Rapport des résultats du Groupe Lleida.net pour l'exercice 2018

Le 22 janvier dernier le Groupe Lleida.net a publié des résultats provisoires avec les données disponibles.

Après l'évaluation des audits de l'entreprise, nous mettons en annexe les variations des données des résultats provisoires et les données incluses dans les comptes annuels consolidés par le conseil administration.

<i>Données en Milliers d'euros Consolidés</i>	HR 22 JANVIER 2019	COMPTES ANNUELS AUDITÉS	Var. €	Var. %
Ventes	12.368	12.359	(9)	0%

Différences taux de change	(9)	(17)	8	89%
Résultat avant impôts	435	412	(23)	-5%

Nous pouvons observer les variations peu significatives et nous pouvons les résumer en trois grands points :

La marge brute est de 3 mille euros à cause de la régularisation des estimations effectuées par le Groupe.

- Il existe une variation dans les dépenses du personnel. Au début, le coût des tiers indépendants a été compris dans les dépenses du personnel ; face à l'établissement des comptes, il a été compris dans les services externes.

- La participation de la société mise en équivalence en Inde a été provisionnée, ce qui a un impact sur le résultat financier de 16 milliers d'euros. Le groupe a choisi de changer la stratégie de pénétration dans ce pays pour le moment.

Le reste des rubriques ne présentent pas de variations significatives et nous trouvons, comme conséquence :

- Une augmentation de la marge brute de 780 milliers d'euros par rapport à l'année 2017, découlant de l'augmentation des gammes de produits SaaS ainsi que de l'augmentation des ventes de solutions SMS pour Wholesale.

Lleida.net a réussi, grâce à son investissement continu dans la R + D + i, à se positionner comme fournisseur de référence sur les marchés de la certification et des contrats électroniques. Capturer de gros clients, non seulement sur le territoire national mais aussi à l'international, consolider sa présence en Amérique latine en se concentrant sur la Colombie et développer ses activités en Afrique et en Europe. En outre, Lleida.net a été en mesure de tirer parti de son réseau mondial d'interconnexion, les opportunités qui se sont manifestées sur le marché Wholesale.

- Le résultat d'exploitation a pratiquement doublé, passant de 269 milliers d'euros en 2017 à 529 milliers d'euros. L'investissement dans le personnel a été continu, incorporant du personnel dans le domaine de la R & D et technique : personnel qualifié, des cadres supérieurs et des docteurs. L'augmentation des frais de personnel, sans tenir compte de la rémunération, est passée de 2 241 milliers d'euros à 2 443 milliers d'euros, soit 9%, lorsque l'effectif moyen atteignait 65 personnes, soit 18% de plus que la moyenne des effectifs en 2017.

- Lleida.net a réussi à multiplier par sept le résultat avant impôts et à augmenter l'EBITDA de 455 milliers d'euros. Le contrôle exhaustif des coûts, accompagné d'une augmentation des ventes, a permis une augmentation des résultats exponentielle.

Sur le plan du Bilan, les principales variations de l'immatériel s'expliquent par le développement en R+D+i menés lors de cet exercice, par un montant de 787 mille euros, et qui visent la gamme SaaS. En décembre 2018, Lleida.net a obtenu l'homologation EIDAS pour son service qualifié de remise électronique certifiée (E-delivery) devenant ainsi la première entreprise espagnole et la sixième en Europe à recevoir cette homologation. Ceci est le résultat des efforts et des investissements en R & D menés par Lleida.net ces dernières années, car le système repose également sur une méthode par laquelle Lleida.net a déposé un brevet dans le monde entier. De même, l'homologation permet la société d'opérer au niveau européen sans aucune barrière

nationale, étant ses certificats admis par défaut devant tout tribunal ou administration européenne.

Sur le plan de l'actif courant, il n'y a aucune variation importante en comparaison avec la clôture de l'exercice 2017 concernant le chiffre des clients, si bien le chiffre d'affaires a augmenté, le groupe a réussi à maintenir les délais de paiement des clients et à réduire le taux de sinistres.

Sur le plan du passif il faut souligner qu'il n'existe aucune variation significative concernant les informations publiées dans le Fait pertinent relatif à endettement net, qui est de 1,9 millions d'euros comme prévu.

To the Shareholders of **LLEIDANETWORKS SERVEIS TELEMÀTICS, S.A.:**

Opinion

We have audited the consolidated financial statements of **LLEIDANETWORKS SERVEIS TELEMÀTICS, S.A.** (the Parent) **AND ITS SUBSIDIARIES** (the Group), which comprise the consolidated balance sheet at December 31, 2018, the consolidated income statement, the consolidated statement of changes in equity, the consolidated statement of cash flows and the notes to the consolidated financial statements for the year then ended.

In our opinion, the accompanying consolidated financial statements give, in all material respects, a true and fair view of the Company's equity and financial position at December 31, 2018, as well as its consolidated results and cash flows for the financial year ending on said date, in accordance with the application of the regulatory framework of financial information (identified in note 2.a of the consolidated annual report) and, in particular, with the accounting principles and criteria contained therein.

Basis of opinion

We have performed our audit in accordance with the regulations governing the auditing of accounts in force in Spain. Our responsibilities under these standards are described below in the section on the auditor's responsibilities for the audit of the annual accounts in our report.

We are independent from the Group in accordance with the ethical requirements, including those of independence, which are applicable to our audit of the financial statements in Spain as required by the regulations governing the activity of auditing accounts. Accordingly, we have not provided services other than those of the audit of accounts nor have concurred situations or circumstances that, in accordance with the provisions of the aforementioned governing regulations, have compromised the necessary independence.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Key audit issues

The key audit matters are matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. Our audit procedures relating to these matters were designed in the context of our audit of the financial statements as a whole, and in the formation of our opinion on these and we do not express a separate opinion on those matters.

Key audit issues	Audit response
<p>Valuation of capitalized research expenditures</p> <p>As described in notes 3.b and 5 to the accompanying consolidated report, the Group has intangible assets for expenses on capitalised research projects of a significant amount. These expenses must be specifically individualised by project and have reasons of economic-commercial profitability, among other requirements in order to be capitalized in the Group's balance sheet. In addition, the assessment by the Parent's management and directors of their recoverable amount or the need for impairment involves value judgements and estimates. For these reasons, we have considered the valuation of these assets to be a key issue in our audit.</p>	<p>We have carried out the following audit procedures, among others:</p> <ul style="list-style-type: none">- Understanding of the policies and procedures applied by the Group for the capitalization of research expenses.- We have analysed a sample of activations of the projects during the year, obtaining evidence such as the hours and cost of the same incurred by the workers in the different projects and the cost of external collaborations.- We have obtained the certificates issued by an independent third party on the projects regarding the validity of the capitalised amounts.- We have obtained a detail of the book value of the research expenses individualized by projects, and analysed the sales projections for the different projects, profitability and real sales for the year, goodness of the data, the reasonableness of the hypotheses, the degree of compliance to date, revision of the arithmetic calculation, analysis of the discount rate, sensitivity to the variation of hypothesis and deviations in past estimates in order to evaluate the reasonableness of the recoverable value of the research expenses.- We have verified the correct amortization of the different projects capitalised on the basis of the current regulations applied by the Group.- Finally, we have verified that the notes to the accompanying consolidated financial statements include the related disclosures required by the applicable financial reporting framework. In this respect, Notes 3.b and 5 to the accompanying consolidated annual accounts include the aforementioned disclosures.

Key audit issues	Audit response
<p>Application of the going concern principle</p> <p>Since the Group has historically presented negative working capital and given the degree of indebtedness of the Group at year-end, which represents 42% of its liabilities (46% in 2017), it is necessary for the Group to comply with its business plan, as well as to obtain new financing through new loans and renewal of credit policies. During 2018 and 2019, up to the date of this report, the Group is generating positive cash flow and renewal of policies is taking place. The net financial debt has gone from 2.410 thousand Euros in 2017 to 1.901 thousand Euros in 2018, it means a decrease of 21% in one fiscal year.</p> <p>These circumstances are causing and mitigating factors of doubt regarding the application of the going concern principle in the formulation of annual accounts, whose evaluation involves value judgements and estimates. For these reasons, we considered the application of the going concern principle as a key issue in our audit.</p>	<p>We have carried out the following audit procedures, among others:</p> <ul style="list-style-type: none"> - Understanding of the policies and procedures applied by the Group in the estimation process of the Business Plan and Treasury Budget. - Obtaining the Business Plan and Treasury Budget prepared by the Management of the Parent Company. - Obtaining support documentation relating to both the contracting of new loans and the renewal of credit policies at maturity. - We have analysed the reasonableness of the estimates and assumptions of the Business Plan and the Treasury Budget made by the Parent Company's directors, through meetings with the Group's management and verification of verifiable data, both of the key hypotheses used, as well as concordance of these with those used in previous periods by the Group. - We have evaluated the goodness of Management's forecasts by comparing the deviations and reasons for these between the budgeted and actual figures corresponding to recent years. - We have analysed the degree of compliance with both the Business Plan and the Treasury Budget based on 2018 figures, and we have analysed the financial situation to date. - Finally, we have verified that the notes to the accompanying consolidated annual accounts include the related disclosures required by the applicable financial reporting framework. In this regard, note 2.c of the attached consolidated report includes the aforementioned breakdown of information.

Other information: Management report

The other information comprises exclusively the management report for the financial year 2018, the formulation of which is the responsibility of the Parent's directors and does not form an integral part of the consolidated financial statements.

Our audit opinion on the consolidated annual accounts does not cover the consolidated annual report. Our responsibility over the consolidated management report, in accordance with what is required by the regulations governing the audit activity, consists of evaluating and reporting on the consistency of the consolidated management report with the consolidated financial statements, based on the knowledge of the Entity obtained in performing the audit of the aforementioned consolidated accounts and without including information other than that obtained as evidence during the same. Likewise, our responsibility is to evaluate and report that the content and presentation of the management report are in accordance with the applicable regulations. If, based on the work we have performed, we conclude that there are material misstatements, we are obliged to report this.

Based on the work performed, as described in the preceding paragraph, the information contained in the consolidated management report agrees with that in the consolidated financial statements for financial year 2018 and its content and presentation are in accordance with the applicable regulations.

The responsibility of the management and the audit in the respect committee of the consolidated financial statements

The management of the Parent Company are responsible for formulating the accompanying the accompanying financial statements so that they give a true image of the consolidated assets, the consolidated financial situation and the consolidated results of the Company, in accordance with the regulatory framework on financial information applicable to the Entity in Spain, and of the internal control that they consider necessary to allow the preparation of the financial statements free of material misstatement, due to fraud or error.

In the preparation of the consolidated financial statements, the management are responsible for assessing the Company's ability to continue as a going concern, revealing, as appropriate, the matters related with a company in operation and using the accounting principle of a going concern except if the management intend to liquidate the Company or cease operations, or if there is no other realistic alternative.

The Parent's audit committee is responsible for supervising the preparation and presentation of the consolidated financial statements.

The auditor's responsibility for the audit of the consolidated financial statements

Our objectives are to obtain reasonable assurance that the consolidated financial statements as a whole are free from material misstatement, due to fraud or error, and to issue an audit report that contains our opinion.

Reasonable assurance is a high level of assurance, but it does not guarantee that an audit conducted in accordance with the regulations governing the audit activity in force in Spain will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the regulations governing the account auditing activity in Spain, we exercise professional judgment and maintain an attitude of professional scepticism throughout the entire audit. Also:

- We identify and assess the risks of material misstatement in the consolidated financial statements, due to fraud or error, design and perform audit procedures to respond to those risks and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or circumvention of internal control.
- We obtain knowledge of the internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- We evaluate the appropriateness of accounting policies used and the reasonableness of the accounting estimates and disclosures by the Parent's directors.
- We conclude whether the use, by the Parent's directors, of the accounting principle of the Group as a going concern is adequate and, based on the audit evidence obtained, we conclude on whether or not there is material uncertainty related to events or conditions that can generate significant doubts about the ability of the Group to continue as a going concern. If we conclude that there is material uncertainty, we are required to draw attention in our audit report to the corresponding information disclosed in the financial statements or, if such disclosures are not adequate, we express a modified opinion. Our conclusions are based on the audit evidence obtained at the date of our audit report. However, future events or conditions may cause the Group to cease to be a going concern
- We evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We are required to communicate with the Parent's audit committee regarding, amongst other matters, the planned scope and timing of the audit and significant findings, including any significant deficiencies in internal control that we identify during the course of the audit.

We also required the Parent's audit committee with a statement that we have complied with the relevant ethical requirements, including those of independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Among the matters that have been communicated to the Group's audit committee, we determine those that have been of the greatest significance in the audit of the financial statements for the current period and that are, consequently, the key issues of the audit.

We describe these matters in our audit report unless legal or regulatory provisions prohibit public disclosure of the matter.

Report on other legal and regulatory requirements

Additional report to the Parent's Audit Committee

The opinion expressed in this report is consistent with that expressed in our additional report to the Parent's Audit Committee dated April 9, 2019.

Contract period

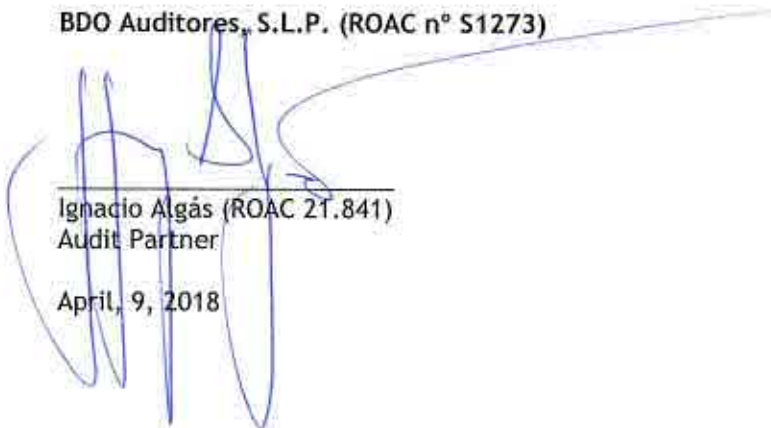

The Extraordinary General Shareholders' Meeting held on June 13, 2016 appointed us as the Group's auditors for a period of three years, starting from the year ended December 31, 2016.

Previously, we were appointed by resolution of the General Shareholders' Meeting for the three-year period and we have been auditing the accounts uninterruptedly since the year ended December 31, 2007, and the Parent Company has been a Public Interest Entity (PIE) since 2015.

Services provided

The services, other than the audit of accounts, provided to the Group are detailed in Note 20 to the consolidated financial statements.

NOTE 2. PRESENTATION BASIS OF INTERIM CONSOLIDATED FINANCIAL STATEMENTS

a) True and Fair View

The accompanying Consolidated Annual Accounts for the year 2018 were prepared with the accounting records of the different constituent companies of the Group, whose respective annual statements were prepared in accordance with the applicable commercial law currently in force and according to the General Accounting Plan approved by Spanish Royal Decree 1514/2007, 16 of November, in the case of Spanish companies, and in accordance with the applicable legislation in the other countries in which the companies that are part of the Consolidated Group are located, and are submitted as provided by the Royal Decree 1159/2010 of 17 September, so as to provide a true and fair view of the net worth, financial situation, results and accuracy of the cash flows included in the Consolidated Cash Flow Statement.

b) Presentation Currency

In accordance with the applicable laws and regulations on accounting, the Consolidated Annual Accounts are expressed in euros.

c) Critical Aspects of Uncertainties Valuation and Estimation

In preparing the accompanying consolidated financial statements, the Parent's Board of Directors used estimates to measure certain of the assets, liabilities, income and expenses recorded therein. The estimates and criteria basically refer to the evaluation of the going concern principle, given that the Group has historically presented negative working capital and given the degree of indebtedness of the Group at year-end, which represents 42% of its liabilities (46% in 2017), it is necessary for the Group to comply with its business plan, as well as to obtain new financing through new loans and renewal of credit facilities. During 2018 and 2019, up to the date of preparation of these financial statements, the Group is generating positive cash flows and policies are being renewed. The net financial debt has gone from 2.410 thousand Euros in 2017 to 1.901 thousand Euros in 2018, it means a decrease of 21% in one fiscal year.

Except as mentioned in the preceding paragraph, there are no uncertainties or aspects of the future that could entail a significant risk that could lead to significant changes in the value of the assets and liabilities in the following year, except for those relating to the nature of the business:

- Slower growth than expected in the Business Plan: slower maturation in some countries.
- Reasonability of the activation and recoverability of research projects.
- Highly atomised and competitive market at local level.

Although these estimates were made on the basis of the best information available at the close of fiscal year 2018, it is possible that events that may take place in the future will make it necessary to modify them (upwards or downwards) in coming years, which would be done prospectively, recognising the effects of the change in estimate in the corresponding consolidated income statement.

d) Comparison of the Information

The directors present, for comparison purposes, with each of the items in the consolidated balance sheet, the consolidated profit and loss account, the consolidated statement of changes in equity and the consolidated statement of cash flows for the year, in addition to the figures for 2018 those corresponding to the previous year. The items for both years are comparable and homogeneous.

e) Changes in Accounting Standards

As indicated in the foregoing section, this is the first year in which the Group voluntarily prepares consolidated financial statements, and therefore no changes in its own accounting policies have been made and no related adjustments are included as a result of errors.

f) Responsibility for the Information given and the Estimates made

For the preparation of the Consolidated Annual Accounts estimates have been used in order to value some of the assets, liabilities, incomes, expenses and compromises that are registered, and that, basically, these estimations are referred to the evaluation of losses by impairment of certain assets, the useful life of non-current assets and the probability of occurrence of provisions.

Notwithstanding that these estimates were made according to the best information available at the time of the preparation of these Consolidated Annual Accounts, it is possible that future events may occur that require their amendment for the next financial years; which would be carried out prospectively, taking account of the effects of the estimate change on the corresponding profit and loss accounts.

NOTE 3. RECOGNITION AND VALUATION STANDARDS

The principal valuation standards used by the Group in the drafting of its Consolidated Annual Accounts, in accordance with those established by the General Accounting Plan, were as follows:

a) Consolidation Principles

The consolidation of the Annual Accounts of Lleidanetworks Serveis Telemàtics, S.A. with the Annual Accounts of its investee companies mentioned in Notes 1.1 and 2, was carried out using the following methods:

1. Application of the global integration method for all Group companies, i.e. those over which it as effective control.
2. Application of the equity method as equivalence for associated companies, i.e. those over which a notable influence is exercised in terms of management but in which there is no majority vote or joint management with third parties.

The consolidation of the operations of **Lleidanetworks Serveis Telemàtics, S.A.** with those of the aforementioned subsidiaries was performed according to the following basic principles:

- The criteria used in formulation of the Balance Sheets, the Profit and Loss Account and the Statement of Changes in Equity and Cash-Flow Statements for each one of the consolidated companies are, generally, and in their basic aspects, homogenous.
- The Consolidated Balance Sheet, the Consolidated Profit and Loss Account, the Consolidated Statement of Changes in Equity and Consolidated Statements of Cash Flow include all adjustments and eliminations of the consolidation process, as well as relevant valuation homogenizations to reconcile balances and transactions between the consolidating companies.
- Balances and transactions between consolidated companies were eliminated in the consolidation process. The credits and debts with group, affiliated and associated companies which have been excluded from the consolidation are presented in the corresponding headings of the assets and liabilities headings of the Consolidated Balance Sheet.

- The deletion of Subsidiary equity investment was conducted by compensating the shareholding of the Parent Company with the proportional part of the net equity of the subsidiaries which is represented by the shareholding on the date of the first consolidation. The first consolidation differences were treated as follows:
 - a) Positive differences which cannot be allocated to the equity elements of the Subsidiaries were included in the "Consolidation Goodwill" heading of the Consolidated Balance Sheet. The impairment losses must be recognized in the Consolidated Profit and Loss Account and are irreversible
 - b) Negative differences, obtained as first consolidation, are recognized as reserves for the year considering that the group already existed previously in the different subgroups contributed to the Parent Company.
- The consolidated income for the financial year shows the part that may be attributed to the Parent Company, comprised of the income obtained by the latter plus the corresponding part, by virtue of the financial shareholding, of the income obtained by the invested companies
- The shareholding value of the minority interests in the equity and the attribution of income in the consolidated subsidiaries is presented in the "Minority Interest" heading of the Equity of the Consolidated Balance Sheet. The value breakdown of these shareholdings is presented in Note 4.

b) Intangible Fixed Assets

Assets included in intangible fixed assets are valued by their cost, whether purchase price or production cost, reduced by the corresponding accumulated amortization and losses from any impairment which, where appropriate, has occurred.

The depreciable amount of an intangible asset is allocated on a systematic basis over its useful life. The amortisation charge for each period is recognised in profit or loss.

Research and Development Costs

Capitalized research and development costs are specifically individualized for projects and their costs are clearly established so they can be spread over time. Similarly, Management the Group has substantial grounds for expecting the technical success and the financial and commercial profitability of these projects

Research and development costs that appear as assets are amortized on a straight-line basis over their useful life, at an annual rate of 20%, and always within a period of 5 years.

As soon as there are reasonable doubts over the technical success or financial and commercial profitability of a project, the values recorded in the asset that apply to it are directly allocated to the financial year's losses.

Computer Applications

Licenses for computer applications purchased from third parties are capitalized on the basis of the costs incurred for purchasing.

Computer applications are amortized on a straight-line basis throughout their useful lives, at an annual rate of 33%.

Maintenance expenses for computer applications incurred during the financial year are recognized in the Consolidated Profit and Loss Account.

Industrial Property

Corresponds to the capitalized development expenses for which the relevant patent or similar has been obtained, and includes the registration and formalization costs for the industrial property, as well as the costs for purchasing the corresponding rights from third parties.

During all these years, the Group has been able to develop methods and unique technologies in its sector by continuous investment in research and development. The result of this effort has been the publication of patents at European, American and PCT levels, putting in value the effort developed during these last years. These patents allow the Group to license this technology to third parties and protect it against possible copies of other actors in the sector, less scrupulous when creating original models.

c) Tangible Fixed Assets

Tangible fixed assets are valued by their acquisition price or production cost, net of the corresponding accumulated amortization and, where appropriate, of the accumulated value of the recognized allowances for impairment.

Repair and maintenance expenses incurred during the financial year are debited in the Consolidated Profit and Loss Account. Costs for renovating, extending or improving intangible fixed assets, representing an increase in capacity, productivity or lengthening of useful life, are capitalized as a higher value of the corresponding assets, once the book values of the replaced items have been de-recognized.

Tangible fixed assets, net of their residual value, where appropriate, are amortized by a straight-line-basis distribution of the various items that constitute these fixed assets over the years of estimated useful life making up the period in which the Group hopes to use them, according to the following table:

	Annual Percentage	Estimated Years of Useful Life
Buildings	2,50	40
Technical facilities	8 - 10	12,50 - 10
Machinery	20 - 25	5 - 4
Other installations	10	10
Furniture	10 - 15	10 - 6,67
Computer equipment	25 - 50	4 - 2
Other tangible fixed assets	15	6,67

The book value of a tangible fixed-asset item is de-recognized in the accounts through its alienation or disposal by other means; or where no future economic benefits or profits are expected to be obtained for its use, alienation or disposal by other means.

The loss or profit resulting from writing-off a tangible fixed-asset item is determined as the difference between the net values, where appropriate, of the sales costs resulting from its alienation or disposal by other means, where available, and the item's book value, and is allocated to the Consolidated Profit and Loss Account for the financial year in which this occurs.

At the financial year's closure, the Group, assesses whether there are signs of impairment in a tangible fixed-asset item or any cash-generating unit, in which case the recoverable amounts are estimated and the necessary allowances are made.

An impairment loss is deemed to have occurred in a tangible fixed-asset item where its book value exceeds its recoverable value, this being understood as the higher value between its fair value less the sales costs and its value in use.

Allowances for impairment in the tangible fixed-asset items, as well as their reversals where the circumstances producing them cease, are recognized as an expense or income respectively in the Consolidated Profit and Loss Account.

d) Leases and Other Transactions of a Similar Nature

Operating-lease expenses incurred during the financial year are debited in the Consolidated Profit and Loss Account.

e) Financial Instruments

The Group determines the classification of its financial assets on their initial recognition and, where permitted and appropriate, this classification is re-assessed on each closing of the consolidated balance sheet.

Financial instruments, for the purposes of their valuation, are classified in any of the following categories:

Loans and Receivable Items and Debts and Payable Items

Loans and Receivable Items

The following are classified under this category:

- a) Trade credits: financial assets arising from the sale of assets and the provision of services for commercial transactions, and
- b) Non trade credits: financial assets which, being neither equity instruments nor derivatives, have no commercial origins, whose payments are for a fixed or determinable amount, and which are not traded in an active market. They do not include those financial assets for which the Group cannot recover substantially all the initial investments, owing to circumstances unrelated to credit impairment. The latter are classified as available for sale.

Debts and Payable Items

The following are classified under this category:

- a) Trade debts: financial debts arising from the purchase of assets and services through commercial transactions, and
- b) Non trade debts: financial liabilities which, not being derivative instruments, have no commercial origins.

Initially, financial assets and liabilities included in this category are valued by their fair value, which is the price of the transaction and which is equivalent to the fair value of the consideration paid plus the transaction costs which are directly attributable to it.

Notwithstanding what is stated in the above paragraph, loans and debts through commercial transactions with a maturity not greater than one year and which do not have a contractual rate of interest, as well as, where appropriate, advances and loans made to staff, receivable dividends and called payments on equity instruments, the amounts for which are expected to be received in the short term, and payments called by third parties on holdings, the amounts for which are expected to be paid in the short term, are valued by their nominal value where the effect of not updating the cash flows is of no significance.

In subsequent valuations, both assets and liabilities are valued by their amortized cost. Accrued interest is recognized in the Consolidated Profit and Loss Account by applying the effective interest rate method. Notwithstanding the above, loans and debts with a maturity no greater than one year which are initially valued by their nominal value, remain valued by this amount unless, in the case of loans, they have been impaired.

At the year end, the necessary allowances are made where there is objective evidence of value of a credit having been impaired, i.e. where there is evidence of a reduction or delay in estimated future cash flows corresponding to that asset.

An impairment loss in the value of loans and receivable sums corresponds to the difference between their book value and the current value of the estimated future cash flows to be generated, deducted at the effective interest calculated on their initial recognition.

Allowance for impairment of debts as of December 31, 2018, has been estimated on the basis of the analysis made on each of the individualized outstanding receivables on that date.

De-recognition of Financial Assets

A financial asset, or part of it, is de-recognized where the contractual rights over the cash flows of the financial asset have expired or been assigned, and the risks and benefits attaching to its ownership have been substantially transferred.

De-recognition of Financial Liabilities

A financial liability is de-recognized where the corresponding obligation ceases.

Interest Received from Financial Assets

Interest from financial assets accrued subsequent to their purchase are recognized as income in the Consolidated Profit and Loss Account.

Interests are recognized by using the effective interest rate method. For these purposes in the initial valuation of the financial assets, both the value of the explicit interest, accrued and non-matured at that time, and the value of the dividends agreed to by the competent body on acquisition, are recognized independently, bearing in mind their maturity.

Guarantees Given

Guarantees given and received through operating leases and provision of service are valued by the amount paid out and received respectively.

f) Transactions in Foreign Currencies

Transactions in foreign currencies are recognized by their exchange value in Euros, by using the spot exchange-rate for the dates on which they occur.

On the close of each financial year, monetary items are valued by applying the average spot exchange-rate on that date. Exchange differences, both positive and negative, which result from this process, as well as those generated on selling off equity items, are recognized in the Consolidated Profit and Loss Account for the financial year in which they arise.

g) Profit Tax

Profit tax is recognized in the Consolidated Profit and Loss Account or directly in the Consolidated Equity depending on where the gains or losses giving rise to it are recognized. Profit tax for each financial year includes both current and deferred taxes, where appropriate.

The current tax amount is the sum to be paid by the companies as a result of the assessment notices for the tax.

Differences between the book value of assets and liabilities, and their tax base, generate the deferred tax asset or liability tax balances which are calculated using the expected tax rates at the time of their reversal, and under the method in which it can be reasonably expected to recover or pay the asset or liability.

Variations arising during the financial year in deferred tax asset or liability are recognized either in the Consolidated Profit and Loss Account or directly in the Consolidated Equity, as appropriate.

Deferred tax assets are only recognized insofar as it is probable that the company will have future tax gains that allow these assets to be applied.

In each closing balance sheet the book value of the recognized deferred tax assets is analyzed and the necessary adjustments are made insofar as there are doubts over their future tax recoverability. Likewise, in each closing non-recognized deferred taxes are assessed in the balance sheet and these are subject to recognition to the extent that their recovery with future tax benefits is probable.

h) Income and Expenses

Income and expenses are allocated according to the accrual basis, i.e. where the real flow of goods and services occurs which these represent, irrespective of when the monetary or financial flow deriving from them occurs.

Income resulting from the sale of goods and provision of services is valued by the fair value of the consideration, received or to be received, that derives from these, which, unless there is evidence to the contrary, is the agreed price for these goods or services, less the amount of any discount, reduction or other similar items, as well as the interest incorporated into the face value of the credits.

Income from services is recognized when the result of the transaction can be estimated reliably, considering the percentage of completion of the service at the year-end date. Consequently, only income from the provision of services is accounted for when all and each of the following conditions:

- a) The amount of the income can be reliably valued.
- b) It is probable that the Group receives financial benefits or profits arising from the transaction.
- c) The extent of the transaction carried out, on the date of closure of the financial year, can be reliably valued, and
- d) The costs already incurred in the service's provision, as well as those that are yet to be incurred up to its completion, can be reliably valued.

i) Provisions and Contingencies

Debentures existing at the close of the financial year, resulting from past events which may occasion loss in equity for the Group, and whose value and time of cancellation are indeterminate, are recognized on the consolidated balance sheet as provisions and are valued by the current value of the best possible estimate for the amount necessary to cancel the obligation or transfer it to a third party.

j) Grants, Donations and Legacies

Non-refundable capital grants, as well as donations and legacies, are valued by the fair value of the amount granted or of the goods received. They are initially allocated directly as income in the Consolidated equity and recognized in the Consolidated Profit and Loss Account in proportion to the amortization undergone over the period by the assets financed through these grants, unless these are non-depreciable assets, in which case they will be allocated to the earnings of the financial year in which their alienation or de-recognition takes place.

Grants intended for cancelling debts are allocated as income for the financial year in which the cancellation occurs, unless they are received for a specific financing, in which case the allocation is made according to the item that is financed.

Refundable grants are recognized as long-term debt convertible into subsidies until they become non-refundable.

Operation grants are credited to the earnings of the financial year when they accrue.

k) Related-Party Transactions

In general, items forming the subject matter of a related-party transaction are initially recognized by their fair value. The subsequent valuation is made in accordance with the provisions laid down in the corresponding regulations.

l) Cash-Flow Statements

Cash-flow statements use the following expressions according to the meanings given below:

Cash and Equivalents: Cash is both cash in hand and demand deposits. Cash equivalents are financial instruments forming part of the Group's normal cash management, are convertible into cash, have initial maturities no greater than three months and are subject to little significant risk of change in their value.

Cash Stream-flows: inflows and outflows of cash or other equivalent resources, with the latter being understood as investments having terms under three months, high liquidity and low risk of changes in value.

Operating Activities: these are the activities that make up the principal source of the Group's ordinary income, as well as other activities that cannot be classified under investment or financing.

Investment Activities: acquisition, alienation or disposal by other means of long-term assets and other investments not included in cash or cash equivalents.

Financing Activities: activities that lead to changes in the size and composition of the equity and financial liabilities.

NOTE 11. INFORMATION ON THE NATURE AND LEVEL OF THE RISK FROM FINANCIAL INSTRUMENT

Group activities are exposed to various types of financial risk, most especially credit, liquidity and market risks (exchange rate, interest rate and other price risks).

11.1) Credit Risk

The Group's main financial assets are cash and cash balances, trade and other receivables and investments, which represent the Group's maximum exposure to credit risk in relation to financial assets.

The Group's credit risk is attributable mainly to its commercial debts. The amounts are reflected in the net balance of provisions for bad debts, estimated by the Parent Company's management based on the experience of previous years and its assessment of the current economic environment.

11.2) Liquidity Risk

The general situation of financial markets, especially the banking market, has been particularly unfavourable for credit claimants. The Group pays constant attention to the evolution of the different factors that can help to solve liquidity crises, and especially to the sources of financing and their characteristics.

11.3) Market Risk

The general market situation during the last years has been unfavourable due to the difficult economic situation of the environment.

11.4) Exchange Rate Risk

The Group is not exposed to a significant exchange rate risk and therefore does not trade in hedging instruments.

11.5) Interest Rate Risk

Changes in interest rates modify the fair value of assets and liabilities bearing a fixed interest rate as well as the future flows of assets and liabilities referenced to a variable interest rate.

The objective of interest rate risk management is to achieve a balance in the debt structure that will minimize the cost of debt over the multiannual horizon with a reduced volatility in the Profit and Loss Account.

Tax Situation

In accordance with current legislation, tax payments cannot be considered final until they have been inspected by the tax authorities, or until the statute barring period of four years has passed. In consequence, for the purposes of subsequent inspections, liabilities may arise additional to those recorded by the Group.

As of December 31, 2018, the Group has open to tax inspection all the taxes to which it is subject from the financial year 2013 to the 2018 financial year. Consequently, as a result of possible inspections, additional liabilities could arise to those registered by the Group. However, the Directors of the Parent Company and its tax advisors consider that such liabilities, if they occur, would not be significant on the annual accounts taken as a whole.

AND SUBSIDIARIES

CONSOLIDATED DIRECTORS' REPORT FOR
THE FINANCIAL YEAR 2018

GROUP LLEIDANETWORKS SERVEIS TELEMÀTICS, S.A.
AND SUBSIDIARIES

CONSOLIDATED DIRECTORS' REPORT FOR
THE FINANCIAL YEAR 2018

In compliance with the provisions of the Corporations Law, the directors present below the management report for the year, in order to complement, expand and comment on the balance sheet, the profit and loss account and the report corresponding to fiscal year 2018.

1. EVOLUTION OF RESULT AND NET TURNOVER

For the company, 2018 was a year with significant growth rates in both sales and EBITDA.

Sales have grown in the SaaS line by 17%, consolidating Lleida.net as a reference in the contracting and notification sector. The continuous investment in R&D processes has allowed us to expand the range of services offered, as well as to improve the existing ones. The diversity of the range of products and the adaptability of the company to the needs of customers has allowed it to reach new customers and develop standard products for lower volume customers.

Internally developed processes are patented globally and create entry barriers to competition. Additionally, the European homologation of electronic delivery products certified by EIDAS, opens a range of possibilities at European level, Lleida.net being the only Spanish company that has the homologation and the Sixth at European level.

The business line that has grown the most this year is the line of SMS solutions for Wholesale. With a growth rate of 50%, which represents an increase of almost 2.2 million euros over the previous year, reflects that Lleida.net has become a key player in the sector. The technology developed internally has allowed to take advantage of business opportunities. The new international destination routes negotiated by the team have turned Lleida.net into a reference company within the market.

<i>Sales by business line - Thousand of euros</i>	2017	2018	Var. €	Var.%
SaaS Services	2.660	3.116	456	17%
SMS Solutions	2.827	2.668	-159	-6%
ICX WHOLESALE Solutions	4.394	6.575	2.181	50%
Total	9.881	12.359	2.478	25%

Data in thousand of euros	2017	2018	Var. €	Var.%
Sales	9.882	12.359	2.477	25%
Cost of sales	(4.638)	(6.335)	1.697	37%
Gross Margin	5.244	6.024	780	15%
Payroll	(2.242)	(2.443)	201	9%
External Services	(2.449)	(2.515)	66	3%
Other results	22	26	4	18%
Activations	849	787	(62)	-7%
EBITDA	1.424	1.879	455	32%
Amortizations	(1.078)	(1.152)	74	7%
Indemnities	(77)	(198)	121	157%
Profit from operations	269	529	260	97%
Financial Net Result	(114)	(84)	(30)	-26%
Impairment and gains or losses on dispos:	0	(17)	17	
Exchange Rate Difference	(96)	(16)	(80)	-83%
Profit before tax	59	412	353	598%

The Gross Margin has increased 15%, 780 compared to 2017, due to the increase in sales. The gross margin on sales stands at 49% while in 2017 it was 53%. The decrease is caused by the greater weight of Wholesale SMS sales over total sales.

In 2018, the company made a strong effort to attract talent. The average workforce has increased by 10 people, representing 19% over the previous year and has led to a 9% increase in cost. The main areas reinforced were the R&D&I department with the incorporation of personnel with higher degrees and the constitution of the compliance and Intellectual Properties departments.

External services expenses rose by 66 thousand euros this year, mainly due to the necessary consultancy and audit costs to obtain EIDAS approval and the costs of incorporating Lleida.net shares into trading on Euronext Growth in Paris. Additionally, an R&D collaboration amounting to more than 100 thousand euros has been allocated.

EBITA amounted to 1.9 million euros, accounting for 15.2% of sales, deriving both from the increase in sales and from more exhaustive cost control. Following the criterion of prudence, the group has opted to activate a lower amount of R&D activities in order to avoid possible fiscal contingencies, although the pace of R&D expenditure is maintained. This is the tenth quarter that the Group has positive EBITDA.

The company's result increased by 260.000 euros, an increase of 97%.

2. EVENTS AFTER THE BALANCE SHEET DATE

Subsequent to December 31, 2018 and up to the date of preparation of this Directors' Report, there have been no subsequent events, in addition to those already mentioned in the Notes to the annual accounts, which highlight circumstances that already existed at 31 December 2018 and which, due to the importance of their economic impact, should lead to adjustments in the financial statements or modifications to the information contained in the Explanatory Notes.

Nor are there any subsequent events, other than those already mentioned in the Explanatory Notes, that demonstrate conditions that did not exist at December 31, 2018 and that are of such importance that they require additional information in the Explanatory Notes to the annual accounts.

3. PROBABLE EVOLUTION OF THE GROUP

The forecasts for 2019 are to increase the company's gross margin by amounts, reinforcing sales of certified products through the consolidation of products at an international level.

4. RESEARCH ACTIVITIES

In 2018, the Company invested 787 thousand euros in research activities aimed mainly at the company's certification line.

5. OPERATIONS WITH OWN SHARES

In accordance with the regulations of the Alternative Stock Market, the company signed a liquidity agreement with the placing bank as part of its market launch. This agreement establishes both the delivery of a certain amount of own shares and the deposit of an amount of cash. The objective of this contract is to allow investors to trade the company's shares, ensuring that any interested person has the possibility of buying or selling shares.

The Board of Directors on August 12, 2016 approved the acquisition of own shares with a maximum amount of 200 thousand euros. The programme was extended until 12 August 2018 following the agreement of the Board of Directors on August 7, 2017.

At 31 December 2018, the company held 992,257 shares with a valuation on that date of 930,068.51 euros, representing 6.18% of the shares of Lleidanetworks Serveis Telemàtics, S.A.

6. FINANCIAL INSTRUMENTS

During 2018, the Company has not used instruments related to financial derivatives.

7. DEFERMENT OF PAYMENT TO SUPPLIERS

The information relating to deferrals of payment to suppliers is shown in the consolidated annual accounts in Note 10.

**Audit report on the financial statements
Issued by an independent auditor**

To the Shareholders of **LLEIDANETWORKS SERVEIS TELEMÀTICS, S.A.:**

Opinion

We have audited the financial statements of **LLEIDANETWORKS SERVEIS TELEMÀTICS, S.A.** (the Company), which comprise the balance sheet at December 31, 2018, the income statement, the statement of changes in equity, the statement of cash flows and the notes to the financial statements for the year then ended.

In our opinion, the accompanying financial statements give, in all material respects, a true and fair view of the Company's equity and financial position at December 31, 2018, as well as its results and cash flows for the financial year ending on said date, in accordance with the application of the regulatory framework of financial information (identified in note 2.a of the annual report) and, in particular, with the accounting principles and criteria contained therein.

Basis of opinion

We have performed our audit in accordance with the regulations governing the auditing of accounts in force in Spain. Our responsibilities under these standards are described below in the section on the *auditor's responsibilities for the audit of the annual accounts* in our report.

We are independent from the Company in accordance with the ethical requirements, including those of independence, which are applicable to our audit of the financial statements in Spain as required by the regulations governing the activity of auditing accounts. Accordingly, we have not provided services other than those of the audit of accounts nor have concurred situations or circumstances that, in accordance with the provisions of the aforementioned governing regulations, have compromised the necessary independence.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Key audit issues

The key audit matters are matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. Our audit procedures relating to these matters were designed in the context of our audit of the financial statements as a whole, and in the formation of our opinion on these and we do not express a separate opinion on those matters.

Key audit issues	Audit response
<p>Valuation of capitalized research expenditures</p> <p>As described in notes 4.a. and 5 to the accompanying notes, the Company has intangible assets for expenses on capitalised research projects of a significant amount. These expenses must be specifically individualised by project and have reasons of economic-commercial profitability, among other requirements in order to be capitalized in the Company's balance sheet. In addition, the evaluation by the Company's management and directors of their recoverable value or the need for impairment involves value judgements and estimates. For these reasons, we have considered the valuation of these assets as a key issue in our audit.</p>	<p>We have carried out the following audit procedures, among others:</p> <ul style="list-style-type: none">- Understanding of the policies and procedures applied by the Company for the capitalization of research expenses.- We have analysed the activations of the projects during the year, obtaining evidence such as the hours and cost of the same incurred by the workers in the different projects and the cost of external collaborations.- We have obtained the certificates issued by an independent third party on the projects regarding the validity of the capitalised amounts.- We have obtained a detail of the book value of the research expenses individualized by projects, and analysed the sales projections for the different projects, profitability and real sales for the year, goodness of the data, the reasonableness of the hypotheses, the degree of compliance to date, revision of the arithmetic calculation, analysis of the discount rate, sensitivity to the variation of hypothesis and deviations in past estimates in order to evaluate the reasonableness of the recoverable value of the research expenses.- We have verified the correct amortization of the different projects capitalised on the basis of the current regulations applied by the Company.- Finally, we have verified that the notes to the accompanying annual accounts include the disclosures of related information required by the applicable financial reporting framework. In this regard, Notes 4.a and 5 of the attached report include the aforementioned information breakdowns.

Valuation of investments, loans and balances with group companies

As described in notes 4.d, 8, 9 and 19 to the accompanying notes to the financial statements, investments in group companies together with the balances of group customers balances and other loans represent, on an aggregate basis, 16.62% of the Company's total assets.

We focus on this area, due to the amount of its net book value over the total assets of said investments, credits and balances, and because the evaluation by the management and the administrators of the Company of its recoverable value implies the execution of value judgments and important estimates, mainly on the results, discount rate, calculation methodology, and future flows of the investee companies.

For these reasons, we have considered the valuation of investments and loans with group companies as a key issue in our audit.

We have carried out, among others, the following audit procedures:

- Understanding of the policies and procedures applied by the Company regarding the valuation of investments and group balances.
 - We have analysed the evolution of the holdings, loans and balances of the various subsidiaries during the year as well as their indications of impairment.
 - We have analysed the situation of the different subsidiaries, comparing the actual results for 2018 with the figures included in the forecasts for the previous year in order to assess the degree of compliance with them.
 - Based on the actual results for 2018, we have questioned the corresponding adaptation, if any, of future flows in this year's forecasts.
 - We have questioned the assumptions used by the Company's management in the forecasts used in terms of growth rates and discount rates applied in relation to its sector.
 - We have evaluated the need for impairment based on recoverability estimates and analysis of impairments recorded by the Company.
 - Finally, we have verified that the notes to the accompanying annual accounts include the disclosures of related information required by the applicable financial reporting framework. In this regard, Notes 4 d), 8, 9 and 19 of the attached report include the aforementioned information breakdown.
-

Application of the going concern principle

Due to the fact that the Company has historically presented negative working capital and given the degree of indebtedness that the Company maintains at year-end and which represents 38% of its liabilities, (40% in 2017), it is necessary for the Company to comply with its business plan, as well as to obtain new financing through new loans and renewal of credit policies. During the financial year 2018, as well as during the financial year 2019, up to the date of this report, the Company is generating positive cash flow and the renewal of policies is taking place. The net financial debt has gone from 2.639 thousand Euros in 2017 to 2.272 thousand Euros in 2018, it means a decrease of 14% in one fiscal year.

These circumstances are causing and mitigating factors of doubt regarding the application of the going concern principle in the formulation of annual accounts, whose evaluation involves value judgements and estimates. For these reasons, we considered the application of the going concern principle as a key issue in our audit.

We have carried out, among others, the following audit procedures:

- Understanding of the policies and procedures applied by the Company in the estimation process of the Business Plan and Treasury Budget.
- Obtaining the Business Plan and Treasury Budget prepared by the Company's Management.
- Obtaining supporting documentation relating to both the taking out of new loans and the renewal of credit policies at maturity.
- We have analysed the reasonableness of the estimates and assumptions of the Business Plan and Treasury Budget, made by the Company's directors, through meetings with management and verification of contrastable data, both of the key hypotheses used, as well as concordance of these with those used in previous periods by the Company.
- We have evaluated the goodness of the forecasts of the Direction comparing the deviations and reasons of these between the budgeted figures and the real ones corresponding to the last fiscal years.
- We have analysed the degree of compliance with both the Business Plan and the Treasury Budget based on 2018 figures, and we have analysed the financial situation to date.
- Finally, we have verified that the notes to the accompanying annual accounts include the disclosures of related information required by the applicable financial reporting framework. In this regard, note 2.d of the attached report includes the aforementioned breakdown of information.

Other information: Management report

The other information comprises exclusively the management report for the financial year 2018, the formulation of which is the responsibility of the Parent's directors and does not form an integral part of the financial statements.

Our audit opinion on the annual accounts does not cover the annual report. Our responsibility over the management report, in accordance with what is required by the regulations governing the audit activity, consists of evaluating and reporting on the consistency of the management report with the financial statements, based on the knowledge of the Entity obtained in performing the audit of the aforementioned accounts and without including information other than that obtained as evidence during the same. Likewise, our responsibility is to evaluate and report that the content and presentation of the management report are in accordance with the applicable regulations. If, based on the work we have performed, we conclude that there are material misstatements, we are obliged to report this.

Based on the work performed, as described in the preceding paragraph, the information contained in the management report agrees with that in the consolidated financial statements for financial year 2018 and its content and presentation are in accordance with the applicable regulations.

The responsibility of the management and the audit in the respect committee of the financial statements

The administrators are responsible for formulating the accompanying financial statements so that they give a true image of the equity, the financial situation and the results of the Company, in accordance with the regulatory framework on financial information applicable to the Entity in Spain, and of the internal control that they consider necessary to allow the preparation of the financial statements free of material misstatement, due to fraud or error.

In the preparation of the financial statements, the administrators are responsible for assessing the Company's ability to continue as a going concern, revealing, as appropriate, the matters related with a company in operation and using the accounting principle of a going concern except if the management intend to liquidate the Company or cease operations, or if there is no other realistic alternative.

The audit committee is responsible for supervising the preparation and presentation of the financial statements.

The auditor's responsibility for the audit of the financial statements

Our objectives are to obtain reasonable assurance that the financial statements as a whole are free from material misstatement, due to fraud or error, and to issue an audit report that contains our opinion.

Reasonable assurance is a high level of assurance, but it does not guarantee that an audit conducted in accordance with the regulations governing the audit activity in force in Spain will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the regulations governing the account auditing activity in Spain, we exercise professional judgment and maintain an attitude of professional scepticism throughout the entire audit. Also:

- We identify and assess the risks of material misstatement in the financial statements, due to fraud or error, design and perform audit procedures to respond to those risks and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or circumvention of internal control
- We identify and assess risks of material misstatement of the annual accounts due to fraud or error, design and implement audit procedures to respond to such risks and obtain sufficient and appropriate audit evidence to provide a basis for our opinion. The risk of not detecting a material misstatement due to fraud is higher than in the case of a material misstatement due to error, as fraud can involve collusion, forgery, deliberate omissions, intentional misrepresentations, or the circumvention of internal control.
- We obtain knowledge of the internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, and not for the purpose of expressing an opinion on the effectiveness of the internal control of the Entity.
- We evaluate the appropriateness of accounting policies used and the reasonableness of the accounting estimates and disclosures by the Administrators.
- We conclude whether the use, by the administrators, of the accounting principle of the Company as a going concern is adequate and, based on the audit evidence obtained, we conclude on whether or not there is material uncertainty related to events or conditions that can generate significant doubts about the ability of the Company to continue as a going concern. If we conclude that there is material uncertainty, we are required to draw attention in our audit report to the corresponding information disclosed in the financial statements or, if such disclosures are not adequate, we express a modified opinion. Our conclusions are based on the audit evidence obtained at the date of our audit report. However, future events or conditions may cause the Company to cease to be a going concern.
- We evaluate the overall presentation, structure and content of the financial statements, including the disclosures and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We are required to communicate with the audit committee regarding, amongst other matters, the planned scope and timing of the audit and significant findings, including any significant deficiencies in internal control that we identify during the course of the audit.

We also required the audit committee of the Company with a statement that we have complied with the relevant ethical requirements, including those of independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Among the matters that have been communicated to the audit committee, we determine those that have been of the greatest significance in the audit of the financial statements for the current period and that are, consequently, the key issues of the audit.

We describe these matters in our audit report unless legal or regulatory provisions prohibit public disclosure of the matter.

Report on other legal and regulatory requirements

Additional report to the Audit Committee

The opinion expressed in this report is consistent with that expressed in our additional report to the Parent's Audit Committee dated April 9, 2019.

Contract period

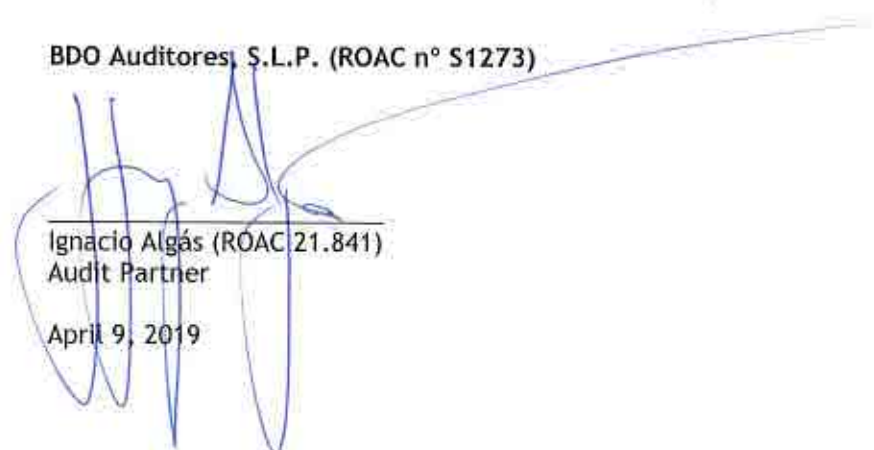

The Extraordinary General Shareholders' Meeting held on June 13, 2016 appointed us as the Company's auditors for a period of three years, starting from the year ended December 31, 2016.

Previously, we were appointed by resolution of the General Shareholders' Meeting for the three-year period and we have been auditing the accounts uninterruptedly since the year ended December 31, 2007, and the Company has been a Public Interest Entity (PIE) since 2015.

Services provided

The services, other than the audit of accounts, provided to the Company are detailed in Note 20 to the consolidated financial statements.

NOTE 2. BASIS OF PRESENTATION OF ANNUAL ACCOUNTS

a) True and Fair View

The Annual Accounts for the financial year 2018 have been taken from the Company accounting records and drawn up in accordance with the applicable commercial law currently in force and with the standards established in the General Accounting Plan approved by Spanish Royal Decree 1514/2007, of 16 November, applying the modifications introduced by Royal Decree 1159/2010, to show a true and fair view of the Company assets and liabilities, financial position and earnings, as well as the accuracy of the cash flows included in the cash flow statement.

b) Accounting Principles Applied

The Annual Accounts have been drawn up by applying the accounting principles established in the Spanish Commercial Code and in the General Accounting Plan.

c) Presentation Currency

In accordance with the applicable laws and regulations on accounting, the annual accounts are expressed in Euros.

d) Critical Aspects of Uncertainties Valuation and Estimation

In preparing the accompanying Annual Accounts, the Board of Directors used estimates to value certain assets, liabilities, income and expenses recorded therein. The estimates and criteria refer to:

- Evaluation of the operating principle:
 - o The Company has historically presented negative working capital and given the degree of indebtedness that the Company maintains at year-end and which represents 38% of its liabilities (40% in 2017), it is necessary for the Company to comply with its business plan, as well as to obtain new financing through new loans and renewal of credit policies. During 2018 and 2019, up to the date of preparation of these financial statements, the Company is generating positive cash flows and credit lines are being renewed. The net financial debt has gone from 2.639 thousand Euros in 2017 to 2.272 thousand Euros in 2018, it means a decrease of 14% in one fiscal year.

- Possible impairment of assets: investments, loans and balances with group companies (Note 4-d):
 - o At 31 December 2018, the Company has significant balances receivable from Group companies (see Note 19.1), the recovery of which will be linked to the generation of cash by the subsidiaries. On the basis of the budgets established by management, the Company's Board of Directors estimates that all the Group company receivables on the Company's balance sheet will be recovered.

Except as mentioned in the preceding paragraphs, there are no uncertainties or aspects of the future that could entail a significant risk that could lead to significant changes in the value of assets and liabilities in the following year, except for those inherent to the nature of the business:

- Slower growth than expected in the Business Plan: slower maturation in some countries.
- Reasonability of the activation and recoverability of research projects.
- Currency risk, although the Company has a natural hedge with revenues and costs in foreign subsidiaries denominated in the same currency.
- Highly atomised and locally competitive market.

Although these estimates have been made on the basis of the best information available at the close of financial year 2018, it is possible that events that may take place in the future will make it necessary to modify them (upwards or downwards) in coming years, which would be done prospectively, recognising the effects of the change in the estimate in the corresponding profit and loss account.

e) Comparison of the Information

In accordance with commercial law, for comparison purposes, the Board of Directors presents, in addition to the figures for the financial year 2018, for each of the items in the Balance Sheet, Profit and Loss Accounts, the Statement of Changes in Equity and the Cash-Flow Statement, the figures for the previous financial year. The items for both financial years are comparable and homogeneous.

f) Changes in Accounting Standards

There have been no changes in the accounting standards

g) Correction of Errors

The 2018 Annual Accounts do not include related adjustments as a result of errors detected in the annual accounts of previous years.

h) Responsibility for the Information Given and the Estimates Made

Board of Directors is responsible for the information provided in these annual accounts. These annual accounts have used estimates valuing some of the assets, liabilities, income, expenses and undertakings recorded there. These estimates basically refer to the valuation of losses due to the impairment of specific assets and the useful life of tangible and intangible assets.

Notwithstanding that these estimates were made according to the best information available at the time of the preparation of these annual accounts, it is possible that future events may occur that require their amendment for the next financial years; which would be carried out prospectively, taking account of the effects of the estimate change on the corresponding profit and loss accounts.

i) Statement of Recognized Income and Expenses

The Company has recognized no income nor expense directly to the Equity nor in the current financial year neither in the last one, having registered the totality of them in the corresponding Profit and Loss Account. This is why the current Annual Accounts does not include the Statement of Recognized Income and Expenses.

NOTE 3. DISTRIBUTION OF EARNINGS

The proposed distribution of 2018 and 2017, drawn up by the Board of Directors are shown below, in Euros:

	2018	2017
Distribution base:		
Profits obtained/ (Generated losses) in the financial year	(208.753,80)	(252.893,09)
Distribution to:		
Compensation of previous years losses	(208.753,80)	(252.893,09)

The unamortised balances of research and development expenses totalled 2.702.887,98 euros in 2018 (2.827.141,69 euros in 2017). Since the total available reserves are less than this amount, the Company may not distribute any dividends in accordance with current mercantile legislation.

NOTE 4. RECOGNITION AND VALUATION STANDARDS

The principal standards used by the Company in the drafting of its Annual Accounts for the 2018 financial year, in accordance with those established by the General Accounting Plan, were as follows:

a) Intangible Fixed Assets

Assets included in intangible fixed assets are valued by their cost, whether purchase price or production cost, reduced by the corresponding accumulated amortization and losses from any impairment which, where appropriate, has occurred.

The depreciable amount of an intangible asset is allocated on a systematic basis over its useful life. The amortization charge for each period is recognized in profit or loss.

Research and Development Costs

Capitalized research and development costs are specifically individualized for projects and their costs are clearly established so they can be spread over time. Similarly, Management the Group has substantial grounds for expecting the technical success and the financial and commercial profitability of these projects

Research and development costs that appear as assets are amortized on a straight-line basis over their useful life, at an annual rate of 20%, and always within a period of 5 years.

As soon as there are reasonable doubts over the technical success or financial and commercial profitability of a project, the values recorded in the asset that apply to it are directly allocated to the financial year's losses.

Computer Applications

Licenses for computer applications purchased from third parties are capitalized on the basis of the costs incurred for purchasing.

Computer applications are amortized on a straight-line basis throughout their useful lives, at an annual rate of 33%.

Maintenance expenses for computer applications incurred during the financial year are recognized in the Consolidated Profit and Loss Account.

Industrial Property

Corresponds to the capitalized development expenses for which the relevant patent or similar has been obtained, and includes the registration and formalization costs for the industrial property, as well as the costs for purchasing the corresponding rights from third parties.

During all these years, the Company has been able to develop methods and unique technologies in its sector by continuous investment in research and development. The result of this effort has been the publication of patents at European, American and PCT levels, putting in value the effort developed during these last years. These patents allow the Group to license this technology to third parties and protect it against possible copies of other actors in the sector, less scrupulous when creating original models.

b) Tangible Fixed Assets

Tangible fixed assets are valued by their acquisition price net of the corresponding accumulated amortization and, where appropriate, of the accumulated value of the recognized allowances for impairment.

Repair and maintenance expenses incurred during the financial year are debited in the Profit and Loss Account. Costs for renovating, extending or improving intangible fixed assets, representing an increase in capacity, productivity or lengthening of useful life, are capitalized as a higher value of the corresponding assets, once the book values of the replaced items have been de-recognized.

Tangible fixed assets, net of their residual value, where appropriate, are amortized by a straight-line-basis distribution of the various items that constitute these fixed assets over the years of estimated useful life making up the period in which the Group hopes to use them, according to the following table:

	Annual Percentage	Estimated Years of Useful Life
Buildings	2,50	40
Technical facilities	8 - 10	12,50 - 10
Machinery	20 - 25	5 - 4
Other installations	10	10
Furniture	10 - 15	10 - 6,67
Computer equipment	25 - 50	4 - 2
Other tangible fixed assets	15	6,67

The book value of a tangible fixed-asset item is de-recognized in the accounts through its alienation or disposal by other means; or where no future economic benefits or profits are expected to be obtained for its use, alienation or disposal by other means.

The loss or profit resulting from writing-off a tangible fixed-asset item is determined as the difference between the net values, where appropriate, of the sales costs resulting from its alienation or disposal by other means, where available, and the item's book value, and is allocated to the Consolidated Profit and Loss Account for the financial year in which this occurs.

At the financial year's closure, the Company assesses whether there are signs of impairment in a tangible fixed-asset item or any cash-generating unit, in which case the recoverable amounts are estimated and the necessary allowances are made.

An impairment loss is deemed to have occurred in a tangible fixed-asset item where its book value exceeds its recoverable value, this being understood as the higher value between its fair value less the sales costs and its value in use.

Allowances for impairment in the tangible fixed-asset items, as well as their reversals where the circumstances producing them cease, are recognized as an expense or income respectively in the Profit and Loss Account.

c) Leases and Other Transactions of a Similar Nature

Operating-lease expenses incurred during the financial year are debited in the Profit and Loss Account.

d) Financial Instruments

The Company determines the classification of its financial assets on their initial recognition and, where it is permitted and appropriated, this classification is re-assessed on each closing balance sheet.

Financial instruments, for the purposes of their valuation, are classified in any of the following categories:

Loans and Receivable Items and Debts and Payable Items.

Loans and receivable items

The following are classified under this category:

- a) Trade credits: financial assets arising from the sale of assets and the provision of services for commercial transactions, and
- b) Non trade credits: financial assets which, being neither equity instruments nor derivatives, have no commercial origins, whose payments are for a fixed or determinable amount, and which are not traded in an active market. They do not include those financial assets for which the Company cannot recover substantially all the initial investments, owing to circumstances unrelated to credit impairment. The latter are classified as available for sale.

Debts and payable items

The following are classified under this category:

- a) Trade debts: financial debts arising from the purchase of assets and services through commercial transactions, and
- b) Non trade debts: Financial liabilities which, not being derivate instruments, have no commercial origins

Initially, financial assets and liabilities included in this category are valued by their fair value, which is the price of the transaction and which is equivalent to the fair value of the consideration paid plus the transaction costs which are directly attributable to it.

Notwithstanding what is stated in the above paragraph, loans and debts through commercial transactions with a maturity not greater than one year and which do not have a contractual rate of interest, as well as, where appropriate, advances and loans made to staff, receivable dividends and called payments on equity instruments, the amounts for which are expected to be received in the short term, and payments called by third parties on holdings, the amounts for which are expected to be paid in the short term, are valued by their nominal value where the effect of not updating the cash flows is of no significance.

In subsequent valuations, both assets and liabilities are valued by their amortized cost. Accrued interest is recognized in the Profit and Loss Account by applying the effective interest rate method. Notwithstanding the above, loans and debts with a maturity no greater than one year which are initially valued by their nominal value, remain valued by this amount unless, in the case of loans, they have been impaired.

At the year end, the necessary allowances are made where there is objective evidence of value of a credit having been impaired i.e. where there is evidence of a reduction or delay in estimated future cash flows corresponding to that asset.

An impairment loss in the value of loans and receivable sums corresponds to the difference between their book value and the current value of the estimated future cash flows to be generated, deducted at the effective interest calculated on their initial recognition.

Allowance for impairment of debts as of December 31, 2018, has been estimated on the basis of the analysis made on each of the individualized outstanding receivables on that date.

Investments in group, multi-group and affiliated companies equity instrument's

They are initially valued at cost, which corresponds to the fair value of the consideration paid plus the transaction costs which are directly attributable to them.

They are subsequently valued by their cost, less, where appropriate, the accumulated value of the allowances for impairment.

At the close of the financial year, and where there is objective evidence that the book value of an investment will not be recoverable, the necessary allowances are made.

The value of the allowance is determined as the difference between the book value and the recoverable value, unless there is better evidence of the recoverable value of the investments, account is taken, in estimating the impairment in this class of assets, of the proportion of equity of the entity in which there are holdings, corrected for the implicit capital gains present at the date of valuation, which correspond to items identifiable on the balance sheet of the entity in which there are holdings.

Allowances for impairment and, where appropriate, its reversal, are recognized as an expense or income respectively in the Profit and Loss Account. The reversal of the impairment shall be limited to the book value of the investment that would have been recognized on the reversal date had the impairment not been recognized.

De-recognition of Financial Assets

A financial asset, or part of it, is de-recognized where the contractual rights over the cash flows of the financial asset have expired or been assigned, and the risks and benefits attaching to its ownership have been substantially transferred.

De-recognition of Financial Liabilities

A financial liability is de-recognized where the corresponding obligation ceases

Interest received from financial assets

Interest and dividends from financial assets accrued subsequent to their purchase are recognized as income in the Profit and Loss Account.

Interests are recognized by using the effective interest rate method, and dividends where it is declared that shareholders are entitled to receive it. For these purposes, in the initial valuation of the financial assets, both the value of the explicit interest, accrued and non-matured at that time, and the value of the dividends agreed to body, on acquisition are recognized separately, bearing in mind their maturity, in the initial valuation of the financial assets.

Guarantees Given

Guarantees given through operating leases and provision of services are valued by the amount paid out and received respectively.

e) Transactions in foreign currencies

Transactions in foreign currencies are recognized by their exchange value in Euros, by using the spot exchange-rate for the dates on which they occur.

On the close of each financial year, monetary items are valued by applying the average spot exchange-rate on that date. Exchange differences, both positive and negative, which result from this process, as well as those generated on selling off equity items, are recognized in the Profit and Loss Account for the financial year in which they arise.

f) Profit Tax

Profit tax is recognized in the Profit and Loss Account or directly in the Equity depending on where the gains or losses giving rise to it are found. Profit tax for each financial year includes both current and deferred taxes, where appropriate. The income tax for each year includes both current and deferred taxes, if applicable.

The current tax amount is the sum to be paid by the Company as a result of the assessment notices for the tax.

Differences between the book value of assets and liabilities, and their tax base, generate the deferred tax asset or liability tax balances which are calculated using the expected tax rates at the time of their reversal, and under the method in which it can be reasonably expected to recover or pay the asset or liability.

Variations arising during the financial year in deferred tax asset or liability taxes are recognized either in the Profit and Loss Account or directly in the equity, as appropriate.

Deferred tax assets are only recognized insofar as it is probable that the company will have future tax gains that allow these assets to be applied.

In each closing balance sheet the book value of the recognized deferred tax assets is analyzed and the necessary adjustments are made insofar as there are doubts over their future tax recoverability. Likewise, in each closing non-recognized deferred taxes are assessed in the balance sheet and these are subject to recognition to the extent that their recovery with future tax benefits is probable.

g) Income and Expenses

Income and expenses are allocated according to the accrual basis, i.e. where the real flow of goods and services occurs which these represent, irrespective of when the monetary or financial flow deriving from them occurs.

Income resulting from the sale of goods and provision of services is valued by the fair value of the consideration, received or to be received, that derives from these, which, unless there is evidence to the contrary, is the agreed price for these goods or services, less: the amount of any discount, reduction or other similar items that the Company may concede, as well as the interest incorporated into the face value of the credits.

Income from services is recognized when the result of the transaction can be estimated reliably, considering the percentage of completion of the service at the year-end date. Consequently, only income from the provision of services is accounted for when all and each of the following conditions:

- a) The amount of the income can be reliably valued.
- b) It is probable that the Company receives financial benefits or profits arising from the transaction.
- c) The extent of the transaction carried out, on the date of closure of the financial year, can be reliably valued, and
- d) The costs already incurred in the service's provision, as well as those that are yet to be incurred up to its completion, can be reliably valued.

h) Provisions and Contingencies

Debentures existing at the close of the financial year, resulting from past events which may occasion loss in equity for the Group, and whose value and time of cancellation are indeterminate, are recognized on the consolidated balance sheet as provisions and are valued by the current value of the best possible estimate for the amount necessary to cancel the obligation or transfer it to a third party.

i) Grants, Donations and Legacies

Non-refundable capital grants, as well as donations and legacies, are valued by the fair value of the amount granted or of the goods received. They are initially allocated directly as income in the Consolidated equity and recognized in the Consolidated Profit and Loss Account in proportion to the amortization undergone over the period by the assets financed through these grants, unless these are non-depreciable assets, in which case they will be allocated to the earnings of the financial year in which their alienation or de-recognition takes place.

Grants intended for cancelling debts are allocated as income for the financial year in which the cancellation occurs, unless they are received for a specific financing, in which case the allocation is made according to the item that is financed.

Refundable grants are recognized as long-term debt convertible into subsidies until they become non-refundable.

Operation grants are credited to the earnings of the financial year when they accrue.

j) Related-Party Transactions

In general, items forming the subject matter of a related-party transaction are initially recognized by their fair value. The subsequent valuation is made in accordance with the provisions laid down in the corresponding regulations.

k) Cash-Flow Statements

Cash-flow statements use the following expressions according to the meanings given below:

Cash and Equivalents: Cash is both cash in hand and demand deposits. Cash equivalents are financial instruments forming part of the Group's normal cash management, are convertible into cash, have initial maturities no greater than three months and are subject to little significant risk of change in their value.

Cash Stream-flows: inflows and outflows of cash or other equivalent resources, with the latter being understood as investments having terms under three months, high liquidity and low risk of changes in value.

Operating Activities: these are the activities that make up the principal source of the Group's ordinary income, as well as other activities that cannot be classified under investment or financing.

Investment Activities: acquisition, alienation or disposal by other means of long-term assets and other investments not included in cash or cash equivalents.

Financing Activities: activities that lead to changes in the size and composition of the equity and financial liabilities.

NOTE 12. INFORMATION ON THE NATURE AND LEVEL OF THE RISK FROM FINANCIAL INSTRUMENT

Company activities are exposed to various types of financial risk, most especially credit, liquidity and market risks (exchange rate, interest rate and other price risks).

12.1) Credit Risk

The Company's main financial assets are cash and cash balances, trade and other receivables and investments, which represent the Company's maximum exposure to credit risk in relation to financial assets.

The Company's credit risk is attributable mainly to its commercial debts. The amounts are reflected in the net balance of provisions for bad debts, estimated by the management of the Company based on the experience of previous years and its assessment of the current economic environment.

12.2) Liquidity Risk

The general situation of financial markets, especially the banking market, has been particularly unfavourable for credit claimants. The Company pays constant attention to the evolution of the different factors that can help to solve liquidity crises, and especially to the sources of financing and their characteristics.

12.3) Market Risk

The general market situation during the last years has been unfavourable due to the difficult economic situation of the environment.

12.4) Exchange Rate Risk

The Company is not exposed to a significant exchange rate risk and therefore does not trade in hedging instruments.

12.5) Interest Rate Risk

Changes in interest rates modify the fair value of assets and liabilities bearing a fixed interest rate as well as the future flows of assets and liabilities referenced to a variable interest rate.

The objective of interest rate risk management is to achieve a balance in the debt structure that will minimize the cost of debt over the multiannual horizon with a reduced volatility in the Profit and Loss Account.

NOTE 13. EQUITY**13.1) Share Capital**

As of December 31, 2017 and December 31, 2018, the share capital amounts to 320.998,86 euros and is represented by 16.049.943 registered shares of 0,02 euros nominal each, fully subscribed and paid up. These holdings enjoy equal political and economic rights.

As of December 31, 2018, there are no companies with a direct or indirect stake equal to or greater than 10% of the share capital.

As of December 31, 2017, the companies with a direct or indirect stake equal to or greater than 10% of the share capital were as follows:

	Nº Shares	% Shares

Capital Increase

By virtue of the admission to trading on the Alternative Stock Market, the Parent Company carried out the following transactions in its share capital:

- On June 1, 2015, a General Shareholders' Meeting resolved to split the shares of the Parent Company by reducing the par value of the shares by 60,10 euros at a nominal value of 0,02 euros per share. In this operation, 3.005 shares were generated for each old share, with the capital stock being formed by 11.812.655 shares with a nominal value of each share at nominal 0,02 euros each.

- On June 1, 2015, it was agreed by the General Shareholders' Meeting to modify the system of representation of the shares, transforming the nominative securities representing the shares in which the Parent Company's capital is divided into account entries.
- On June 1, 2015, it was resolved by means of a General Meeting of Shareholders to modify the transmission regime of the shares of the Parent Company, passing this transfer of shares to be free and not subject to consent or authorization by the Company nor by shareholders
- On June 1, 2015, it was agreed by the General Meeting of Shareholders to request the incorporation in the segment of Companies in Expansion of the Alternative Stock Market of all the shares representing the Parent Company.
- On September 30, 2015, it was agreed to increase the Parent Company's Capital Stock by 84.745,78 euros through the issuance of 4.237.288 shares with a nominal value of 0,02 euros and an issue premium of 1,16 euros per share. This extension is fully subscribed and disbursed.

13.2) Reserves

The breakdown for Reserves is as follows, in euros:

	31/12/2018	31/12/2017
Legal Reserve	47.503,72	47.503,72
Voluntary Reserves	1.394.506,07	1.418.661,70
	1.442.009,79	1.466.165,42

a) Legal Reserve

The Legal Reserve is restricted with regard to its use, which is determined by a variety of legal provisions. In accordance with the Law Capital Companies, trading companies which obtain profits under this legal form are obliged to provide the reserve with 10% of these, until the constituted reserve fund reaches one fifth of the subscribed share capital. The purposes of the legal reserve are the compensation of losses or the increase of capital by the exceeding part of the 10% of the capital already increased, as well as its distribution to the shareholders in case of liquidation. At December 31, 2018, the Legal Reserve was not fully endowed.

13.3) Issue Premium

This reserve amounted to 5.244.344,28 euros, of which 329.090,20 euros arose as a result of the capital increase carried out in 2007 and 4.915.254,08 euros arose as a result of the capital increase carried out in the 2015 exercise for the departure of the Parent Company to the Alternative Stock Market. It has the same restrictions and can be used for the same purposes as voluntary reserves, including their conversion into share capital.

13.4) Own Shares

The Board of Shareholders of the Parent Company agreed on June 1, 2015 to authorize the Parent Company's Board of Directors for the derivative acquisition of treasury shares under the terms established by current legislation. These acquisitions of own shares have been made through the liquidity provider GVC Gaesco Valores SV, S.A, making available a total value of 1.200.000 euros to be able to carry out transactions of own shares, in accordance with the provisions of the Alternative Market and are valued at acquisition cost.

As of December 31, 2018, the Parent Company holds own shares for an amount of 954.287,73 euros (935.557,23 euros at the end of the previous year).

Tax Matters

In accordance with current legislation, tax payments cannot be considered final until they have been inspected by the tax authorities, or until the statute barring period of four years has passed.

At December 31, 2018, the Company has all the taxes to which it is subject from 2014 to 2018 open for inspection by the tax authorities. Consequently, on the occasion of possible inspections, additional liabilities may arise to those recorded by the Company. However, the directors of the Company and its tax advisers consider that any such liabilities would not be material to the annual accounts taken as a whole.

LLEIDANETWORKS SERVEIS TELEMÀTICS, S.A.
DIRECTOR'S REPORT FOR FINANCIAL YEAR 2018

LLEIDANETWORKS SERVEIS TELEMÀTICS, S.A.**DIRECTOR'S REPORT FOR FINANCIAL YEAR 2018**

In compliance with the provisions of the Spanish Companies Act, the Board of Directors hereby submits the directors' report for the year in order to complement, expand and comment on the balance sheet, the profit and loss account and the report corresponding to fiscal year 2018.

1. EVOLUTION OF BUSINESS

For the company, 2018 was a year with significant growth rates in both sales and EBITDA.

Sales have grown in the SaaS line by 19%, consolidating Lleida.net as a reference in the contracting and notification sector. The continuous investment in R&D processes has allowed us to expand the range of services offered, as well as to improve the existing ones. The diversity of the range of products and the adaptability of the company to the needs of customers has allowed it to reach new customers and develop standard products for lower volume customers.

Internally developed processes are patented globally and create entry barriers to competition. Additionally, the European homologation of electronic delivery products certified by EIDAS, opens a range of possibilities at European level, Lleida.net being the only Spanish company that has the homologation and the Sixth at European level.

The business line that has grown the most this year is the line of SMS solutions for Wholesale. With a growth rate of 49%, which represents an increase of more than 2.2 million euros with respect to the previous year, it reflects that Lleida.net has become a key player in the sector. The technology developed internally has allowed to take advantage of business opportunities. The new international destination routes negotiated by the team have turned Lleida.net into a reference company within the market.

<i>Sales by business lines - Thousands of eur</i>	2017	2018	Var. €	Var.%
SaaS Services	2.368	2.818	450	19%
SMS Solutions	2.830	2.636	-194	-7%
ICX WHOLESALE Solutions	4.458	6.624	2.166	49%
Total	9.656	12.078	2.422	25%

Data in Thousands of Euros	2017	2018	Var. €	Var.%
Sales	9.656	12.078	2.422	25%
Cost of Sales	(4.677)	(6.286)	1.609	34%
Gross Margin	4.979	5.792	813	16%
Payroll	(2.198)	(2.400)	202	9%
External Services	(2.157)	(2.263)	106	5%
Other incomes	43	23	(20)	-47%
Activations	849	787	(62)	-7%
EBITDA	1.516	1.939	423	28%
Amortizations	(1.073)	(1.148)	75	7%
Indemnities	(77)	(198)	121	157%
Profit from operations	366	593	227	62%
Financial Net Result	(35)	(52)	17	49%
Impairment and gains or losses on disposi	(575)	(582)	7	1%
Exchange Rate Differences	(9)	(33)	24	267%
Profit before tax	(253)	(74)	179	71%

The Gross Margin has increased by 16%, 813 compared to 2017, due to the increase in sales. The gross margin on sales stands at 48% while in 2017 it was 51.6%. The decrease is caused by the greater weight of Wholesale SMS sales over total sales.

In 2018, the company made a strong effort to attract talent. The average workforce has increased by 10 people, representing 19% over the previous year and has led to a 9% increase in cost. The main areas reinforced were the R&D&I department with the incorporation of personnel with higher degrees and the constitution of the compliance and Intellectual Properties departments.

External services expenses rose by 97 thousand euros this year, mainly due to the necessary consultancy and audit costs to obtain EIDAS approval and the costs of incorporating Lleida.net shares into trading on Euronext Growth in Paris. Additionally, an R&D collaboration amounting to more than 100 thousand euros has been allocated.

EBITA reached 1.9 million euros, accounting for 16% of sales, deriving both from the increase in sales and from more exhaustive cost control. Following the criterion of prudence, the group has opted to activate a lower amount of R&D activities in order to avoid possible fiscal contingencies, although the pace of R&D expenditure is maintained. This is the tenth quarter that the Group has positive EBITDA.

The result of the company has increased by 179 thousand euros, representing an increase of 71% despite the provision of participation and loans to Lleida.net USA. The company, following the criterion of prudence, has opted to provision part of the investment made in the subsidiary. The slower process of obtaining profits, and due to the fact that international commercial efforts have focused more intensely on Europe, Latin America and Africa, has led to this measure, although the United States continues to be a target market for the period 2019 and 2020.

2. SIGNIFICANT EVENTS OCCURRING AFTER THE CLOSURE

Subsequent to December 31, 2018 and up to the date of preparation of this Directors' Report, there have been no subsequent events, in addition to those already mentioned in the Notes to the annual accounts, which highlight circumstances that already existed at December 31, 2018 and which, due to the importance of their economic impact, should lead to adjustments in the financial statements or modifications to the information contained in the Explanatory Notes.

Nor are there any subsequent events, other than those already mentioned in the Explanatory Notes, that demonstrate conditions that did not exist at December 31, 2018 and that are of such importance that they require additional information in the Explanatory Notes to the annual accounts.

3. SUSCEPTIBLE EVOLUTION OF SOCIETY

The forecasts for 2019 are to increase the company's gross margin in euros, reinforcing sales of certified products through the consolidation of products at an international level.

4. R&D ACTIVITIES

In 2018 the Company has invested 787 thousand euros in research activities which have focused mainly on the development of a qualified system of certified electronic delivery based on the verification of data in situ.

5. OPERATIONS WITH OWN SHARES

In accordance with the regulations of the Alternative Stock Market, the company signed a liquidity agreement with the placing bank as part of its market launch. This agreement establishes both the delivery of a certain amount of own shares and the deposit of an amount of cash. The objective of this contract is to allow investors to trade the company's shares, ensuring that any interested person has the possibility of buying or selling shares.

The Board of Directors on August 12, 2016 approved the acquisition of own shares with a maximum amount of 200 thousand euros. The programme was extended until 12 August 2018 following the agreement of the Board of Directors on August 7, 2017.

At December 31, the company held 992,257 shares with a valuation on that date of 930,068.51 euros, representing 6.18% of the shares of Lleidatrans Serveis Telemàtics, S.A.

6. FINANCIAL INSTRUMENTS

During 2018 the Company has not used instruments related to financial derivatives.

7. DEFERRALS OF PAYMENT TO SUPPLIERS

Information on deferrals of payment to suppliers is shown in the annual accounts in Note 11.

PREPARATION OF ANNUAL ACCOUNTS AND DIRECTOR'S REPORT

Currently, the Audit Commission is made up of two independent directors, and they meet at least every six months and whenever their chairman calls. In 2018, the Committee met twice.

c) Board of Directors

It consists of the Executive Director and those responsible for the different departments of the company.

The meeting is convened at least once a month, in order to coordinate the different key activities of Lleida.net. The lines of action are defined both in the short and medium term in order to achieve the objectives set by the Board of Directors and to resolve the setbacks or problems that may have arisen.

All the areas of the company are covered, and each chief officer makes a report of the issues to address at the meeting . If certain information is detected that should be shared with the market, it would be communicated by the executive director to the Board of Directors .

d) Finance Department

The Finance Department is responsible for implementing a correct control system for financial information on day-to-day basis. It deals with the accounting of the parent company and controls the reporting of the subsidiary companies. Their functions include the preparation of the necessary reports for decision making by the Board of Directors, as well as the publication of the information required by the markets.

e) External audit

The annual accounts, both individual and consolidated of Lleida.net are reviewed by BDO auditors, a renowned prestige auditing firm . Since 2016, a limited review is also carried out for the period between 1 January and 30 June , which is reviewed by the same auditing firm.

3. CONTROL SYSTEMS OF THE COMPANY

The mechanisms of Internal Control and Risk Management Related to the financial information are the responsibility of the Audit Committee . As set by the regulations of the Board of Directors, they are further reviewed and supervised by the Board of Directors. The main control mechanisms are:

3.1 Annual budgets:

The Management team makes the annual budgets of the group and they should be reviewed and approved by the Board of Directors . Subsequently, a monthly control of deviations and its compliance is carried out, which is reviewed by the Board of Directors and is responsible for taking the appropriate measures and the main lines of action.

3.2 Internal control measure:

Lleida.net has defined the following financial processes as high-level control areas to comply with the internal control systems of the financial information:

- Sales, customer billing and recovery management
- Consolidation and reporting of group companies
- Investments in R + D + i
- Investments in Property, Plant and Equipment
- Treasury

- Purchases and accounts to pay
- Taxes
- Human Resources
- Financial closing

The main control measures by risk area are the following:

a) Sales, customer billing and recovery management

On a monthly basis, the detail of the invoices to be issued is generated, reviewed by the billing manager and the automatic process is launched, which allows:

- Generate entries into the accounts of entries of sales
- Send invoices to customers
- Creation of the files that are sent to the commercial managers, Chief Officers and to the Chief administrative Officer for the monitoring of the monthly figures

The person in charge of treasury supervises the collections of payments of clients and the relevant invoices are insured before a credit insurance company to prevent defaults

On a weekly basis, a follow-up is carried out to discuss about the situation of the collections along with the sales managers

The collections are reconciled weekly by the Financial Department

The management system used by the company to control its accounting systems has defined profiles for each user to access.

b) Consolidation and reporting:

The company has accounting and tax advisors in each of the countries where the group has a registered company. These advisors are responsible for sending monthly the figures of the subsidiary so that it can be reviewed from the parent company by the Administration Department. Advisors do not have access to the bank accounts of the subsidiaries and they only have limited powers to carry out administrative procedures before the public administration of each country.

c) R+D Investment

The R & D projects carried out by the company have an annual budget, which is controlled both by the technical department director and by the Administration department. All the activity carried out in R & D must be set within the annual action plan, and if it is an extraordinary collaboration it must be approved by the Chief Technical Officer.

Lleida.net

La Primera Operadora Certificadora

d) Investment in tangible fixed assets:

In this area, the most significant amount corresponds to the investments made in servers and IT equipment. An annual budget is made jointly between the technical department and the financial department, analysing the annual requirements and the execution process is controlled every month.

e) Treasury:

The person in charge of the Treasury must control on a daily basis the balances of the different financial instruments that the company has. The Executive Director is the person who has powers to make the corresponding wire transfers. From Treasury, the payments files are drafted and reviewed by the Financial Director for its execution by the General Director.

The bank accounts of the different subsidiaries are controlled by the parent's staff.

On a weekly basis a summary is made by the Treasury, with the balances that each instrument counts, as well as the main incomes and expenditures made from each account and sent both to the Financial Director and to the Executive Director for their supervision.

The bank accounts are reconciled by the Financial department, and the staff from the Treasury Department prepares the payment files.

f) Purchases and payable accounts

The consumptions of suppliers go directly into the management ERP. The rates of the suppliers are updated automatically by the same system whenever a routing price is modified. The Financial department verifies usually on a monthly basis, that the invoices actually correspond to the consumptions entered into the ERP. If this is the case, the consumption is validated, and the accounting entries of the purchase are automatically made. In the event of any discrepancy, the company has a protocol for action, where the discrepancy is communicated to the supplier and the causes are analysed and communicated to the interconnection department responsible for the purchases.

Payments with the main providers, usually operators, are made through netting. The purchase and sale invoices are compensated. The same system automatically generates this netting that is sent to the provider for its

acceptance. Once accepted by the supplier, it is included in the next payment remittance.

The other payments are mainly commercial expenses that are paid by employees with their personal credit cards. Every month an expense sheet is made, where all the supporting documents are included and must first be approved by its direct director and then by the Financial department. The amounts are paid by wire transfer, that are included in the payment file.

The company also has direct debits that corresponds to lease and supply payments. Such charges are reconciled weekly with the debits in the bank account

f) Taxes:

The Company internally manages the presentation of monthly taxes, which are automatically downloaded from the ERP. The documents are drafted by the Administration department for its digital signature by the Executive Director, who is the person who has the power to submit them.

In addition, the company has global advisors who inform them of all possible amendments to the regulations affecting them.

g) Human Resources:

Human capital is a key element for the success of Lleida.net. Human Resources department manages both current staff and new recruits managing both the development of each individual and their careers.

The desired profile for the new employees is set in collaboration with the director of the department concerned. The job description is posted in the company's social media profiles and job sites, and a first selection is made based on the candidates training and experience. Afterwards, a first interview with Human Resources Chief Officer is conducted and a performance test is carried out. The 3 best candidates are interviewed to make the final selection.

The Chief Human Resources Officer also manages salary payments and assesses together with the Head of the department the revenues each employee must receive, always with the final acceptance of direction and framed within the annual budget.

i) Financial closing:

Lleida.net

La Primera Operadora Certificadora

-Regulation: Lleida.net follows the regulations set by the general accounting plan for the recording of its activities. It has the support of advisors for any doubt or update of the regulations that might affect the company's procedures.

-Monthly financial closing: The company carries out monthly financial closings, which allow verifying compliance with the budget set by the Board of Directors.

3.3 Code of conduct in Stock markets

Code of Conduct for Stock Market purposes (hereinafter, the "Code") was approved by the LLEIDA.NET Board of Directors at a meeting held on July 26, 2016, pursuant to the provisions of article 225.2 of the modified text of the Spanish

Stock Market Act, approved by Spanish Royal Legislative Decree 4/2015, of 23 October. Specifically, the Code includes the precautions contained in Title VII, Chapter II of the modified text of the Spanish Stock Market Act applicable to the company in virtue of the provisions of article 322.3 of said modified text as well as the implementing regulations including Spanish Royal Decree 1333/2005, of 11 November, which develops the matter of market abuse from the Spanish Stock Market Act and Circular 4/2009, of 4 November, issued by the CNMV (Spanish National Securities Market Commission) on the communication of relevant information. The aim of the Code is to establish a set of rules of conduct governing the behaviour of LLEIDA.NET and the people affected by the different scopes regulated by this Code in order to guarantee full and adequate transparency for the company and protect investors. The body which shall supervise this code is the Audit Commission

4 RISK ASSESSMENTS:

The Group activities are exposed to various types of financial risk, most especially credit, liquidity and market risks (exchange rate, interest rate and other price risks).

4.1)Credit Risk

The Group's main financial assets are cash and cash balances, trade and other receivables and investments, which represent the Group's maximum exposure to credit risk in relation to financial assets. The Group's credit risk is attributable mainly to its commercial debts. The amounts are reflected in the net balance of provisions for bad debts, estimated by the Parent Company's management based on the experience of previous years and its assessment of the current economic environment.

4.2) Liquidity Risk

The general situation of the financial markets, especially the banking market, has been particularly unfavourable for credit claimants. The Group pays constant attention to the evolution of the different factors that can help to solve liquidity crises, and especially to the sources of financing and their characteristics.

4.3) Market Risk

The general market situation over the last years has been unfavourable due to the difficult global economic situation.

4.4) Exchange Rate Risk

The Group is not exposed to a significant exchange rate risk and therefore does not trade in hedging instruments.

Changes in interest rates modify the fair value of assets and liabilities bearing a fixed interest rate as well as the future flows of assets and liabilities referenced to a variable interest rate. The purpose of risk of management is to achieve a balance in the debt structure that will minimize the cost of debt deployed over a multiyear horizon while keeping income statement volatility low
