Rapport des résultats du Groupe Lleida.net au premier semestre 2020

Le 21 juillet dernier le Groupe Lleida.net a publié des résultats provisoires avec les données disponibles.

Après l'évaluation des audits de l'entreprise, nous mettons en annexe les variations des données des résultats provisoires et les données incluses dans les comptes annuels consolidés par le conseil administration.

<i>Données en Milliers d'euros Consolidés</i>	HR 21 juillet 2020	Comptes audités	Var. €	Var.%

Nous pouvons observer les variations peu significatives et nous pouvons les résumer en quatre grands points :

La marge brute est de 14 mille euros à cause de la régularisation des estimations effectuées par le Groupe.

- Il existe une variation dans les dépenses du personnel. Au début, le coût des tiers indépendants a été compris dans les dépenses du personnel ; face à l'établissement des comptes, il a été compris dans les services externes.

- Les soldes des services externes ont été reclassés comme autres résultats.

- Reclassement de 11 mille euros de différences de taux de change comme frais financiers.

Le reste des rubriques ne présentent pas de variations significatives et nous trouvons, comme conséquence :

Une augmentation des ventes de 1,8 million d'euros par rapport à la même période en 2019, dérivée de l'augmentation des ventes SaaS, du fait du COVID 19 et de la nouvelle demande créée par le télétravail, ainsi que du nouveau trafic SMS d'informations sur le travail, la santé et les transactions.

Lleida.net a réussi, grâce à son investissement continu dans la R + D + i, à se positionner comme fournisseur de référence sur les marchés de la certification et des contrats électroniques. Capturer de gros clients, non seulement sur le territoire national mais aussi à l'international, consolider sa présence en Amérique latine en se concentrant sur la Colombie et développer ses activités en Afrique et en Europe. En outre, Lleida.net a été en mesure de tirer parti de son réseau mondial d'interconnexion, les opportunités qui se sont manifestées sur le marché Wholesale.

- Le résultat d'exploitation a augmenté de 70%, de 277 mille euros au premier semestre 2019 à 411 mille euros dans la même période en 2020. L'investissement dans le personnel a été continu, incorporant du personnel dans le domaine de la R & D et technique : personnel qualifié, des cadres supérieurs et des docteurs. L'augmentation des frais de personnel, est passée de 1 471 milliers d'euros à 1 642 milliers d'euros, soit 12%, et l'effectif moyen a atteint 84 personnes, soit 8% de plus que la moyenne des effectifs en 2019.

- Lleida.net a réussi à augmenter de 49% le résultat avant impôts et à augmenter l'EBITDA de 255 mille euros. Le contrôle exhaustif des coûts, accompagné d'une augmentation des ventes, a permis une augmentation des résultats exponentielle malgré la crise sanitaire qui a touché ce semestre.

Au niveau du bilan, les variations s'expliquent par des activations plus faibles réalisées sur les immobilisations incorporelles, inférieures aux amortissements. Quel que soit le montant activé, le groupe continue de soutenir la R + D + i, étant un facteur clé de différenciation vis-à-vis de la concurrence.

En ce qui concerne les actifs courants, l'augmentation des débiteurs s'explique par l'augmentation des ventes. Il faut souligner l'augmentation de la trésorerie, dérivée à la fois des flux générés par l'activité de l'entreprise, et des nouveaux prêts qui ont été signés ce semestre.

Au niveau du passif, nous avons à la fois une augmentation des fonds propres grâce aux cessions des titres que le groupe détenait en actions propres et l'application des résultats de l'exercice 2019, ainsi qu'une augmentation de l'endettement, dérivée des nouveaux prêts signés de 1, 2 millions d'euros.

Si l'on analyse la dette financière nette, on voit que le premier trimestre où le ratio est négatif à 199 mille euros, représente 0,09 fois l'EBITDA annualisé.

Limited Review Report on the Interim Financial Statements

To the Shareholders of **LLEIDANETWORKS SERVEIS TELEMÀTICS, S.A.**

Limited review report on the interim financial statements

Introduction

We have reviewed the interim financial statements of **LLEIDANETWORKS SERVEIS TELEMÀTICS, S.A.**, which comprise the balance sheet as of June 30, 2020, the income statement, the statement of changes in equity, the cash-flow statement and the notes to the interim financial statements for the six-month period then ended. The directors are responsible for the preparation and fair presentation of the interim financial statements in accordance with the regulatory framework of financial information applicable to the Company in Spain, as identified in Note 2.a of the accompanying notes to the interim financial statements, and of the internal control deemed necessary to enable the preparation of the financial statements free of material misstatements, whether due to fraud or error. Our responsibility is to express a conclusion on this interim financial statements based on our limited review.

Scope of review

We have performed our limited review in accordance with the International Standard on Review Engagements 2410 "Review of Interim Financial Information performed by the Independent Auditor of the Company". A limited review on interim financial statements consists of making inquiries primarily of persons responsible for financial and accounting matters, and applying analytical procedures and other review procedures. A limited review has a substantially lower scope than an audit conducted in accordance with the regulations governing the auditing of accounts and, therefore, does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Therefore, we do not express an audit opinion on the interim financial statements.

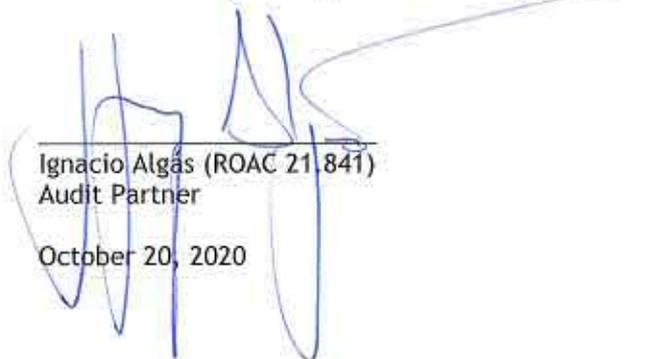

Conclusion

Based on our limited review, which cannot be understood as an audit of accounts, nothing has come to our attention that causes us to believe that the accompanying interim financial statements does not present fairly, in all material respects the true and fair view of the equity and financial position of **LLEIDANETWORKS SERVEIS TELEMÀTICS, S.A.**, as of June 30, 2020, as well as its results and its cash-flows for the six-month period then ended, in accordance with the applicable financial information regulatory framework and, in particular, with the accounting principles and criteria contained therein.

Other matters

This report has been prepared at the request of the Board of Directors of **LLEIDANETWORKS SERVEIS TELEMÀTICS, S.A.** in connection with the publication of the six-month period financial report required by the Circular 15/2016, of the Spanish Alternative Stock Market about 'Information to be supplied by companies in expansion and SOCIMI incorporated to negotiation in the Alternative Stock Market'.

NOTE 2. PRESENTATION BASIS OF INTERIM FINANCIAL STATEMENTS

a) True and Fair View

The accompanying Interim Financial statements of the period ended as of June 30, 2020 were prepared with the accounting records of the Company and drawn up in accordance with the applicable commercial law currently in force and with the standards established in the General Accounting Plan approved by Spanish Royal Decree 1514/2007, of 16 November, applying the modifications introduced by Royal Decree 1159/2010, of 17 september, and Royal Decree 602/2016, of 2 December, to provide a true and fair view of the Company assets and liabilities, financial position and earnings, as well as the accuracy of the cash flows included in the cash-flow statement.

b) Accounting Principles Applied

The Interim Financial Statements have been drawn up by applying the accounting principles established in the Spanish Commercial Code and in the General Accounting Plan.

c) Presentation Currency

In accordance with the applicable laws and regulations on accounting, the Interim Financial Statements are expressed in euros.

d) Critical Aspects of Uncertainties Valuation and Estimation

There are no significant uncertainties or aspects concerning the future which are potentially associated with any serious risk and which may involve significant changes to the value of assets and liabilities in the following financial year.

There have been no changes in accounting estimates that have affected the current year or that could significantly affect future years.

e) Comparison of the Information

In accordance with commercial legislation, the Board of Directors of the Company presents, for comparison purposes, each of the Balance Sheets and the Statement of Changes in Equity, in addition to the figures for the six-month period ended on June 30, 2020, those corresponding to the 12-month period ended December 31, 2019, which were part of the Financial Statements for the year 2019 approved by the General Shareholders' Meeting on June 10, 2020. Referring to the Profit and Loss Account and the Cash Flow Statement, the Board of Directors of the Company presents, in addition to the figures for the six-month period ended June 30, 2020, those corresponding to the Interim Financial Statements as of June 30, 2019, which is why the effects on the Profit and Loss Account recognized in certain Notes to the Interim Financial Statements are not directly traceable to the Profit and Loss Account because they reflect the effect of the entire year, while the Statement of Income only reflects the effect of the 6-month period. This fact must be considered in the interpretation of these interim financial statements.

f) Changes in Accounting Standards

There have been no changes in the accounting standards.

g) Correction of Errors

The Interim Financial Statements for the six-month period ended June 30, 2020 do not include any adjustment related to as consequence of errors detected in previous financial years.

h) Responsibility for the Information given and the Estimates made

Company's Directors are responsible for the information provided in these Interim Financial Statements. For the preparation of the Interim Financial Statements estimates have been used in order to value some of the assets, liabilities, incomes, expenses and compromises that are registered, and that, basically, these estimations are referred to the evaluation of losses by impairment of certain assets, the useful life of non-current assets and the probability of occurrence of provisions.

Notwithstanding that these estimates were made according to the best information available at the time of the preparation of these Interim Financial Statements, it is possible that future events may occur that require their amendment for the next financial years; which would be carried out prospectively, taking account of the effects of the estimate change on the corresponding profit and loss accounts.

i) Statement of Recognized Income and Expenses

In this year, as in the previous year, the Company has not recognized income or expenses directly in equity, having recorded all of them in the income statement for the corresponding year. Therefore, these Interim Financial Statements do not include the Statement of Recognized Income and Expenses.

NOTE 3. RECOGNITION AND VALUATION STANDARDS

The principal valuation standards used by the Company in the drafting of its Interim Financial Statements on June 30, 2020, in accordance with those established by the General Accounting Plan, were as follows:

a) Intangible Fixed Assets

Assets included in intangible fixed assets are valued by their cost, whether purchase price or production cost, reduced by the corresponding accumulated amortization and losses from any impairment which, where appropriate, has occurred.

Research and Development Costs

Capitalized research and development costs are specifically individualized for projects and their costs are clearly established so they can be spread over time. Similarly, the Management of the Company has substantial grounds for expecting the technical success and the financial and commercial profitability of these projects

Research and development costs that appear as assets are amortized on a straight-line basis over their useful life, at an annual rate of 20%, and always within a period of 5 years.

As soon as there are reasonable doubts over the technical success or financial and commercial profitability of a project, the values recorded in the asset that apply to it are directly allocated to the financial year's losses.

Computer Applications

Licenses for computer applications purchased from third parties are capitalized on the basis of the costs incurred for purchasing.

Computer applications are amortized on a straight-line basis throughout their useful lives, at an annual rate of 33%.

Maintenance expenses for computer applications incurred during the financial year are recognized in the Profit and Loss Account.

Industrial Property

Corresponds to the capitalized development expenses for which the relevant patent or similar has been obtained, and includes the registration and formalization costs for the industrial property, as well as the costs for purchasing the corresponding rights from third parties.

During all these years, the Company has been able to develop methods and unique technologies in its sector by continuous investment in research and development. The result of this effort has been the publication of patents at European, American and PCT levels, putting in value the effort developed during these last years. These patents allow the Company to license this technology to third parties and protect it against possible copies of other actors in the sector, less scrupulous when creating original models.

b) Tangible Fixed Assets

Tangible fixed assets are valued by their acquisition price or production cost, net of the corresponding accumulated amortization and, where appropriate, of the accumulated value of the recognized allowances for impairment.

Repair and maintenance expenses incurred during the financial year are debited in the Profit and Loss Account. Costs for renovating, extending or improving intangible fixed assets, representing an increase in capacity, productivity or lengthening of useful life, are capitalized as a higher value of the corresponding assets, once the book values of the replaced items have been de-recognized.

Tangible fixed assets, net of their residual value, where appropriate, are amortized by a straight-line-basis distribution of the various items that constitute these fixed assets over the years of estimated useful life making up the period in which the Company hopes to use them, according to the following table:

	Annual Percentage	Estimated Years of Useful Life
Buildings	2,50	40
Technical facilities	8 - 10	12,50 - 10
Machinery	20 - 25	5 - 4
Other installations	10	10
Furniture	10 - 15	10 - 6,67
Computer equipment	25 - 50	4 - 2
Other tangible fixed assets	15	6,67

The book value of a tangible fixed-asset item is de-recognized in the accounts through its alienation or disposal by other means; or where no future economic benefits or profits are expected to be obtained for its use, alienation or disposal by other means.

The loss or profit resulting from writing-off a tangible fixed-asset item is determined as the difference between the net values, where appropriate, of the sales costs resulting from its alienation or disposal by other means, where available, and the item's book value, and is allocated to the Profit and Loss Account for the financial year in which this occurs.

At the financial year's closure, the Company, assesses whether there are signs of impairment in a tangible fixed-asset item or any cash-generating unit, in which case the recoverable amounts are estimated and the necessary allowances are made.

An impairment loss is deemed to have occurred in a tangible fixed-asset item where its book value exceeds its recoverable value, this being understood as the higher value between its fair value less the sales costs and its value in use.

Allowances for impairment in the tangible fixed-asset items, as well as their reversals where the circumstances producing them cease, are recognized as an expense or income respectively in the Profit and Loss Account.

c) Leases and Other Transactions of a Similar Nature

Operating-lease expenses incurred during the financial year are debited in the Profit and Loss Account.

d) Financial Instruments

The Company determines the classification of its financial assets on their initial recognition and, where permitted and appropriate, this classification is re-assessed on each closing of the balance sheet.

Financial instruments, for the purposes of their valuation, are classified in any of the following categories:

Loans and Receivable Items and Debts and Payable Items

Loans and Receivable Items

The following are classified under this category:

- a) Trade credits: financial assets arising from the sale of assets and the provision of services for commercial transactions, and
- b) Non trade credits: financial assets which, being neither equity instruments nor derivatives, have no commercial origins, whose payments are for a fixed or determinable amount, and which are not traded in an active market. They do not include those financial assets for which the Company cannot recover substantially all the initial investments, owing to circumstances unrelated to credit impairment. The latter are classified as available for sale.

Debts and Payable Items

The following are classified under this category:

- a) Trade debts: financial debts arising from the purchase of assets and services through commercial transactions, and
- b) Non trade debts: financial liabilities which, not being derivate instruments, have no commercial origins.

Initially, financial assets and liabilities included in this category are valued by their fair value, which is the price of the transaction and which is equivalent to the fair value of the consideration paid plus the transaction costs which are directly attributable to it.

Notwithstanding what is stated in the above paragraph, loans and debts through commercial transactions with a maturity not greater than one year and which do not have a contractual rate of interest, as well as, where appropriate, advances and loans made to staff, receivable dividends and called payments on equity instruments, the amounts for which are expected to be received in the short term, and payments called by third parties on holdings, the amounts for which are expected to be paid in the short term, are valued by their nominal value where the effect of not updating the cash flows is of no significance.

In subsequent valuations, both assets and liabilities are valued by their amortized cost. Accrued interest is recognized in the Profit and Loss Account by applying the effective interest rate method. Notwithstanding the above, loans and debts with a maturity no greater than one year which are initially valued by their nominal value, remain valued by this amount unless, in the case of loans, they have been impaired.

At the year end, the necessary allowances are made where there is objective evidence of value of a credit having been impaired, i.e. where there is evidence of a reduction or delay in estimated future cash flows corresponding to that asset.

An impairment loss in the value of loans and receivable sums corresponds to the difference between their book value and the current value of the estimated future cash flows to be generated, deducted at the effective interest calculated on their initial recognition.

Allowance for impairment of debts as of June 30, 2020, has been estimated on the basis of the analysis made on each of the individualized outstanding receivables on that date.

Investments in group, multi-group and affiliated companies equity instrument's

They are initially valued at cost, which corresponds to the fair value of the consideration paid plus the transaction costs which are directly attributable to them.

They are subsequently valued by their cost, less, where appropriate, the accumulated value of the allowances for impairment

At the close of the financial year, and where there is objective evidence that the book value of an investment will not be recoverable, the necessary allowances are made.

The value of the allowance is determined as the difference between the book value and the recoverable value, unless there is better evidence of the recoverable value of the investments, account is taken, in estimating the impairment in this class of assets, of the proportion of equity of the entity in which there are holdings, corrected for the implicit capital gains present at the date of valuation, which correspond to items identifiable on the balance sheet of the entity in which there are holdings.

Allowances for impairment and, where appropriate, its reversal, are recognized as an expense or income respectively in the Profit and Loss Account. The reversal of the impairment shall be limited to the book value of the investment that would have been recognized on the reversal date had the impairment not been recognized.

Financial Assets Available for Sale

This category includes debt securities and equity instruments from other companies not classified in any of the preceding categories.

Subsequently, they are valued by their fair value, without deducting the transaction costs that might be incurred in their alienation. Changes in fair value are directly recognized in the equity, until the financial asset leads to de-recognition or is impaired, where the value so recognized is allocated to the Profit and Loss Account.

Notwithstanding the above, allowances for impairment and losses and gains which arise from exchange differences in monetary financial assets in foreign currency are recognized in the Profit and Loss Account rate.

The value of both the interest, calculated under the effective interest method, and the accrued dividends are also recognized in the Profit and Loss Account.

Investments in equity instruments whose fair value cannot be reliably determined are valued by their cost, less, where appropriate, the accumulated value of the allowances for impairment.

De-recognition of Financial Assets

A financial asset, or part of it, is de-recognized where the contractual rights over the cash flows of the financial asset have expired or been assigned, and the risks and benefits attaching to its ownership have been substantially transferred.

De-recognition of Financial Liabilities

A financial liability is de-recognized where the corresponding obligation ceases.

Interest Received from Financial Assets

Interest from financial assets accrued subsequent to their purchase are recognized as income in the Profit and Loss Account.

Interests are recognized by using the effective interest rate method. For these purposes in the initial valuation of the financial assets, both the value of the explicit interest, accrued and non-matured at that time, and the value of the dividends agreed to by the competent body on acquisition, are recognized independently, bearing in mind their maturity.

Guarantees Given

Guarantees given and received through operating leases and provision of service are valued by the amount paid out and received respectively.

e) Transactions in Foreign Currencies

Transactions in foreign currencies are recognized by their exchange value in Euros, by using the spot exchange-rate for the dates on which they occur.

On the close of each financial year, monetary items are valued by applying the average spot exchange-rate on that date. Exchange differences, both positive and negative, which result from this process, as well as those generated on selling off equity items, are recognized in the Profit and Loss Account for the financial year in which they arise.

f) Profit Tax

Profit tax is recognized in the Profit and Loss Account or directly in the Equity depending on where the gains or losses giving rise to it are recognized. Profit tax for each financial year includes both current and deferred taxes, where appropriate.

The current tax amount is the sum to be paid by the Company as a result of the assessment notices for the tax.

Differences between the book value of assets and liabilities, and their tax base, generate the deferred tax asset or liability tax balances which are calculated using the expected tax rates at the time of their reversal, and under the method in which it can be reasonably expected to recover or pay the asset or liability.

Variations arising during the financial year in deferred tax asset or liability are recognized either in the Profit and Loss Account or directly in the Equity, as appropriate.

Deferred tax assets are only recognized insofar as it is probable that the company will have future tax gains that allow these assets to be applied.

In each closing balance sheet the book value of the recognized deferred tax assets is analyzed and the necessary adjustments are made insofar as there are doubts over their future tax recoverability. Likewise, in each closing non-recognized deferred taxes are assessed in the balance sheet and these are subject to recognition to the extent that their recovery with future tax benefits is probable.

g) Income and Expenses

Income and expenses are allocated according to the accrual basis, i.e. where the real flow of goods and services occurs which these represent, irrespective of when the monetary or financial flow deriving from them occurs.

Income resulting from the sale of goods and provision of services is valued by the fair value of the consideration, received or to be received, that derives from these, which, unless there is evidence to the contrary, is the agreed price for these goods or services, less the amount of any discount, reduction or other similar items, as well as the interest incorporated into the face value of the credits.

Income from services is recognized when the result of the transaction can be estimated reliably, considering the percentage of completion of the service at the year-end date. Consequently, only income from the provision of services is accounted for when all and each of the following conditions:

- a) The amount of the income can be reliably valued.
- b) It is probable that the Company receives financial benefits or profits arising from the transaction.
- c) The extent of the transaction carried out, on the date of closure of the financial year, can be reliably valued, and
- d) The costs already incurred in the service's provision, as well as those that are yet to be incurred up to its completion, can be reliably valued.

h) Provisions and Contingencies

Debentures existing at the close of the financial year, resulting from past events which may occasion loss in equity for the Company, and whose value and time of cancellation are indeterminate, are recognized on the balance sheet as provisions and are valued by the current value of the best possible estimate for the amount necessary to cancel the obligation or transfer it to a third party.

i) Grants, Donations and Legacies

Non-refundable capital grants, as well as donations and legacies, are valued by the fair value of the amount granted or of the goods received. They are initially allocated directly as income in the equity and recognized in the Profit and Loss Account in proportion to the amortization undergone over the period by the assets financed through these grants, unless these are non-depreciable assets, in which case they will be allocated to the earnings of the financial year in which their alienation or de-recognition takes place.

Grants intended for cancelling debts are allocated as income for the financial year in which the cancellation occurs, unless they are received for a specific financing, in which case the allocation is made according to the item that is financed.

Refundable grants are recognized as long-term debt convertible into subsidies until they become non-refundable.

Operation grants are credited to the earnings of the financial year when they accrue.

j) Related-Party Transactions

In general, items forming the subject matter of a related-party transaction are initially recognized by their fair value. The subsequent valuation is made in accordance with the provisions laid down in the corresponding regulations.

k) Cash-Flow Statements

Cash-flow statements use the following expressions according to the meanings given below:

Cash and Equivalents: Cash is both cash in hand and demand deposits. Cash equivalents are financial instruments forming part of the Company's normal cash management, are convertible into cash, have initial maturities no greater than three months and are subject to little significant risk of change in their value.

Cash Stream-flows: inflows and outflows of cash or other equivalent resources, with the latter being understood as investments having terms under three months, high liquidity and low risk of changes in value.

Operating Activities: these are the activities that make up the principal source of the Company's ordinary income, as well as other activities that cannot be classified under investment or financing.

Investment Activities: acquisition, alienation or disposal by other means of long-term assets and other investments not included in cash or cash equivalents.

Financing Activities: activities that lead to changes in the size and composition of the equity and financial liabilities.

NOTE 11. INFORMATION ON THE NATURE AND LEVEL OF THE RISK FROM FINANCIAL INSTRUMENT

Company activities are exposed to a diverse set of financial risks, specifically credit risk, liquidity risk and market risks (exchange rate, interest rate and other price risks).

11.1) Credit Risk

The Company's main financial assets are cash and cash balances, trade and other receivables and investments, which represent the Company's maximum exposure to credit risk in relation to financial assets.

The Company's credit risk is attributable mainly to its commercial debts. The amounts are reflected in the net balance of provisions for bad debts, estimated by the Company's management based on the experience of previous years and its assessment of the current economic environment.

11.2) Liquidity Risk

The general situation of financial markets, especially the banking market, has been particularly unfavourable for credit claimants. The Company pays constant attention to the evolution of the different factors that can help to solve liquidity crises, and especially to the sources of financing and their characteristics.

11.3) Market Risk

The general market situation during the last years has been unfavourable due to the difficult economic situation of the environment

11.4) Exchange Rate Risk

The Company is not exposed to a significant exchange rate risk and therefore does not trade in hedging instruments.

11.5) Interest Rate Risk

Changes in interest rates modify the fair value of assets and liabilities bearing a fixed interest rate as well as the future flows of assets and liabilities referenced to a variable interest rate.

The objective of interest rate risk management is to achieve a balance in the debt structure that will minimize the cost of debt over the multiannual horizon with a reduced volatility in the Profit and Loss Account.

11.6) Risks Derived from the Current Situation due to the Possible Effects of COVID-19

Since December 2019, COVID-19, a new strain of Coronavirus, has spread to many countries, including Spain since January 2020. This event significantly affects economic activity worldwide and, as a result, the Group's operations and financial results.

The effects of this crisis have had two main axes within Lleida.net:

- Enhancing sales of SaaS line derived from lockups, which have forced to adapt the companies policies, and has accelerated all the digitalization of both notification and hiring processes where Lleida.net has been a key agent of change
- Change in the type of traffic of the SMS wholesale line, where hospitality traffic has been reduced but where volume has been maintained, thanks to SMS linked to digital processes and a need for this communication channel derived from teleworking and social distancing.

The growth in demand for the SaaS line is not foreseen as a one-off growth, but rather as an accelerator of new contracts, which will have recurrent consumption.

With the aim of minimizing the risk of contagion within the staff of Lleidanet, where the number of employees has continued to increase and no ERTE has been accepted, teleworking was introduced as a predominant precautionary measure. To date, most of the staff continues to telework, and the staff attending the facilities must comply with the security protocol implemented.

NOTE 12. EQUITY**12.1) Share Capital**

As of December 31, 2019 and June 30, 2020, the share capital amounts to 320.998,86 euros and is represented by 16.049.943 registered shares of 0,02 euros nominal each, fully subscribed and paid up. These holdings enjoy equal political and economic rights.

Total	2.213.933,94	1.492.937,50

a) Legal Reserve

The Legal Reserve is restricted with regard to its use, which is determined by a variety of legal provisions. In accordance with the Law Capital Companies, trading companies which obtain profits under this legal form are obliged to provide the reserve with 10% of these, until the constituted reserve fund reaches one fifth of the subscribed share capital. The purposes of the legal reserve are the compensation of losses or the increase of capital by the exceeding part of the 10% of the capital already increased, as well as its distribution to the shareholders in case of liquidation. At June 30, 2020, the Legal Reserve was fully endowed.

12.3) Issue Premium

This reserve amounted to 5.244.344,28 euros, of which 329.090,20 euros arose as a result of the capital increase carried out in 2007 and 4.915.254,08 euros arose as a result of the capital increase carried out in the 2015 exercise for the departure of the Parent Company to the Alternative Stock Market. It has the same restrictions and can be used for the same purposes as voluntary reserves, including their conversion into share capital.

12.4) Own Shares

The Board of Shareholders of the Company agreed on June 1, 2015 to authorize the Board of Directors for the derivative acquisition of treasury shares under the terms established by current legislation. These acquisitions of own shares have been made through the liquidity providers GVC Gaesco Valores SV, S.A, making available a total value of 1.200.000 euros and Invest Securities S.A in the Euronext Grothw, making available a total value of 83.438,45 euros to be able to carry out transactions of own shares, in accordance with the provisions of the Alternative Market and Euronext Growth respectively. Own shares are valued at acquisition cost.

As of June 30, 2020, the Company holds own shares for an amount up to 334.512,65 euros (753.301,13 euros as of December 31, 2019).

Tax Situation

In accordance with current legislation, tax payments cannot be considered final until they have been inspected by the tax authorities, or until the statute barring period of four years has passed.

As of June 30, 2020, the Company has open to tax inspection all the taxes to which it is subject from the financial year 2016 to the 2019 financial year. Consequently, as a result of possible inspections, additional liabilities could arise to those registered by the Company. However, the Directors of the Company and its tax advisors consider that such liabilities, if they occur, would not be significant on the annual accounts taken as a whole.

LLEIDANETWORKS SERVEIS TELEMÀTICS, S.A.
DIRECTORS' REPORT FOR
THE SIX-MONTH PERIOD ENDED AS OF JUNE 30, 2020

LLEIDANETWORKS SERVEIS TELEMÀTICS, S.A.

MANAGEMENT REPORT FOR THE SIX-MONTH PERIOD ENDED 30 JUNE 2020

In compliance with the provisions of the Spanish Corporations Law, the Board of Directors hereby submits the director's report for the year, in order to complement, expand and comment on the balance sheet, the profit and loss account and the report corresponding to the first half of fiscal year 2020.

1. EVOLUTION OF BUSINESS

In the first half of the 2020 financial year, sales have increased by 26% to reach 7,2 million euros. The growth was marked by both the Wholesale line and the SaaS line, with increases of 44% and 20% respectively.

The growth of the SaaS line has been boosted by COVID19 which has created new demand for our products as a result of the increase in teleworking due to confinement. Lleida.net products are perfectly adapted to this new normality, where you have to keep signing documents and making notifications. Specifically, due to confinement, we have seen how the consumption typology of our customers has been modified, increasing the consumption of notification products in detriment of hiring products. Lleida.net product portfolio allows to adapt to both economic growth and recession periods. Additionally, we have accelerated the signing of relevant contracts, which will have an impact on sales from the last quarter of 2020 onwards, such as South African Post, Ibercaja, Alphabet and Ald Automotive.

The 44% increase in sales of the Wholesale line, which includes SMS sales from carriers and aggregators, is explained by the new agreements signed with Asian carriers. As a result of the COVID, we have seen how hospitality traffic has disappeared (hotels, airplanes, vacation home rentals, cabs) but the traffic of labor, health and transactional information has increased.

Commercial SMS sales, with a decrease of 6% compared to the same semester of 2019, are the ones with less potential within Lleida.net portfolio. It is a simple SMS market for small volume customers. We do not expect significant developments in this business line for the end of the year.

The gross margin has increased 13% in absolute figures, and the Gross margin between sales ratio has gone from 51.6% in the first semester of 2019 to 46.3% in the first semester of 2020. The decrease in the ratio is explained by the relative weight of Wholesale sales over total sales, as these sales have a lower unit margin than SaaS sales.

Personnel expenses increased by 168 thousand euros, 12% compared to the same semester in 2019. One of Lleida.net pillars is the constant incorporation of talent, necessary both in the development of new products and in the acquisition of new clients and opening of new markets. Lleida.net staff has increased in a 6% if we compare the year to year data. The last incorporations have been destined to cover the demand of additional information derived from COVID

Activations have decreased by 180 thousand euros, 35% compared to the same period in 2019. It is worth noting that the company, regardless of the lower volume of activations, continues to make the same intensive work in this area to continue developing products, mainly in the SaaS line, with innovation being a basic pillar within the company's strategy and continuously reinforcing its talented staff.

EBITDA has increased by 9% due to:

- Increase in sales and the corresponding gross margin.
 - The "braking" of external services costs, due to lower commercial trips due to mobility restrictions in the second quarter
- The lowest activation of research and development expenses as we have explained

Both EBITDA and pre-tax results are positive, and the increase in sales and gross margin has allowed us to continue with the company's strategic plan by attracting talent.

2. IMPORTANT EVENTS OCCURRED AFTER THE CLOSURE

On September 14, 2020, the General Shareholders' Meeting agreed, in an extraordinary call, to request the admission of all the company's shares as a listing on the OTCQX International market in New York (USA).

In addition to the above-mentioned agreement, from June 30, 2020 until the date of preparation, no subsequent events have occurred, in addition to those already mentioned in the Notes to the Annual Accounts, that would reveal circumstances that already existed at June 30, 2020 and that, due to the importance of their economic impact, should entail adjustments to the financial statements or modifications to the information contained in the Notes to the Annual Accounts.

Nor are there any subsequent events, other than those already mentioned in the Explanatory Notes, that demonstrate conditions that did not exist at June 30, 2020 and which are of such importance that they require additional information in the Explanatory Notes to the Interim Financial Statements.

3. SUSCEPTIBLE EVOLUTION OF SOCIETY

The forecast for the second half of the 2020 financial year is to increase the company's gross margin, reinforcing sales of certified products by consolidating international markets.

4. R&D ACTIVITIES:

In the first half of fiscal year 2020, the Company has invested 331 thousand euros in research activities aimed mainly at the company's certification line.

5. OPERATIONS WITH OWN SHARES:

In accordance with the regulations of the Alternative Stock Market, the company signed a liquidity agreement with the placement bank on the occasion of its market debut.

This agreement establishes both the delivery of a certain amount of own shares, and the deposit of an amount of cash. The purpose of this agreement is to allow investors to trade the company's shares, ensuring that any interested person has the possibility to buy or sell shares.

At the Board of Directors meeting held on August 12, 2016, the acquisition of own shares was approved for a maximum amount of 200 thousand euros. The program was extended until June 1, 2020 following the agreement of the Board of Directors on July 30, 2019.

At 30 June 2020, the company had 279.933 shares with a valuation on that date of 1.012.856,18 euros, which represented 1,74% of the shares in Lleidanetworks Serveis Telemàtics, S.A.

6. FINANCIAL INSTRUMENTS

During the first semester of 2020, the Company has not used instruments related to financial derivatives.

7. DEFERRALS OF PAYMENT TO SUPPLIERS

Information regarding deferrals of payment to suppliers is shown in the Financial Statements in Note 10.

8. EFFECTS DERIVED FROM COVID-19

Information regarding the effects of the current situation caused by Covid-19 is shown in the Financial Statements, in Note 11.6

We have reviewed the interim consolidated financial statements of **LLEIDANETWORKS SERVEIS TELEMÀTICS, S.A. (Parent Company) AND SUBSIDIARIES (The Group)**, which comprise the consolidated balance sheet as of June 30, 2020, the consolidated income statement, the consolidated statement of changes in equity, the consolidated cash-flow statement and the notes to the interim consolidated financial statements for the six-month period then ended. The directors of the Parent Company are responsible for the preparation and fair presentation of the interim consolidated financial statements in accordance with the regulatory framework of financial information applicable to the Group in Spain, as identified in Note 2.a of the accompanying notes to the interim consolidated financial statements, and of the internal control deemed necessary to enable the preparation of the interim consolidated financial statements free of material misstatements, whether due to fraud or error. Our responsibility is to express a conclusion on this interim consolidated financial statements based on our limited review.

Scope of review

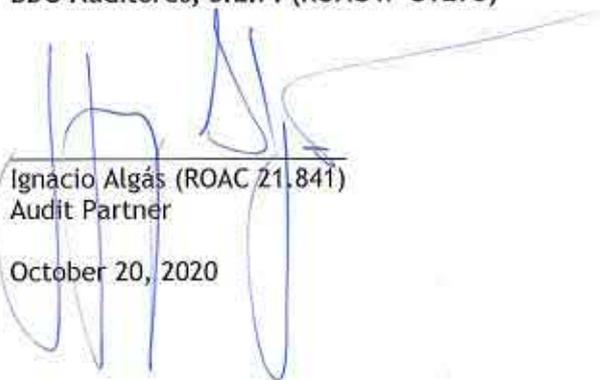

We have performed our limited review in accordance with the International Standard on Review Engagements 2410 "Review of Interim Financial Information performed by the Independent Auditor of the Company". A limited review on interim consolidated financial statements consists of making inquiries primarily of persons responsible for financial and accounting matters, and applying analytical procedures and other review procedures. A limited review has a substantially lower scope than an audit conducted in accordance with the regulations governing the auditing of accounts and, therefore, does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Therefore, we do not express an audit opinion on the interim consolidated financial statements.

Conclusion

Based on our limited review, which cannot be understood as an audit of accounts, nothing has come to our attention that causes us to believe that the accompanying interim consolidated financial statements does not present fairly, in all material respects the true and fair view of the consolidated equity and consolidated financial position of **LLEIDANETWORKS SERVEIS TELEMÀTICS, S.A. AND SUBSIDIARIES**, as of June 30, 2020, as well as its consolidated results and its consolidated cash-flows for the six-month period then ended, in accordance with the applicable financial information regulatory framework and, in particular, with the accounting principles and criteria contained therein.

Other matters

This report has been prepared at the request of the Board of Directors of **LLEIDANETWORKS SERVEIS TELEMÀTICS, S.A.** in connection with the publication of the six-month period financial report required by the Circular 15/2016, of the Spanish Alternative Stock Market about 'Information to be supplied by companies in expansion and SOCIMI incorporated to negotiation in the Alternative Stock Market'.

On August 25, 2016, the Parent Company made a contribution of 268.09 euros for the incorporation of said company. Its main activity is the provision, organization and commercialization of telecommunication services and activities such as mobile messaging services (SMS and MMS), carriers, etc., the creation, generation and exploitation of information and communication technologies and the provision of consulting and advisory services on these matters. On 21 February 2020, a capital increase was carried out through the capitalisation of loans held with the Parent Company for an amount of 104.283 euros.

NOTE 2. PRESENTATION BASIS OF INTERIM CONSOLIDATED FINANCIAL STATEMENTS

a) True and Fair View

The accompanying Interim Consolidated Financial statements of the period ended as of June 30, 2020 were prepared with the accounting records of the different constituent companies of the Group, whose respective annual statements were prepared in accordance with the applicable commercial law currently in force and according to the General Accounting Plan approved by Spanish Royal Decree 1514/2007, 16 of November, in the case of Spanish companies, and in accordance with the applicable legislation in the other countries in which the companies that are part of the Consolidated Group are located, and are submitted as provided by the Royal Decree 1159/2010 of 17 September, so as to provide a true and fair view of the net worth, financial situation, results and accuracy of the cash flows included in the Consolidated Cash Flow Statement.

b) Presentation Currency

In accordance with the applicable laws and regulations on accounting, the Interim Consolidated Financial Statements are expressed in euros.

c) Critical Aspects of Uncertainties Valuation and Estimation

There are no significant uncertainties or aspects concerning the future which are potentially associated with any serious risk and which may involve significant changes in the value of assets and liabilities in the following financial year.

There have been no changes in accounting estimates that have affected the current six-month period or that could significantly affect years.

d) Comparison of the Information

In accordance with commercial legislation, the Board of Directors of the Parent Company presents, for comparison purposes, each of the Consolidated Balance Sheets and Consolidated Statement of Changes in Equity, in addition to the figures for the six-month period ended on June 30, 2020, those corresponding to the 12-month period ended December 31, 2019, which were part of the Interim Consolidated Financial Statements for the year 2019 approved by the General Shareholders' Meeting on June 10, 2020. Referring to the Consolidated Profit and Loss Account and the Consolidated Cash Flow Statement, the Board of Directors of the Parent Company presents, in addition to the figures for the six-month period ended June 30, 2020, those corresponding to the States Interim Consolidated Financial Statements as of June 30, 2019, which is why the effects on the Consolidated Profit and Loss Account recognized in certain Notes to the Interim Consolidated Financial Statements are not directly traceable to the Consolidated Profit and Loss Account because they reflect the effect of the entire year, while the Consolidated Statement of Income only reflects the effect of the 6-month period. This fact must be considered in the interpretation of these interim financial statements.

e) Changes in Accounting Standards

There have been no changes in the accounting standards.

f) Responsibility for the Information given and the Estimates made

Company's Directors are responsible for the information provided in these Interim Financial Statements. For the preparation of the Interim Consolidated Financial Statements estimates have been used in order to value some of the assets, liabilities, incomes, expenses and compromises that are registered, and that, basically, these estimations are referred to the evaluation of losses by impairment of certain assets, the useful life of non-current assets and the probability of occurrence of provisions.

Notwithstanding that these estimates were made according to the best information available at the time of the preparation of these Interim Consolidated Financial Statements, it is possible that future events may occur that require their amendment for the next financial years; which would be carried out prospectively, taking account of the effects of the estimate change on the corresponding profit and loss accounts.

g) Statement of Recognized Income and Expenses

In this year, as in the previous year, the Group has not recognized income or expenses directly in equity, having recorded all of them in the income statement for the corresponding year. Therefore, these Interim Consolidated Financial Statements do not include the Statement of Recognized Income and Expenses.

NOTE 3. RECOGNITION AND VALUATION STANDARDS

The principal valuation standards used by the Group in the drafting of its Interim Consolidated Financial Statements on June 30, 2020, in accordance with those established by the General Accounting Plan, were as follows:

a) Consolidation Principles

The consolidation of the Financial Statements of **Lleidanetworks Serveis Telemàtics, S.A.** with the Financial Statements of its investee companies mentioned in Notes 1.2 and 2, was carried out using the following methods:

1. Application of the global integration method for all Group companies, i.e. those over which it as effective control.
2. Application of the equity method as equivalence for associated companies, i.e. those over which a notable influence is exercised in terms of management but in which there is no majority vote or joint management with third parties.

The consolidation of the operations of **Lleidanetworks Serveis Telemàtics, S.A.** with those of the aforementioned subsidiaries was performed according to the following basic principles:

- The criteria used in formulation of the Balance Sheets, the Profit and Loss Account and the Statement of Changes in Equity and Cash-Flow Statements for each one of the consolidated companies are, generally, and in their basic aspects, homogenous.
- The Consolidated Balance Sheet, the Consolidated Profit and Loss Account, the Consolidated Statement of Changes in Equity and Consolidated Statements of Cash Flow include all adjustments and eliminations of the consolidation process, as well as relevant valuation homogenizations to reconcile balances and transactions between the consolidating companies.
- Balances and transactions between consolidated companies were eliminated in the consolidation process. The credits and debts with group, affiliated and associated companies which have been excluded from the consolidation are presented in the corresponding headings of the assets and liabilities headings of the Consolidated Balance Sheet.
- The deletion of Subsidiary equity investment was conducted by compensating the shareholding of the Parent Company with the proportional part of the net equity of the subsidiaries which is represented by the shareholding on the date of the first consolidation. The first consolidation differences were treated as follows:
 - a) Positive differences which cannot be allocated to the equity elements of the Subsidiaries were included in the "Consolidation Goodwill" heading of the Consolidated Balance Sheet. The impairment losses must be recognized in the Consolidated Profit and Loss Account and are irreversible
 - b) Negative differences, obtained as first consolidation, are recognized as reserves for the year considering that the group already existed previously in the different subgroups contributed to the Parent Company.
- The consolidated income for the financial year shows the part that may be attributed to the Parent Company, comprised of the income obtained by the latter plus the corresponding part, by virtue of the financial shareholding, of the income obtained by the invested companies
- The shareholding value of the minority interests in the equity and the attribution of income in the consolidated subsidiaries is presented in the "Minority Interest" heading of the Equity of the Consolidated Balance Sheet. The value breakdown of these shareholdings is presented in Note 4.

b) Intangible Fixed Assets

Assets included in intangible fixed assets are valued by their cost, whether purchase price or production cost, reduced by the corresponding accumulated amortization and losses from any impairment which, where appropriate, has occurred.

Research and Development Costs

Capitalized research and development costs are specifically individualized for projects and their costs are clearly established so they can be spread over time. Similarly, Management the Group has substantial grounds for expecting the technical success and the financial and commercial profitability of these projects

Research and development costs that appear as assets are amortized on a straight-line basis over their useful life, at an annual rate of 20%, and always within a period of 5 years.

As soon as there are reasonable doubts over the technical success or financial and commercial profitability of a project, the values recorded in the asset that apply to it are directly allocated to the financial year's losses.

Computer Applications

Licenses for computer applications purchased from third parties are capitalized on the basis of the costs incurred for purchasing.

Computer applications are amortized on a straight-line basis throughout their useful lives, at an annual rate of 33%.

Maintenance expenses for computer applications incurred during the financial year are recognized in the Consolidated Profit and Loss Account.

Industrial Property

Corresponds to the capitalized development expenses for which the relevant patent or similar has been obtained, and includes the registration and formalization costs for the industrial property, as well as the costs for purchasing the corresponding rights from third parties.

During all these years, the Group has been able to develop methods and unique technologies in its sector by continuous investment in research and development. The result of this effort has been the publication of patents at European, American and PCT levels, putting in value the effort developed during these last years. These patents allow the Group to license this technology to third parties and protect it against possible copies of other actors in the sector, less scrupulous when creating original models.

c) Tangible Fixed Assets

Tangible fixed assets are valued by their acquisition price or production cost, net of the corresponding accumulated amortization and, where appropriate, of the accumulated value of the recognized allowances for impairment.

Repair and maintenance expenses incurred during the financial year are debited in the Consolidated Profit and Loss Account. Costs for renovating, extending or improving intangible fixed assets, representing an increase in capacity, productivity or lengthening of useful life, are capitalized as a higher value of the corresponding assets, once the book values of the replaced items have been de-recognized.

Tangible fixed assets, net of their residual value, where appropriate, are amortized by a straight-line-basis distribution of the various items that constitute these fixed assets over the years of estimated useful life making up the period in which the Group hopes to use them, according to the following table:

	Annual Percentage	Estimated Years of Useful Life
Buildings	2,50	40
Technical facilities	8 - 10	12,50 - 10
Machinery	20 - 25	5 - 4
Other installations	10	10
Furniture	10 - 15	10 - 6,67
Computer equipment	25 - 50	4 - 2
Other tangible fixed assets	15	6,67

The book value of a tangible fixed-asset item is de-recognized in the accounts through its alienation or disposal by other means; or where no future economic benefits or profits are expected to be obtained for its use, alienation or disposal by other means.

The loss or profit resulting from writing-off a tangible fixed-asset item is determined as the difference between the net values, where appropriate, of the sales costs resulting from its alienation or disposal by other means, where available, and the item's book value, and is allocated to the Consolidated Profit and Loss Account for the financial year in which this occurs.

At the financial year's closure, the Group, assesses whether there are signs of impairment in a tangible fixed-asset item or any cash-generating unit, in which case the recoverable amounts are estimated and the necessary allowances are made.

An impairment loss is deemed to have occurred in a tangible fixed-asset item where its book value exceeds its recoverable value, this being understood as the higher value between its fair value less the sales costs and its value in use.

Allowances for impairment in the tangible fixed-asset items, as well as their reversals where the circumstances producing them cease, are recognized as an expense or income respectively in the Consolidated Profit and Loss Account.

d) Leases and Other Transactions of a Similar Nature

Operating-lease expenses incurred during the financial year are debited in the Consolidated Profit and Loss Account.

e) Financial Instruments

The Group determines the classification of its financial assets on their initial recognition and, where permitted and appropriate, this classification is re-assessed on each closing of the consolidated balance sheet.

Financial instruments, for the purposes of their valuation, are classified in any of the following categories:

Loans and Receivable Items and Debts and Payable Items

Loans and Receivable Items

The following are classified under this category:

- a) Trade credits: financial assets arising from the sale of assets and the provision of services for commercial transactions, and
- b) Non trade credits: financial assets which, being neither equity instruments nor derivatives, have no commercial origins, whose payments are for a fixed or determinable amount, and which are not traded in an active market. They do not include those financial assets for which the Group cannot recover substantially all the initial investments, owing to circumstances unrelated to credit impairment. The latter are classified as available for sale.

Debts and Payable Items

The following are classified under this category:

- a) Trade debts: financial debts arising from the purchase of assets and services through commercial transactions, and
- b) Non trade debts: financial liabilities which, not being derivate instruments, have no commercial origins.

Initially, financial assets and liabilities included in this category are valued by their fair value, which is the price of the transaction and which is equivalent to the fair value of the consideration paid plus the transaction costs which are directly attributable to it.

Notwithstanding what is stated in the above paragraph, loans and debts through commercial transactions with a maturity not greater than one year and which do not have a contractual rate of interest, as well as, where appropriate, advances and loans made to staff, receivable dividends and called payments on equity instruments, the amounts for which are expected to be received in the short term, and payments called by third parties on holdings, the amounts for which are expected to be paid in the short term, are valued by their nominal value where the effect of not updating the cash flows is of no significance.

In subsequent valuations, both assets and liabilities are valued by their amortized cost. Accrued interest is recognized in the Consolidated Profit and Loss Account by applying the effective interest rate method. Notwithstanding the above, loans and debts with a maturity no greater than one year which are initially valued by their nominal value, remain valued by this amount unless, in the case of loans, they have been impaired.

At the year end, the necessary allowances are made where there is objective evidence of value of a credit having been impaired, i.e. where there is evidence of a reduction or delay in estimated future cash flows corresponding to that asset.

An impairment loss in the value of loans and receivable sums corresponds to the difference between their book value and the current value of the estimated future cash flows to be generated, deducted at the effective interest calculated on their initial recognition.

Allowance for impairment of debts as of June 30, 2020, has been estimated on the basis of the analysis made on each of the individualized outstanding receivables on that date.

Financial Assets Available for Sale

This category includes debt securities and equity instruments from other companies not classified in any of the preceding categories.

Subsequently, they are valued by their fair value, without deducting the transaction costs that might be incurred in their alienation. Changes in fair value are directly recognized in the equity, until the financial asset leads to de-recognition or is impaired, where the value so recognized is allocated to the Consolidated Profit and Loss Account.

Notwithstanding the above, allowances for impairment and losses and gains which arise from exchange differences in monetary financial assets in foreign currency are recognized in the Consolidated Profit and Loss Account rate.

The value of both the interest, calculated under the effective interest method, and the accrued dividends are also recognized in the Consolidated Profit and Loss Account.

Investments in equity instruments whose fair value cannot be reliably determined are valued by their cost, less, where appropriate, the accumulated value of the allowances for impairment.

De-recognition of Financial Assets

A financial asset, or part of it, is de-recognized where the contractual rights over the cash flows of the financial asset have expired or been assigned, and the risks and benefits attaching to its ownership have been substantially transferred.

De-recognition of Financial Liabilities

A financial liability is de-recognized where the corresponding obligation ceases.

Interest Received from Financial Assets

Interest from financial assets accrued subsequent to their purchase are recognized as income in the Consolidated Profit and Loss Account.

Interests are recognized by using the effective interest rate method. For these purposes in the initial valuation of the financial assets, both the value of the explicit interest, accrued and non-matured at that time, and the value of the dividends agreed to by the competent body on acquisition, are recognized independently, bearing in mind their maturity.

Guarantees Given

Guarantees given and received through operating leases and provision of service are valued by the amount paid out and received respectively.

f) Transactions in Foreign Currencies

Transactions in foreign currencies are recognized by their exchange value in Euros, by using the spot exchange-rate for the dates on which they occur.

On the close of each financial year, monetary items are valued by applying the average spot exchange-rate on that date. Exchange differences, both positive and negative, which result from this process, as well as those generated on selling off equity items, are recognized in the Consolidated Profit and Loss Account for the financial year in which they arise.

g) Profit Tax

Profit tax is recognized in the Consolidated Profit and Loss Account or directly in the Consolidated Equity depending on where the gains or losses giving rise to it are recognized. Profit tax for each financial year includes both current and deferred taxes, where appropriate.

The current tax amount is the sum to be paid by the companies as a result of the assessment notices for the tax.

Differences between the book value of assets and liabilities, and their tax base, generate the deferred tax asset or liability tax balances which are calculated using the expected tax rates at the time of their reversal, and under the method in which it can be reasonably expected to recover or pay the asset or liability.

Variations arising during the financial year in deferred tax asset or liability are recognized either in the Consolidated Profit and Loss Account or directly in the Consolidated Equity, as appropriate.

Deferred tax assets are only recognized insofar as it is probable that the company will have future tax gains that allow these assets to be applied.

In each closing balance sheet the book value of the recognized deferred tax assets is analyzed and the necessary adjustments are made insofar as there are doubts over their future tax recoverability. Likewise, in each closing non-recognized deferred taxes are assessed in the balance sheet and these are subject to recognition to the extent that their recovery with future tax benefits is probable.

h) Income and Expenses

Income and expenses are allocated according to the accrual basis, i.e. where the real flow of goods and services occurs which these represent, irrespective of when the monetary or financial flow deriving from them occurs.

Income resulting from the sale of goods and provision of services is valued by the fair value of the consideration, received or to be received, that derives from these, which, unless there is evidence to the contrary, is the agreed price for these goods or services, less the amount of any discount, reduction or other similar items, as well as the interest incorporated into the face value of the credits.

Income from services is recognized when the result of the transaction can be estimated reliably, considering the percentage of completion of the service at the year-end date. Consequently, only income from the provision of services is accounted for when all and each of the following conditions:

- a) The amount of the income can be reliably valued.
- b) It is probable that the Group receives financial benefits or profits arising from the transaction.
- c) The extent of the transaction carried out, on the date of closure of the financial year, can be reliably valued, and
- d) The costs already incurred in the service's provision, as well as those that are yet to be incurred up to its completion, can be reliably valued.

i) Provisions and Contingencies

Debentures existing at the close of the financial year, resulting from past events which may occasion loss in equity for the Group, and whose value and time of cancellation are indeterminate, are recognized on the consolidated balance sheet as provisions and are valued by the current value of the best possible estimate for the amount necessary to cancel the obligation or transfer it to a third party.

j) Grants, Donations and Legacies

Non-refundable capital grants, as well as donations and legacies, are valued by the fair value of the amount granted or of the goods received. They are initially allocated directly as income in the Consolidated equity and recognized in the Consolidated Profit and Loss Account in proportion to the amortization undergone over the period by the assets financed through these grants, unless these are non-depreciable assets, in which case they will be allocated to the earnings of the financial year in which their alienation or de-recognition takes place.

Grants intended for cancelling debts are allocated as income for the financial year in which the cancellation occurs, unless they are received for a specific financing, in which case the allocation is made according to the item that is financed.

Refundable grants are recognized as long-term debt convertible into subsidies until they become non-refundable.

Operation grants are credited to the earnings of the financial year when they accrue.

k) Related-Party Transactions

In general, items forming the subject matter of a related-party transaction are initially recognized by their fair value. The subsequent valuation is made in accordance with the provisions laid down in the corresponding regulations.

l) Cash-Flow Statements

Cash-flow statements use the following expressions according to the meanings given below:

Cash and Equivalents: Cash is both cash in hand and demand deposits. Cash equivalents are financial instruments forming part of the Group's normal cash management, are convertible into cash, have initial maturities no greater than three months and are subject to little significant risk of change in their value.

Cash Stream-flows: inflows and outflows of cash or other equivalent resources, with the latter being understood as investments having terms under three months, high liquidity and low risk of changes in value.

Operating Activities: these are the activities that make up the principal source of the Group's ordinary income, as well as other activities that cannot be classified under investment or financing.

Investment Activities: acquisition, alienation or disposal by other means of long-term assets and other investments not included in cash or cash equivalents.

Financing Activities: activities that lead to changes in the size and composition of the equity and financial liabilities.

NOTE 4. MINORITY INTEREST

NOTE 11. INFORMATION ON THE NATURE AND LEVEL OF THE RISK FROM FINANCIAL INSTRUMENT

Group activities are exposed to various types of financial risk, most especially credit, liquidity and market risks (exchange rate, interest rate and other price risks).

11.1) Credit Risk

The Group's main financial assets are cash and cash balances, trade and other receivables and investments, which represent the Group's maximum exposure to credit risk in relation to financial assets.

The Group's credit risk is attributable mainly to its commercial debts. The amounts are reflected in the net balance of provisions for bad debts, estimated by the Parent Company's management based on the experience of previous years and its assessment of the current economic environment.

11.2) Liquidity Risk

The general situation of financial markets, especially the banking market, has been particularly unfavourable for credit claimants. The Group pays constant attention to the evolution of the different factors that can help to solve liquidity crises, and especially to the sources of financing and their characteristics.

11.3) Market Risk

The general market situation during the last years has been unfavourable due to the difficult economic situation of the environment.

11.4) Exchange Rate Risk

The Group is not exposed to a significant exchange rate risk and therefore does not trade in hedging instruments.

11.5) Interest Rate Risk

Changes in interest rates modify the fair value of assets and liabilities bearing a fixed interest rate as well as the future flows of assets and liabilities referenced to a variable interest rate.

The objective of interest rate risk management is to achieve a balance in the debt structure that will minimize the cost of debt over the multiannual horizon with a reduced volatility in the Consolidated Profit and Loss Account.

11.6) Risks Derived from the Current Situation due to the Possible Effects of COVID-19

Since December 2019, COVID-19, a new strain of Coronavirus, has spread to many countries, including Spain since January 2020. This event significantly affects economic activity worldwide and, as a result, the Group's operations and financial results.

The effects of this crisis have had two main axes within Lleida.net:

- Enhancing sales of SaaS line derived from lockups, which have forced to adapt the companies policies, and has accelerated all the digitalization of both notification and hiring processes where Lleida.net has been a key agent of change
- Change in the type of traffic of the SMS wholesale line, where hospitality traffic has been reduced but where volume has been maintained, thanks to SMS linked to digital processes and a need for this communication channel derived from teleworking and social distancing.

The growth in demand for the SaaS line is not foreseen as a one-off growth, but rather as an accelerator of new contracts, which will have recurrent consumption.

With the aim of minimizing the risk of contagion within the staff of Lleidanet, where the number of employees has continued to increase and no ERTE has been accepted, teleworking was introduced as a predominant precautionary measure. To date, most of the staff continues to telework, and the staff attending the facilities must comply with the security protocol implemented.

12.3) Issue Premium

This reserve amounted to 5.244.344,28 euros, of which 329.090,20 euros arose as a result of the capital increase carried out in 2007 and 4.915.254,08 euros arose as a result of the capital increase carried out in the 2015 exercise for the departure of the Parent Company to the Alternative Stock Market. It has the same restrictions and can be used for the same purposes as voluntary reserves, including their conversion into share capital.

12.4) Own Shares

The Board of Shareholders of the Parent Company agreed on June 1, 2015 to authorize the Parent Company's Board of Directors for the derivative acquisition of treasury shares under the terms established by current legislation. These acquisitions of own shares have been made through the liquidity provider GVC Gaesco Valores SV, S.A, making available a total value of 1.200.000 euros and Invest Securities S.A. in Euronext Grothw, with a total disposition of 83.438,45 euros, in order to be able to carry out transactions for the purchase and sale of its own shares, in accordance with the regulations of the Alternative Stock Market and Euronext Grothw, respectively. Own shares are valued at acquisition cost.

As of June 30, 2020, the Parent Company holds own shares for an amount of 334.512,65 euros (753.301,13 euros in the previous year).

Tax Situation

In accordance with current legislation, tax payments cannot be considered final until they have been inspected by the tax authorities, or until the statute barring period of four years has passed. In consequence, for the purposes of subsequent inspections, liabilities may arise additional to those recorded by the Group.

As of June 30, 2020, the Group has open to tax inspection all the taxes to which it is subject from the financial year 2016 to the 2019 financial year. Consequently, as a result of possible inspections, additional liabilities could arise to those registered by the Group. However, the Directors of the Parent Company and its tax advisors consider that such liabilities, if they occur, would not be significant on the financial statements taken as a whole.

1. EVOLUTION OF RESULT AND NET TURNOVER

In the first half of the 2020 financial year, sales have increased by 29% to reach 7.8 million euros. Growth was marked by both the Wholesale line and the SaaS line, with increases of 44% and 31% respectively.

The growth of the SaaS line has been boosted by COVID19 which has created new demand for our products, as a result of the increase in teleworking due to confinement. Lleida.net products are perfectly adapted to this new normality, where you have to keep signing documents and making notifications. Specifically, due to confinement, we have seen how the consumption typology of our customers has been modified, increasing the consumption of notification products in detriment of hiring products. Lleida.net product portfolio allows to adapt to both economic growth and recession periods. Additionally, we have accelerated the signing of relevant contracts, which will have an impact on sales from the last quarter of 2020 onwards, such as South African Post, Ibercaja, Alphabet and Ald Automotive.

The 44% increase in sales of the Wholesale line, which includes SMS sales from carriers and aggregators, is explained by the new agreements signed with Asian carriers. As a result of the COVID, we have seen how hospitality traffic has disappeared (hotels, airplanes, vacation home rentals, cabs) but the traffic of labor, health and transactional information has increased.

Commercial SMS sales, with a decrease of 6% compared to the same semester of 2019, are the ones with less potential within Lleida.net portfolio. It is a simple SMS market for small volume customers. We do not expect significant developments in this business line for the end of the year.

The gross margin has increased 17% in absolute figures, and the Gross margin between sales ratio has gone from 53.7% in the first semester of 2019 to 48.5% in the first semester of 2020. The decrease in the ratio is explained by the relative weight of Wholesale sales over total sales, as these sales have a lower unit margin than SaaS sales.

Personnel costs increased by 172 thousand euros, 12% compared to the same semester in 2019. One of Lleida.net pillars is the constant incorporation of talent, necessary both in the development of new products and in the acquisition of new clients and opening of new markets. Lleida.net staff has increased in a 7.6% if we compare the interannual data. The last incorporations have been destined to cover the demand of additional information derived from COVID

Activations have decreased by 180 thousand euros, 35% compared to the same period in 2019. It is worth noting that the company, regardless of the lower volume of activations, continues to make the same intensive work in this area to continue developing products, mainly in the SaaS line, with innovation being a basic pillar within the company's strategy and continuously reinforcing its talented staff.

The EBITDA has increased by 30% derived from:

- Increase in sales and the corresponding gross margin.
- The "braking" of external service costs, due to lower commercial travel due to mobility restrictions in the second quarter.
- The lower activation of research and development expenses as explained above.

Both EBITDA and pre-tax results are positive, and the increase in sales and gross margin has allowed us to continue with the company's strategic plan by attracting talent.

2. EVENTS AFTER THE BALANCE SHEET DATE

On September 14, 2020, the General Shareholders' Meeting agreed, in an extraordinary call, to request the admission of all the company's shares as a listing on the OTCQX International market in New York (USA).

In addition to the above-mentioned agreement, from June 30, 2020 until the date of preparation, no subsequent events have occurred, in addition to those already mentioned in the Explanatory Notes to the Interim Financial Statements, that would reveal circumstances that already existed at June 30, 2020 and that, due to the importance of their economic impact, should imply adjustments to the financial statements or modifications to the information contained in the Explanatory Notes.

Nor are there any subsequent events, other than those already mentioned in the Explanatory Notes, that demonstrate conditions that did not exist at June 30, 2020 and which are of such importance that they require additional information in the Explanatory Notes to the Consolidated Interim Financial Statements.

3. PROBABLE EVOLUTION OF THE GROUP

The forecasts for the second half of the 2020 financial year are to increase the gross margin in terms of the Group's amounts, reinforcing sales of certified products by consolidating the products internationally.

4. RESEARCH ACTIVITIES

In the first half of fiscal year 2020, the Company invested 331 thousand euros in research activities aimed mainly at the company's certification line.

5. OPERATIONS WITH OWN SHARES

In accordance with the regulations of the Alternative Stock Market, the company signed a liquidity agreement with the placement bank on the occasion of its market debut. This agreement establishes both the delivery of a certain amount of own shares, and the deposit of an amount of cash. The purpose of this agreement is to allow investors to trade the company's shares, ensuring that any interested person has the possibility to buy or sell shares.

At the Board of Directors meeting held on August 12, 2016, the acquisition of own shares was approved for a maximum amount of 200 thousand euros. The program was extended until June 1, 2020 following the agreement of the Board of Directors on July 30, 2019.

At 30 June 2020, the company had 279.933 shares with a valuation on that date of 1.012.856,18 euros, which represented 1,74% of the shares in Lleidanetworks Serveis Telemàtics, S.A.

6. FINANCIAL INSTRUMENTS

During the first semester of 2020, the Company has not used instruments related to financial derivatives.

7. DEFERRALS OF PAYMENT TO SUPPLIERS

Information regarding deferrals of payment to suppliers is shown in the Financial Statements in Note 10.

8. EFFECTS DERIVED FROM COVID-19

Information regarding the effects of the current situation caused by Covid-19 is shown in the Financial Statements, in Note 11.6
