Autres Informations marquantes
LLEIDANETWORKS SERVEIS TELEMÀTICS, S.A.

**Aperçu de la production du premier trimestre 2023 et comparaison
avec les premiers trimestres des 3 années précédentes**

Conformément aux dispositions de l'article 17 du Règlement (UE) n 596/2014 concernant l'abus du marché et de l'article 227 du texte refondu de la Loi du Marché des actions, approuvé par le RDL 4/2015 du 23 octobre, et des dispositions concordantes, ainsi qu'en vertu des dispositions de la circulaire 3/2020 du segment BME Growth du BME MFT Equity, par la présente, LLEIDANETWORKS SERVEIS TELEMÀTICS S.A (désormais « Lleida.net », ou « la Société » ou « la Compagnie »), met à votre disposition les informations suivantes, élaborées sous la responsabilité exclusive de l'expéditeur et ses administrateurs :

Vous trouverez ci-joint une présentation des progrès de la production qui sera faite lors du webinaire du 19 avril à 18h00. Les données de production concernent le premier trimestre 2023 avec des comparaisons par rapport aux mêmes trimestres des trois années précédentes, ainsi que des comparaisons mensuelles et des suivis pour les quatre dernières années en ce qui concerne les utilisateurs uniques et les circuits contractuels.

Le webinaire aura lieu le mercredi 19 avril avec le PDG de la société, Sisco Sapena, pour répondre aux questions des personnes qui y assistent, sur l'adresse <https://www.lleida.net/es/streaming/1T2023> . Il est nécessaire de s'inscrire préalablement pour assister au webinaire.

Nous restons à votre disposition pour répondre à vos questions.

Cordialement,

Francisco Sapena Soler, PDG
À Madrid, le 19 avril 2023.

- Lleidanet PKI, Timestamp Production

CLICK & SIGN

ACTIVATIONS CLICK & SIGN STANDARD

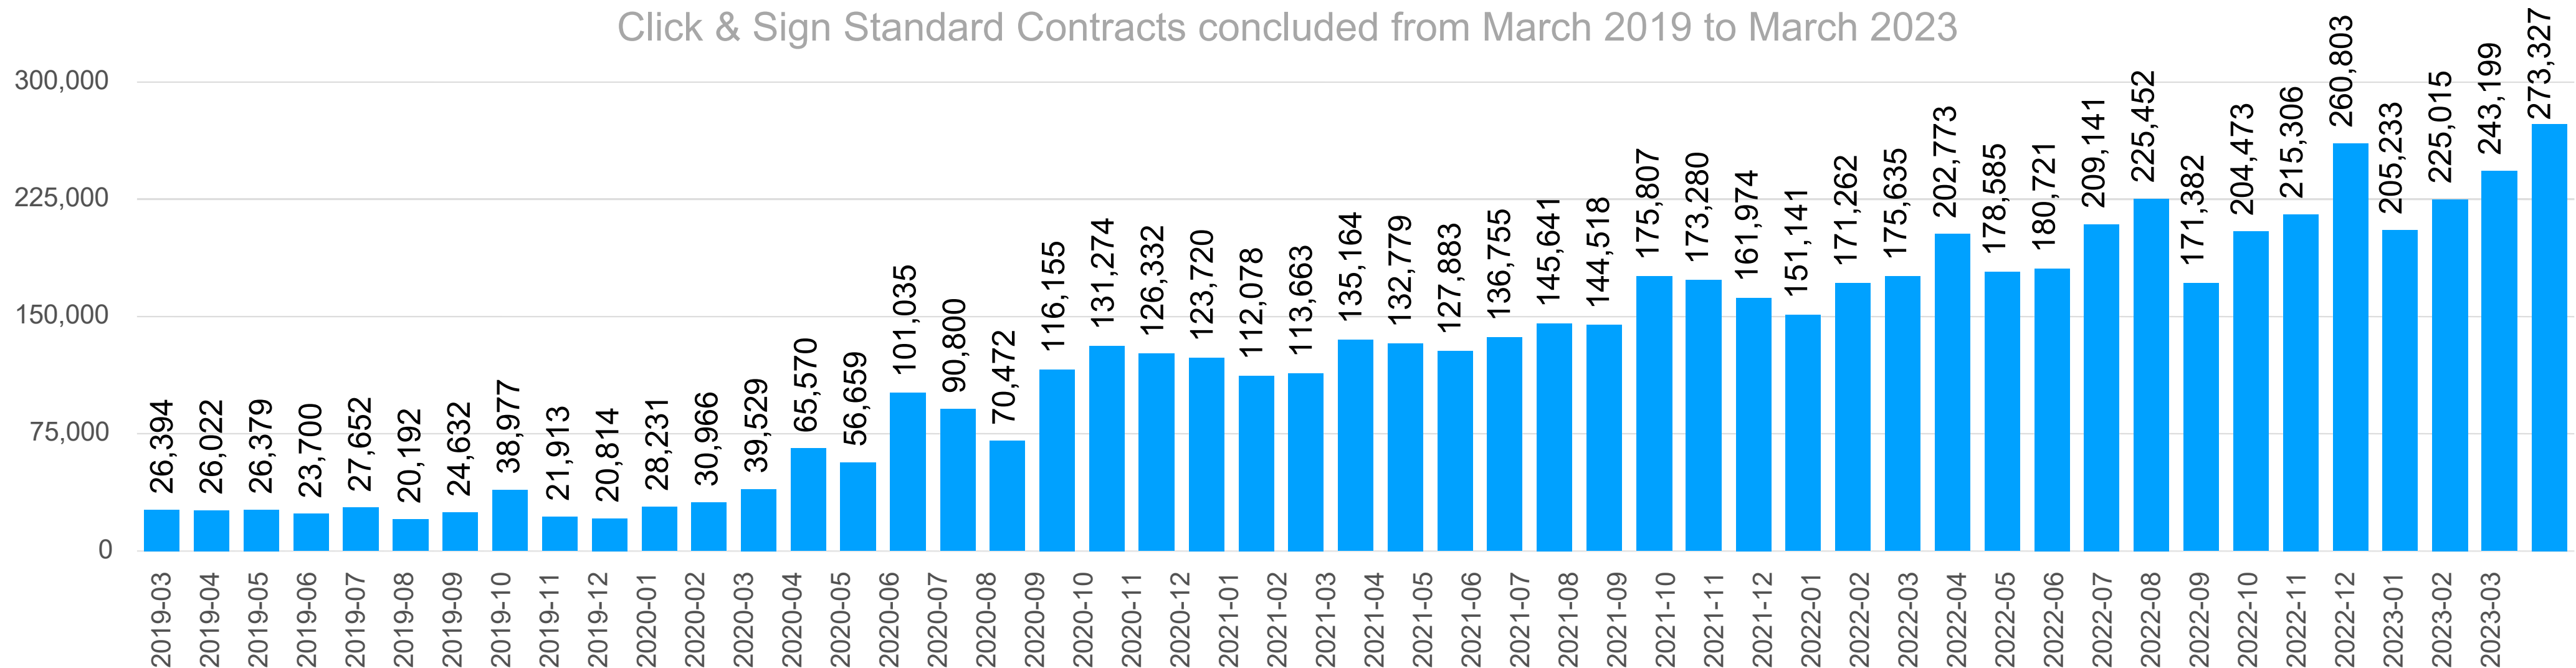

Click & Sign Standard unique users on a monthly basis March 2019- March 2023

The number of active API contract signature circuits created continues to rise, up 22.74% from March 2022 to March 2023. Traffic stemmed mainly from telecoms contracts, European real estate loans and the rise in bank account openings and consumer finance in Latin America.

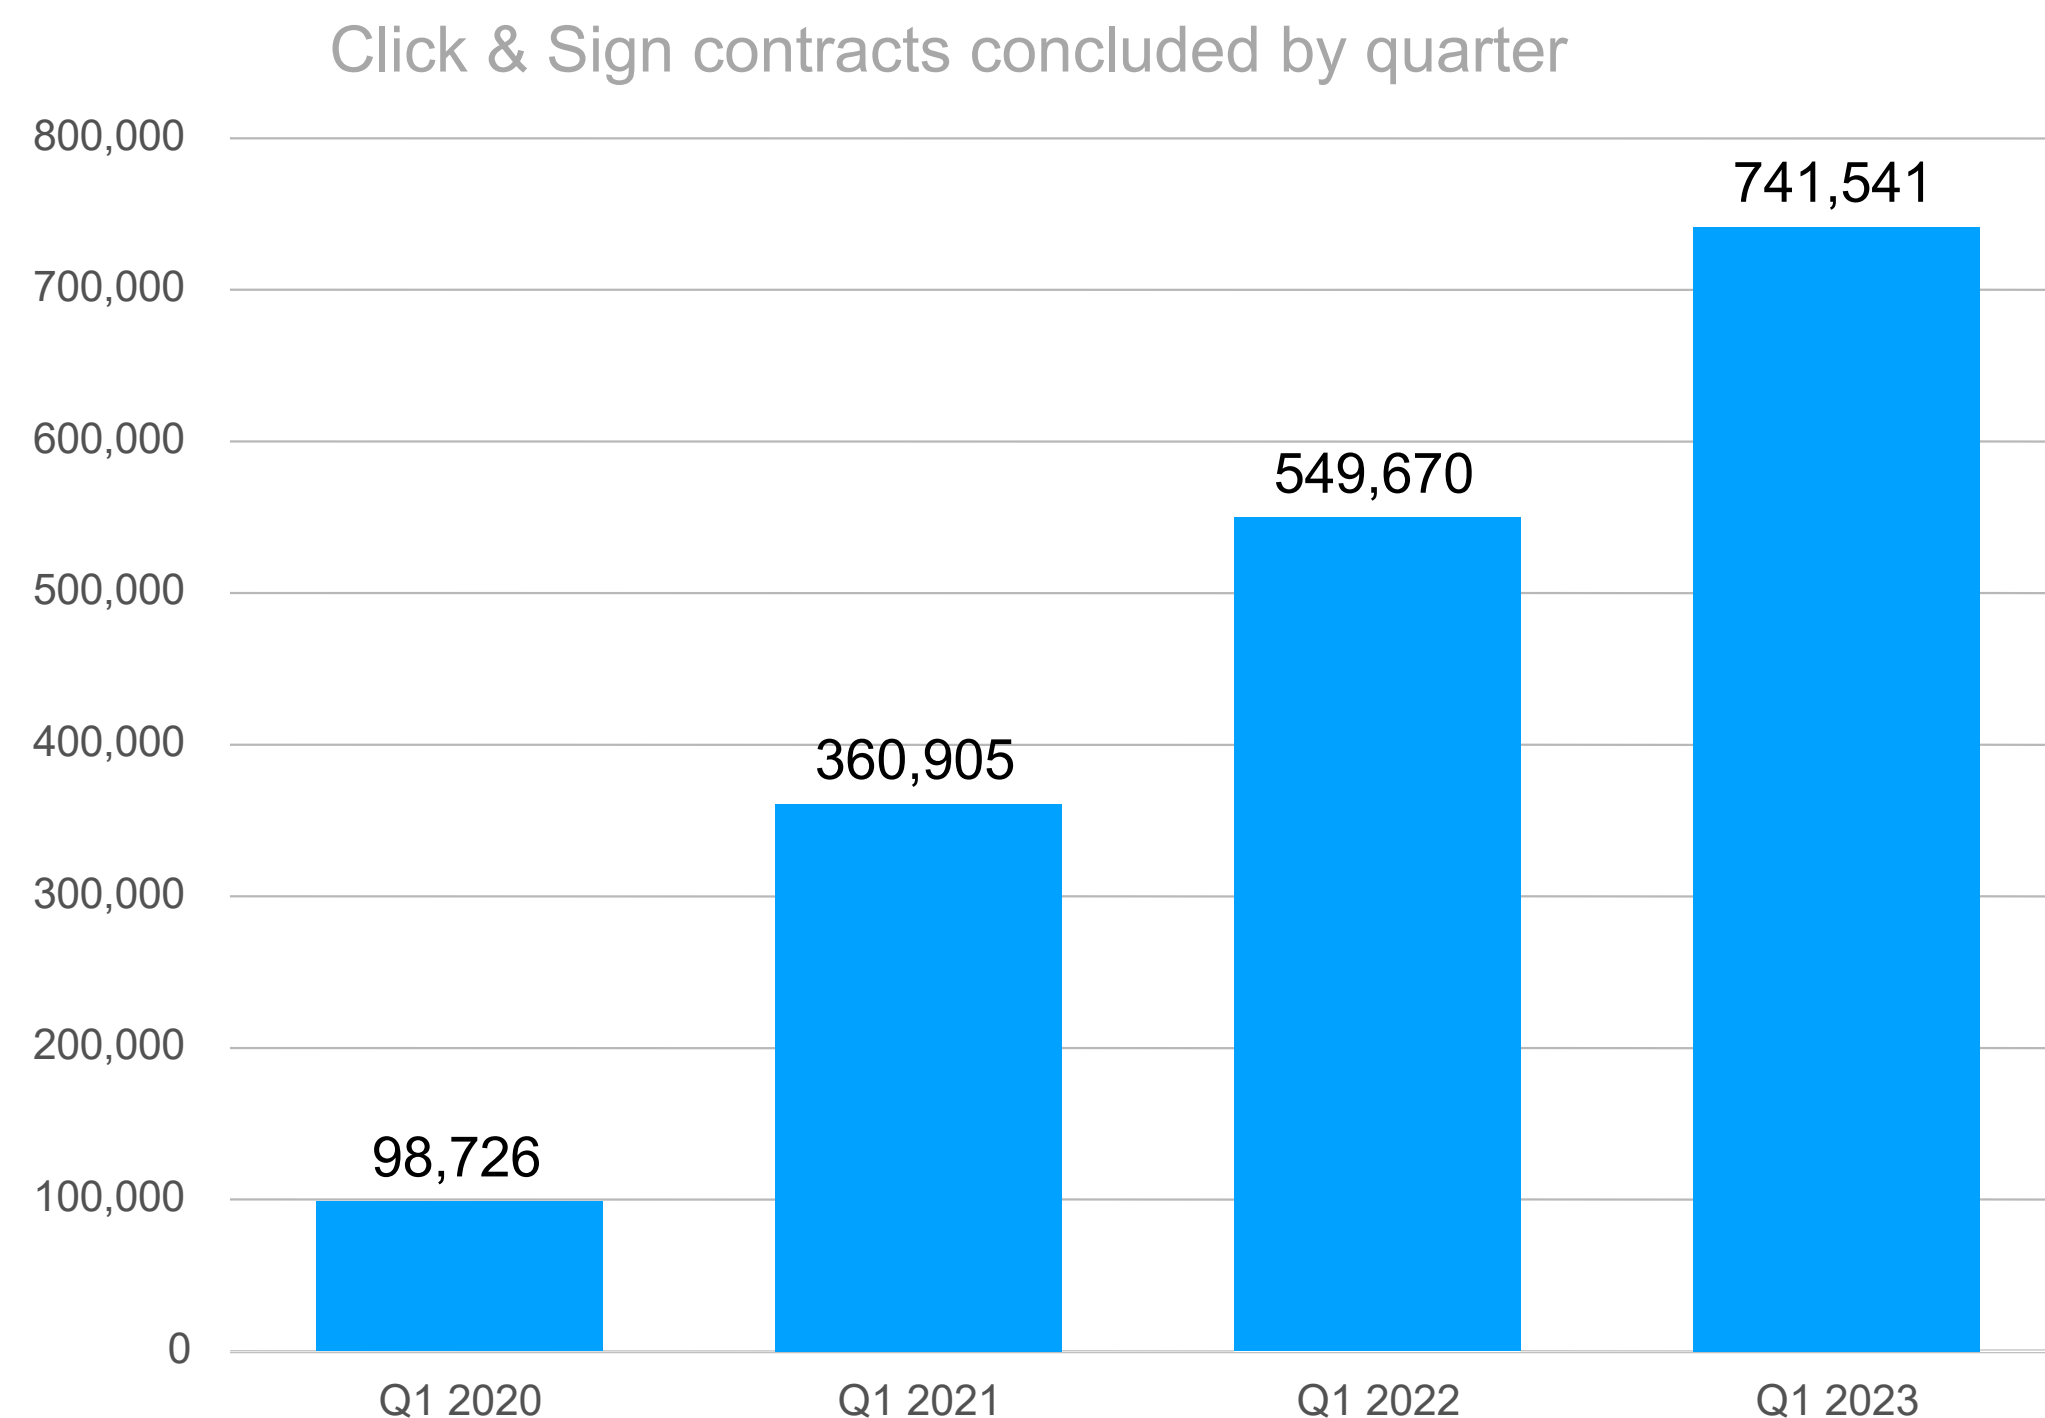

CONTRACTS CLICK & SIGN STANDARD

Click & Sign Standard Contracts concluded from March 2019 to March 2023

The number of active API contract signature circuits created continues to rise, up 34.70% from March 2022 to March 2023. Traffic stemmed mainly from telecoms contracts, European real estate loans and the rise in bank account openings and consumer finance in Latin America.

CONTRACTS CLICK & SIGN STANDARD

The number of contract signatures generated per API is increasing, with a 35% rise compared to the first quarter of 2022. This increase in traffic is mainly due to telecoms bookings and real estate lending in Europe, as well as rising bank accounts and consumer finance in Latin America.

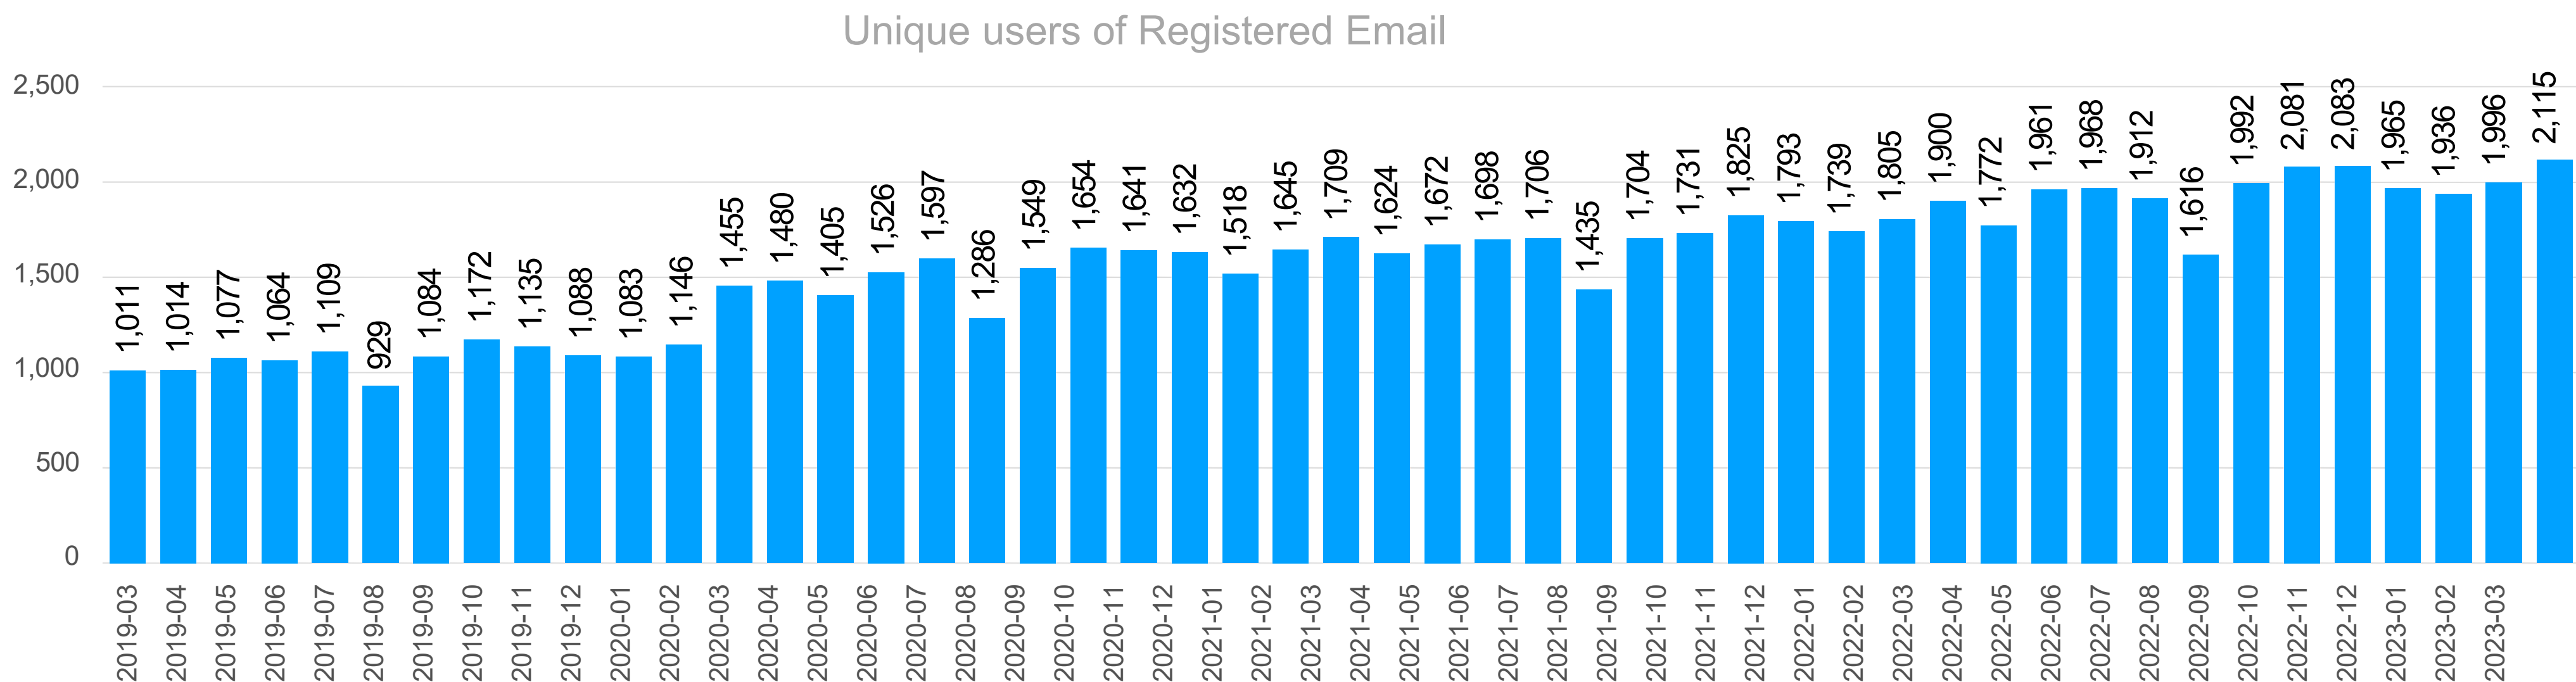

CLICK & SIGN PRO QUARTERLY PRODUCTION

PRO circuits are complex contracting circuits that involve analysing multiple variables before the actual contracting process occurs. Compared to Q1 2022, there was a 3% increase in PRO circuits. This increase was driven by the contracting of insurance in Europe, which had already seen a rise in the previous quarter, and the contracting of credit cards by Spanish entities and compliance with GDPR.

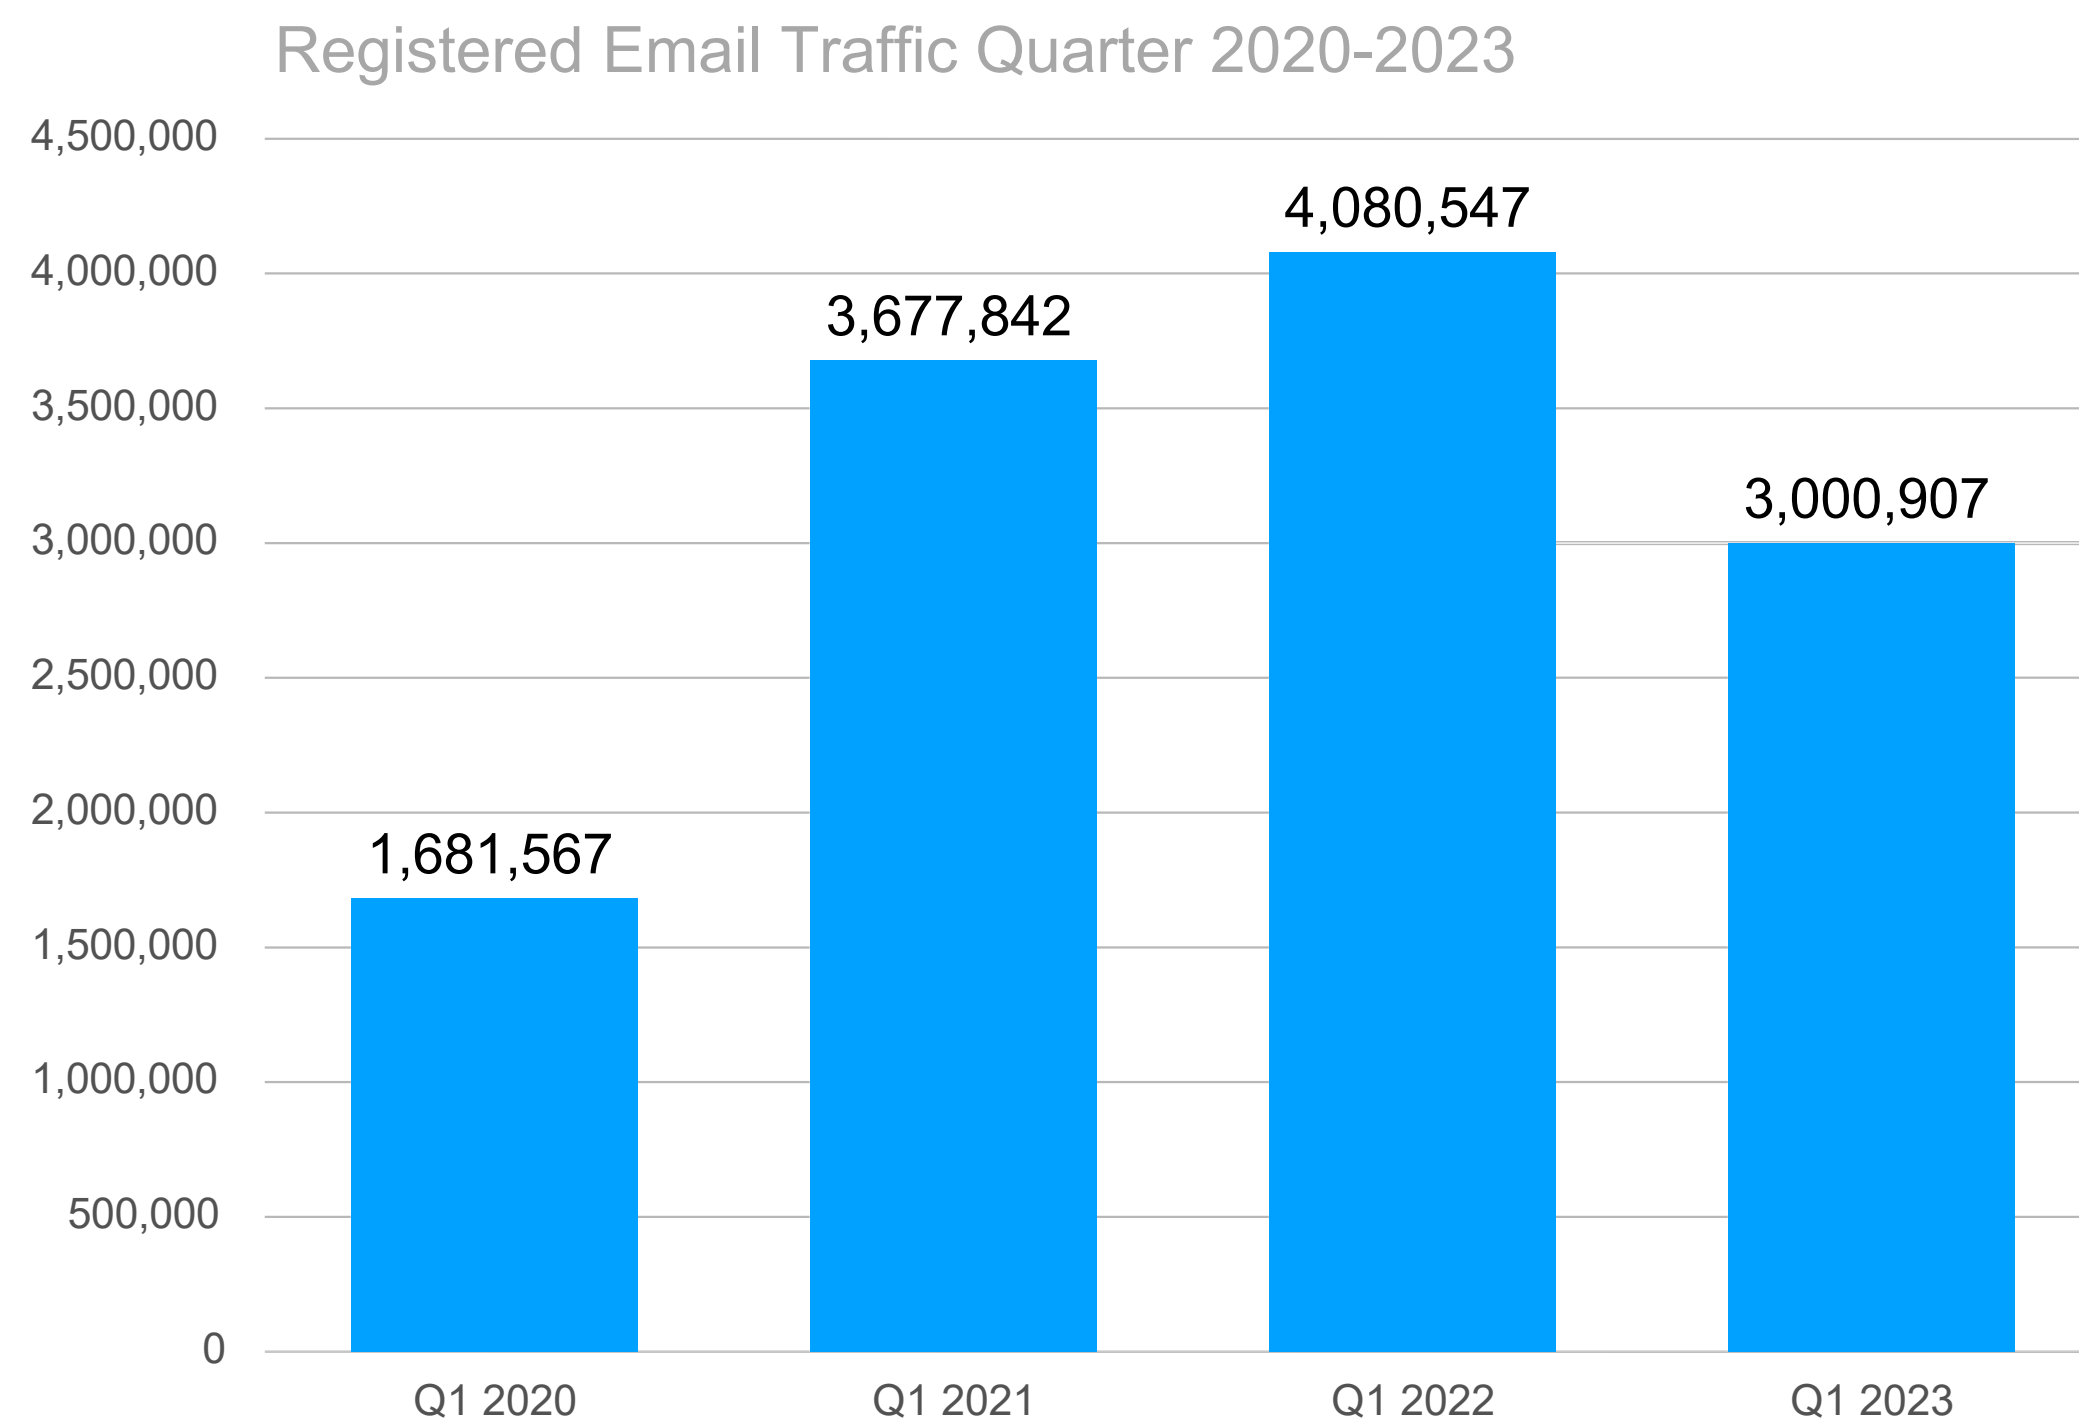

REGISTERED EMAIL

UNIQUE REGISTERED EMAIL USERS 2019-2023

Unique registered email users keep growing steadily and over the last four years
Overall, customers of the service are high-volume users of registered email.

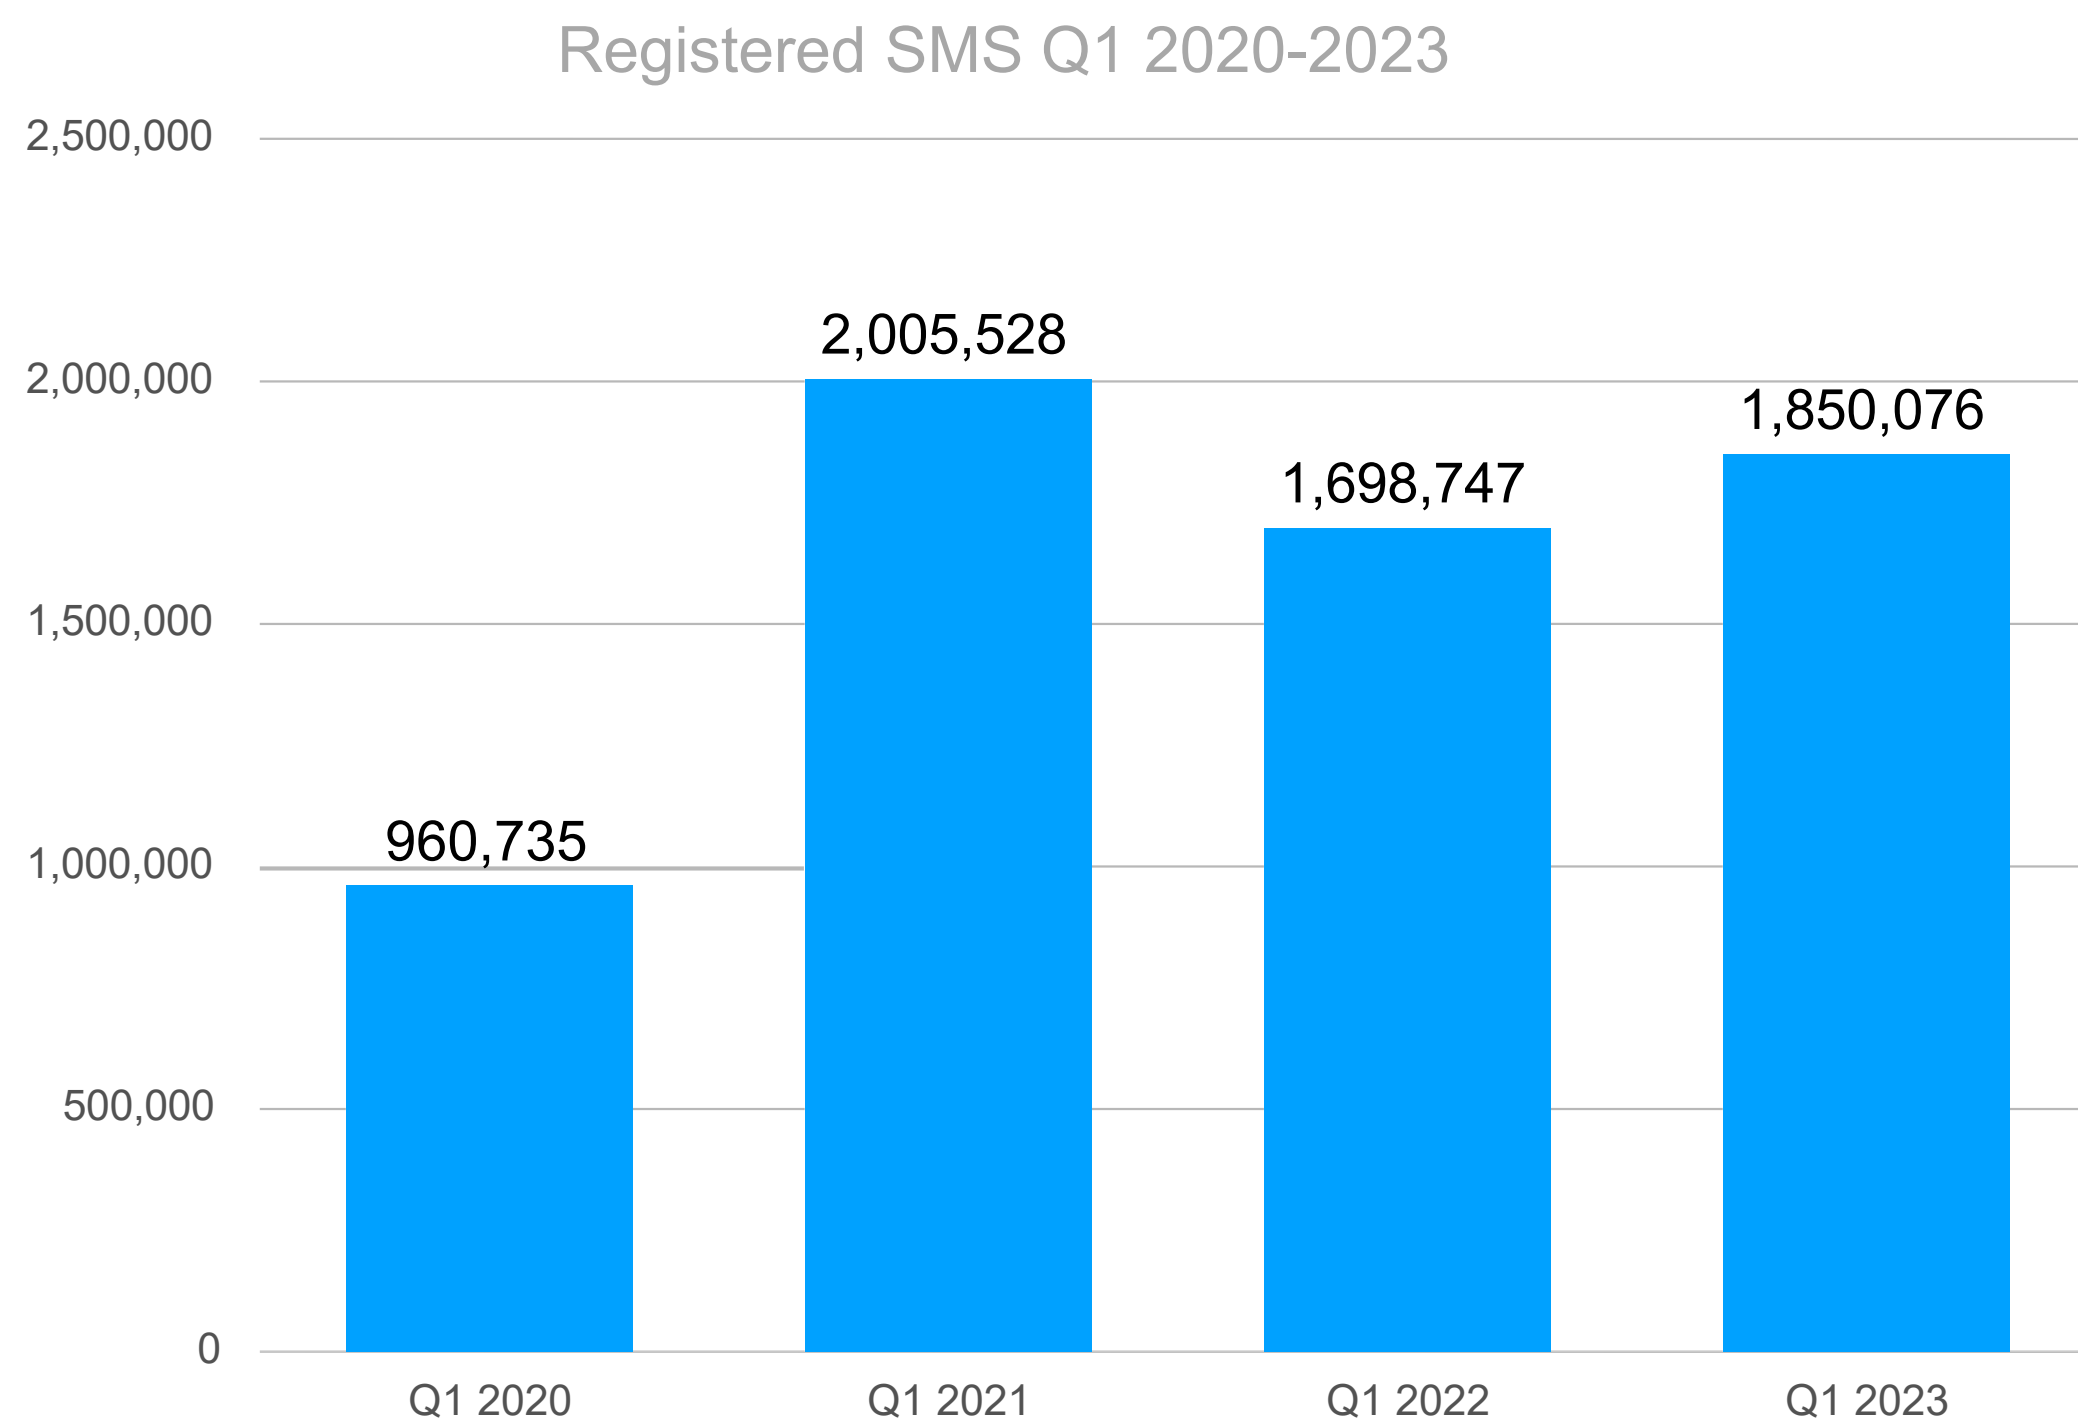

QUARTERLY REGISTERED E-MAIL PRODUCTION

The quarterly total number of registered emails sent dropped in the last quarter due to the cut-off of the service caused by the non-payment by the Colombian postal service, 4-72. However, the number is gradually recovering due to the transfer of the partner's customers to direct customers, as well as organic growth in countries such as Spain and Peru

SMS SERVICES

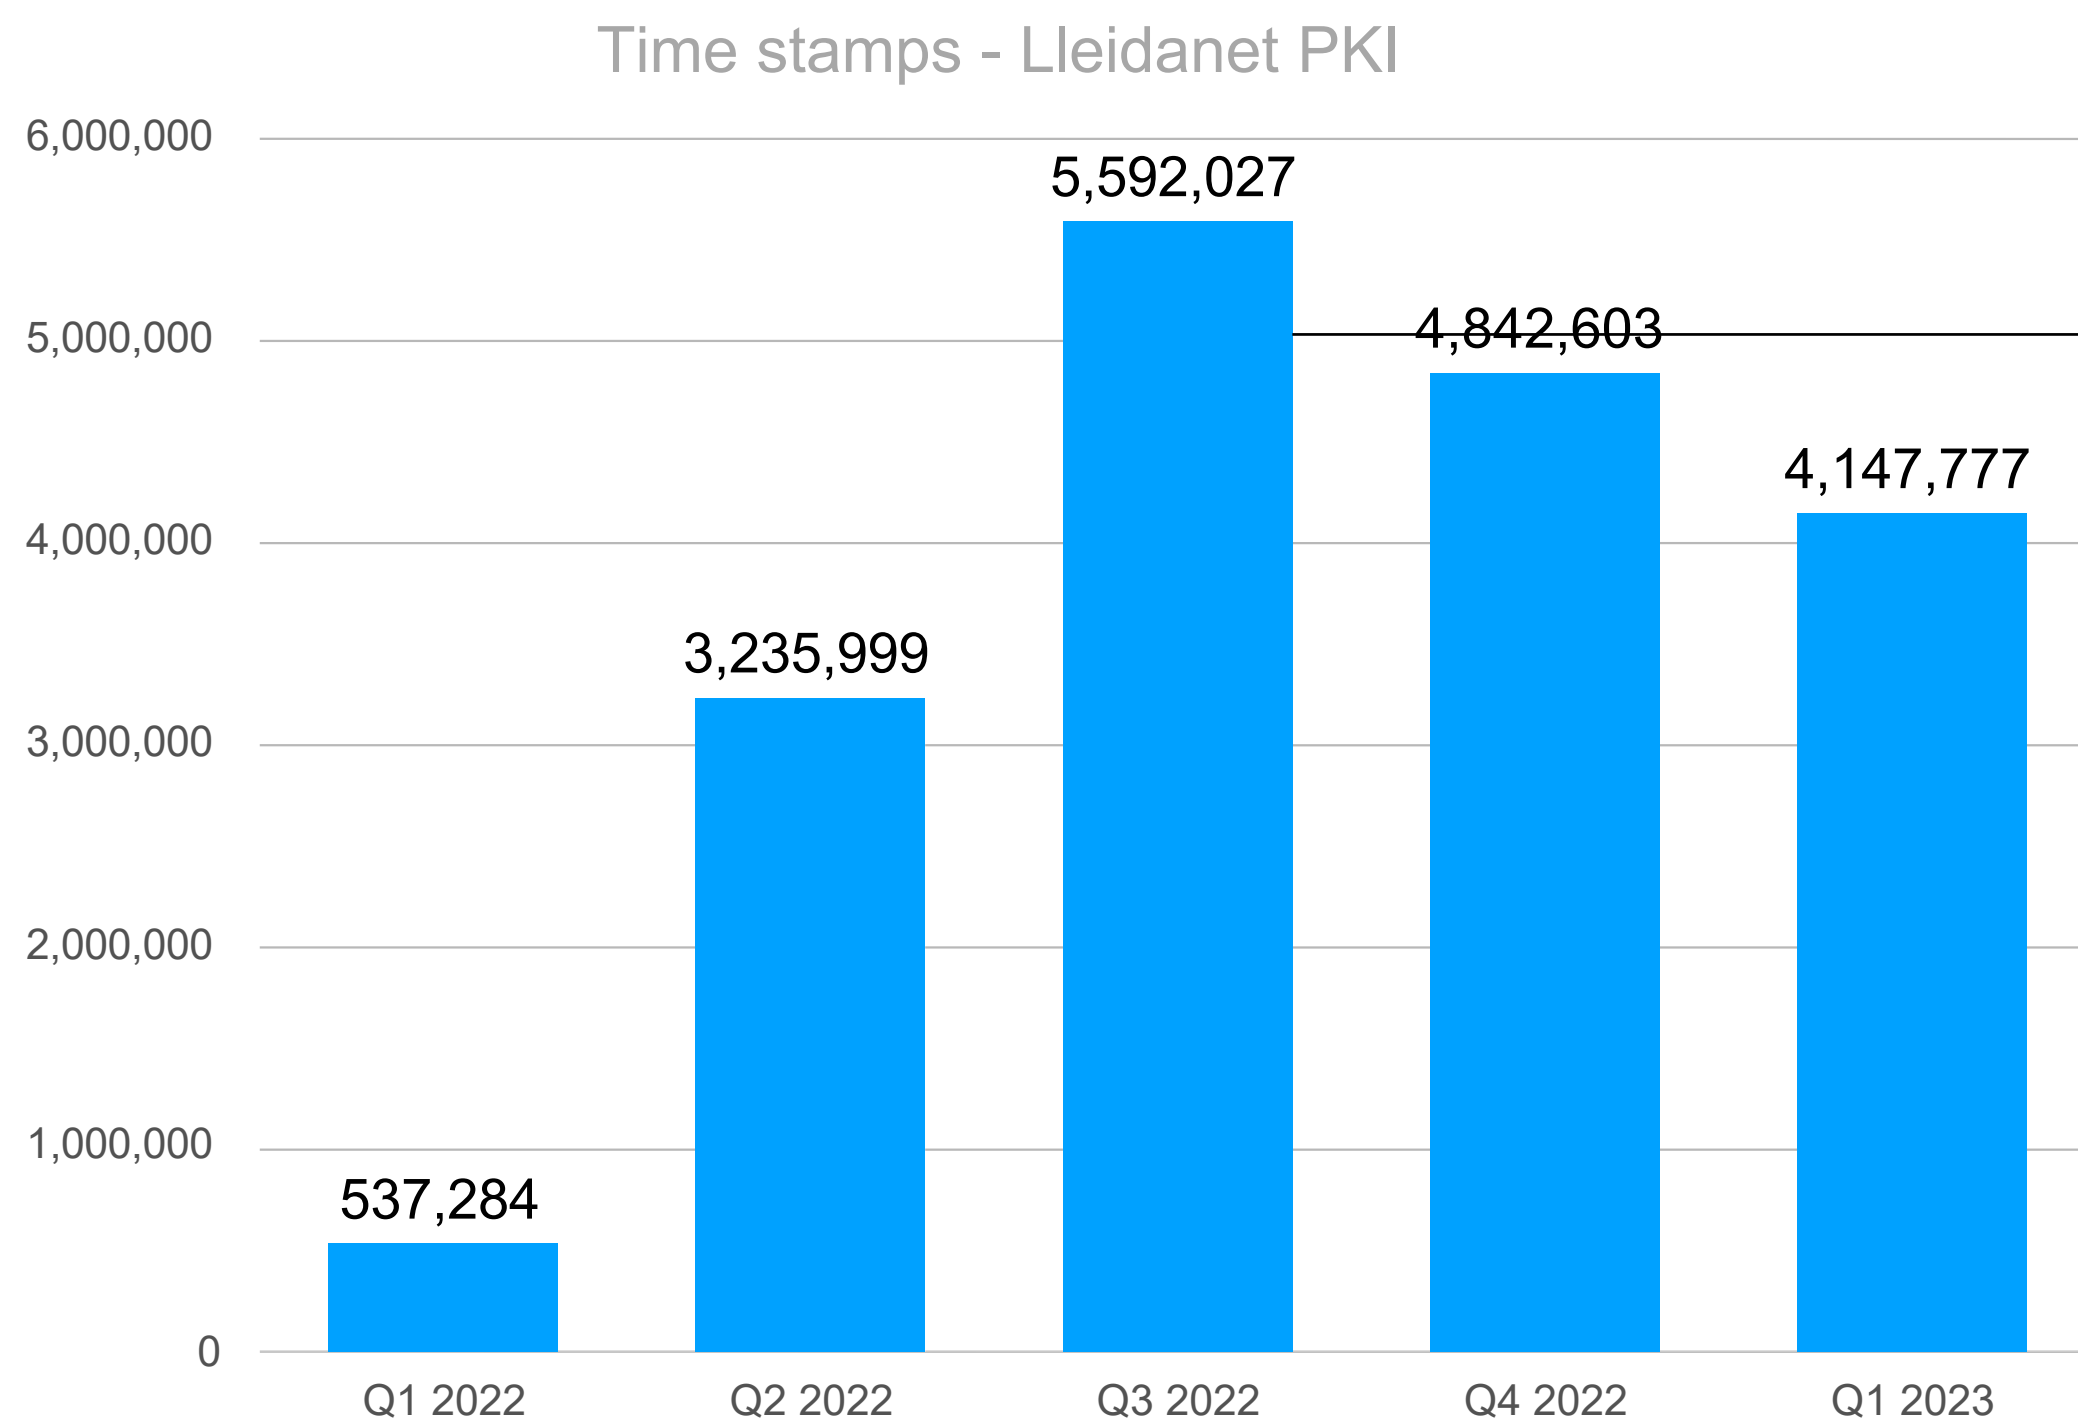

QUARTERLY REGISTERED SMS PRODUCTION

Registered SMSs remained steady and grew slightly compared to previous quarters
Banking and insurance are the main drivers of a rise in mutual health insurance companies and complaints from energy suppliers.

OTHER SERVICES

LLEIDANET PKI PRODUCTION - TIME STAMPS

During the first quarter of 2023, the Lleida.net PKI subsidiary, known as Indenova before it was acquired by the listed company in 2021, issued over 4.1 million timestamps on behalf of its customers.

Time stamps are commonly used as additional signatures in electronic transactions, particularly by large companies. Since its launch in the first quarter of 2022, the usage of this service has increased by 800%, making it one of the fastest-growing services.

NEW HYBRID PRODUCT LLEIDANET PKI

Validador Universal Certificado de Firmas Digitales (USVC)

Servicio de validación de las firmas digitales de un documento que permite la validación de cualquier tipo de fichero.

In the last quarter, the company began marketing its latest product, USVC, a new B2C product that validates any registered electronic signature, regardless of the platform on which it was issued. The company foresees that USVC will achieve even higher production levels than Registered mail.
