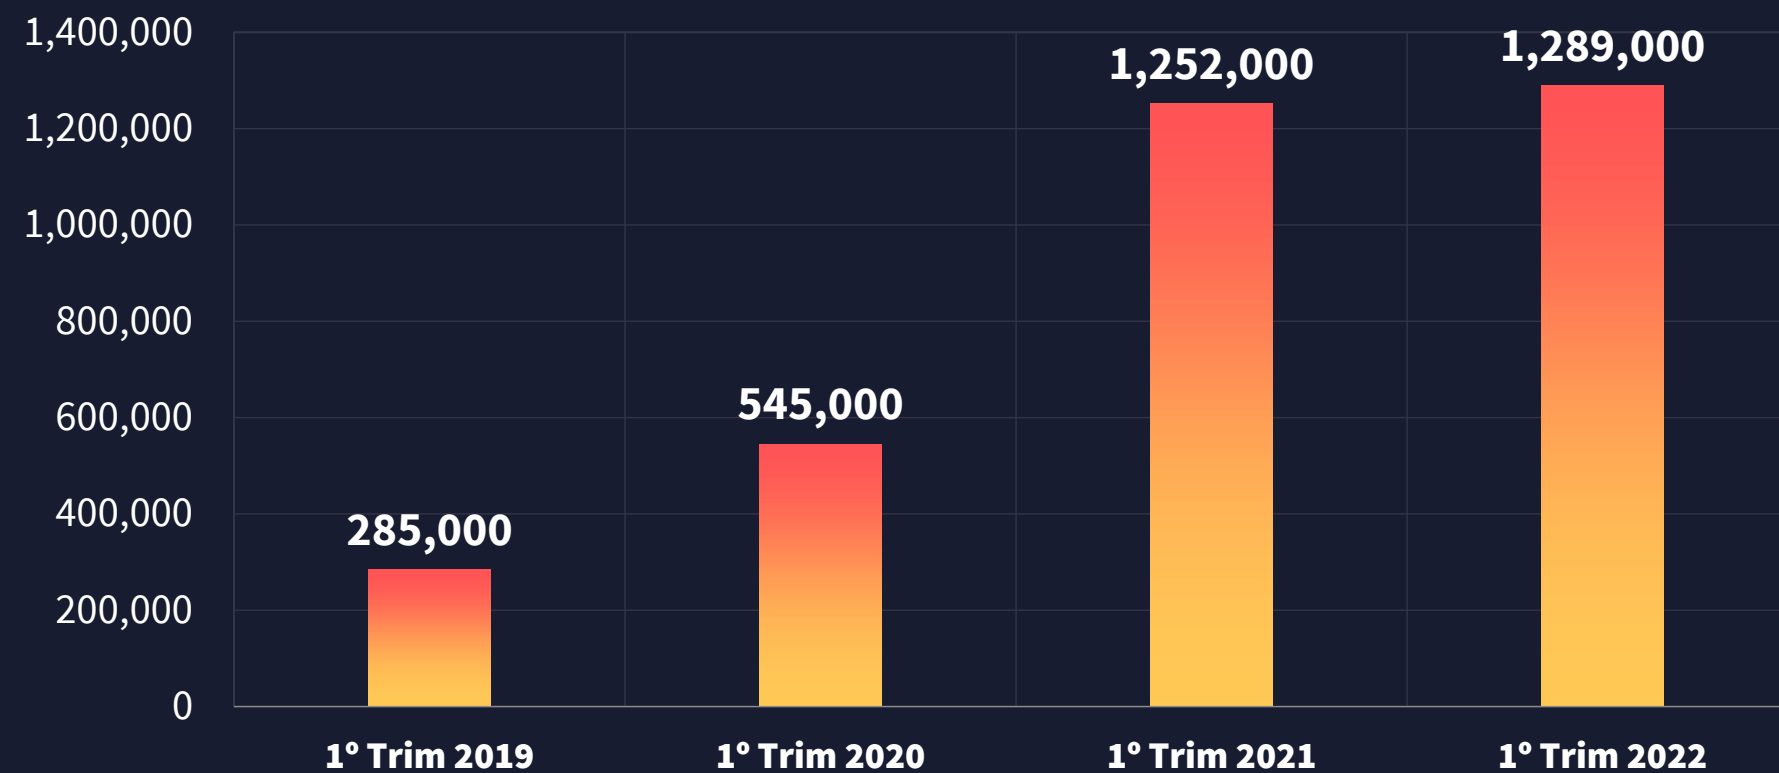

## Production of Registered SMS

Registered SMS traffic for 1Q2022 dropped by 15.3% 1Q2022 as there were no significant notifications campaigns for third-party debt purchase and sale. Most of the traffic comes from insurance and utility claims in Europe, financial defaults, insurance contracts in Europe and financing contracts in Spain.

# REGISTERED SMS CONTRACT EVOLUTION

Registered SMS contract

Production of  
Registered SMS contract

Registered SMS Contract traffic kept steady in 1Q2022, showing a growth of just 2.96% as the vast majority of it was used to switch gas/electricity companies in Spain and Europe, and the energy environment has not been precisely stable over the last few months, shifting part of the traffic to Click&Sign Standard. Traffic comes mainly from utility providers (electricity and gas) in Spain and Europe.
